

Rack Installation

The ADM-1 can be housed into an ETSI 300 119 standard rack.

The instructions in order to install the ETSI 300 119 standard rack are given into Appendix CC located in "Installation" section, "Attached Documents" chapter.

Rack Installation Details

In order to customize the rack standard installation procedure for a ADM-1 equipment the following steps must be performed:

- ◆ *install the partitioning strip on either side of the rack as shown in Fig. 2.1-1;*
- ◆ *prepare the interconnection cables in accordance to the cable positioning information located in "Electrical Connection" chapter.*
