

SM 6000 - series
6000 watts DC POWER SUPPLIES

Three phase input

SM 15-400	0 - 15 V	0 - 400 A
SM 30-200	0 - 30 V	0 - 200 A
SM 45-140	0 - 45 V	0 - 140 A
SM 60-100	0 - 60 V	0 - 100 A
SM 70-90	0 - 70 V	0 - 90 A
SM 120-50	0 - 120 V	0 - 50 A
SM 300-20	0 - 300 V	0 - 20 A

- Efficiency up to 90 %
- Weight 27 kg
- 3 phase 380 V, 400 V, 415 V AC input
480 V optional
(48 - 62 Hz, line to line voltage)
- Active Power Factor Correction, PF=0.98
- 200 kHz MOSFET power conversion technique
- 0 - 5 V analog programmable
(on both voltage and current)
- Isolated analog programming with optional
ISO AMP CARD to prevent earth loops
- **Ethernet, IEEE488** or **RS232** programming with
optional interface cards
- Very low HF-emission, OK for **light** industrial envi-
ronment, immunity OK for **industrial** environment
- Very low output ripple and spikes

- Very stable output voltage or current ($5 \cdot 10^{-5} - 10^{-4}$)
- Excellent dynamic response to load changes
- Master / Slave parallel and series operation with
equal current and voltage sharing
- Can be used as a building block to form a high
power unit
- Designed for long life at full power
- Protected against all overload and short circuit
conditions
- V and I control with 10-turn potentiometers,
resolution 0.03 %. Optional with digital encoders
- Silent blower, only runs when needed, variable
speed
- Output On/Off button, Interlock-connector

Weight	27 kg						

Digital Encoders**OPTION P220**

- CV and CC encoders with a very long life time and intelligent functions (e.g. Keylock).

Screwdriver adjustment standard potentiometers**OPTION P001**

- CV and CC knobs are moved backwards to avoid accidental adjusting.

screwdriver
adjustment**Master / Slave operation**

- Parallel and Series operation with equal Current and Voltage sharing.
- This way two or more SM-units can be used together as one high power unit.
- Voltage and current of the units is controlled by the master (by potentiometers or by programming).
- Easy to connect in Master / Slave mode, using standard UTP-cables (RJ45).
Standard on all SM6000 units, no special option required.

**Battery Charging**

- The CV / CC regulated power supplies are ideal battery chargers. Once set at the correct output voltage, the battery will charge constantly without overcharging. This can be useful for **emergency power systems**.
- Use a circuit breaker in series to protect the internal diode from reverse connection of the battery.
- Some units need an **external diode set** on the output as extra protection for the internal diode.
- Ordering information for diode set:*

	SM 45-140	SM 120-50	SM 300-20
Option	P151	P152	P153

Download the special datasheet for more details from 'www.DeltaPowerSupplies.com'.

Increased max. output voltage/current**OPTION P069**

- The maximum output voltage or current can be increased by approximately 10%. Normally this results in a derating of the maximum ambient temperature or other parameters.
- Always add increased value for voltage or current in ordercode, for example **SM30-200 P069 output 32 V**.
For exact details consult the technical department, email 'Support@Delta-Elektronika.nl'.

Enforced secondary isolation 1000 V**OPTION P089**

- The secondary isolation between output and ground is increased from standard 600 V to 1000 V .

High Speed Programming

- The speed is **10 - 20 times higher** because of the smaller output capacitors.
- Relatively low current overshoots (if any) in case of sudden voltage variations caused by the load, this is of great advantage for laser diode applications.

Applications:

- Laser diode** power supply, continuous or pulsed.
- Test systems requiring a fast settling time to improve throughput of factory.
- A constant current source with a low parallel capacitance: plasma, load sensitive to current overshoots, etc.
- A constant current source on a load with **fast voltage variations**.
- Ordering information:*

	SM 15-400	SM 30-200	SM 45-140	SM 60-100	SM 70-90	SM 120-50	SM 300-20
Option	P166	P167	P168	P169	P170	P171	P172

Download the special datasheet for more details from 'www.DeltaPowerSupplies.com'.

Power Sink for 2 quadrant operation

- Can absorb **700 W peak power**.
- Maintains output voltage regardless output power is positive or negative (source & sink).
- Ideal solution for supplying **electric motors** with PWM-speed control.
- Fast down programming at no load conditions.
- Ordering information:*

	SM 15-400	SM 30-200	SM 45-140	SM 60-100	SM 70-90
Option	P230	P231	P232	P233	P234

Download the special datasheet for more details from 'www.DeltaPowerSupplies.com'.

Built-in ISO AMP CARD for isolated analog programming**OPTION P154****Built-in RS232 Power Supply Controller****OPTION P155****Built-in IEEE488 Power Supply Controller****OPTION P156****Built-in Ethernet Power Supply Controller****OPTION P157****440 and 480 V AC input (USA)****OPTION P165**

Note: there is only room for one of the interfaces in a unit (P154, P155, P156, P157)

Connections analog programming connector

CV= Constant Voltage
 CC= Constant Current

Specifications measured at
 $t_{amb} = 25 \pm 5^\circ C$ and $V_{in} = 400 V AC, 50 Hz, 3 phase$, unless otherwise noted.
