150 Series Dot Matrix Printer

CENTRONICS DATA COMPUTER is the world's leading manufacturer of printers. The Company is dedicated to making printers, giving it a commitment to leadership and continuity in the marketplace which is second to none.

CENTRONICS is structured to serving its customers and meeting their needs both technically and commercially.

Locally based, highly skilled and experienced people support and advise you through any problem and provide practical, effective help and training when you need it.

Our sales and marketing staff concentrate their skills on supporting our customers commercially - making sure that the Centronics approach provides the most cost effective solution.

Product reliability is assured at the design, manufacture, shipping and installation levels by a rigorous quality control procedure. This has resulted in product reliability which is the envy of the industry and which ensures a low cost of ownership of **CENTRONICS** printers.

All this is backed up by a Field Engineering force, strategically located throughout the country. These experienced engineers know what it means to you to be delayed by a printer fault and the organisation is ready to respond rapidly to any problem call.

TECHNICAL SUPPORT is available from a team of qualified and experienced engineers who can help by phone or on site, to get the very best from your printers.
