

GB HACS3 WIRELESS 3-ZONE ALARM SYSTEM

The HACS3 is a simple wired security system for houses and apartments. The system is simple to install and is operated by using a remote control. Extra accessories like a phone dialer, a wireless coded door lock, smoke detector or external tamper can be connected. It is also possible to connect extra detectors and remote controls (SASBP, SASBM, SASBR).

PACKAGE CONTENTS (1)

- 1. Remote control (RC) (HAK3)
- 2. Wireless magnetic contact with external magnet (SA63M)
- 3. Remote control (SASBR)
- 4. Remote control (SASBP)
- 5. Adapter 12 V 500 mA
- 6. 3 x battery LR03 type AAA 1,5 V (for SA63M)
- 7. 3 x battery LR03 type AAA 1,5 V (for SASBP)
- 8. 3 x battery LR03 type AAA 1,5 V (for SASBR)

PREPARATION

Check and verify the following points before installing the central unit (a)

1. An area with only one entrance door and not fitted with windows can be secured with a magnetic contact (b) on the door (i.e. a garage, a basement or storage room).
2. For areas which are only accessible via another central area it is usually sufficient to safeguard the entrance area (a) with a motion detector (2).
3. All open areas with multiple access ways can be best protected with a motion detector (2).
4. Place the central unit (a) and the detectors (b), if preferably at least 0,5 meters from metal objects like central heating pipes, water pipes and radiators.
5. Place the central unit (a) always near a wall socket in order to connect the adapter (e).
6. The central unit (a) also contains a siren. Naturally it's the intention that this siren can be heard clearly.

PLANNING

Install the central unit (a) and detectors (b, c) as installed a careful plan should be made about what should be protected and which detector should be used. Make a map of the house and indicate which rooms are to be protected. Make a map of the house and indicate which rooms are to be protected. Make a map of the house and indicate which rooms are to be protected.

INSTALLATION AND PROGRAMMING

This can be best done before the central unit (a) and detectors (b, c) are installed in the house. The following steps should be followed:

1. Connect the central unit (a) to the power supply.
2. Connect the external magnet (SA63M) to the central unit (a).
3. Connect the remote control (SASBR) to the central unit (a).
4. Connect the remote control (SASBP) to the central unit (a).
5. Connect the remote control (SASBR) to the central unit (a).

OPERATION

The system is operated by using the remote control (RC). The system is operated by using the remote control (RC). The system is operated by using the remote control (RC).

TECHNICAL DATA

Frequency	868 MHz
Distance	50m
Control unit	3
Adapter	12V 500mA DC
Battery power	6x LR03 AA 1,5V (also rechargeable)
Alarm output	12V/200mA
Replace manual batteries	approx. 48 hours

GENERAL INFORMATION

The system is designed for use in houses and apartments. The system is designed for use in houses and apartments. The system is designed for use in houses and apartments.

WARRANTY

The manufacturer warrants the system for a period of 2 years. The manufacturer warrants the system for a period of 2 years. The manufacturer warrants the system for a period of 2 years.

CONTACTS

For more information, please contact the manufacturer. For more information, please contact the manufacturer. For more information, please contact the manufacturer.

NOTES

Please read the instructions carefully. Please read the instructions carefully. Please read the instructions carefully.

DISCLAIMER

The manufacturer is not responsible for any damage caused by the use of the system. The manufacturer is not responsible for any damage caused by the use of the system.

INDEX
