HISTORY

THE FN AMERICAN HERITAGE

1897-1926

FN's unique transatlantic relationship begins in 1897 through its long-standing partnership with John Moses Browning, who made 122 trips (over 61 round-trips) between the United States and Europe (Herstal) prior to his death in Belgium in 1926. Through Browning's collaboration with FN, the company produces legendary products, such as the 7.65 Auto Pistol (1897), the Auto-5® autoloading shotgun (1902), the .30-caliber machine gun (1919), the Browning Automatic Rifle (BAR, 1921), and the Hi Power™ (1923) auto pistol.

1944-1946

Post World War II: Once Belgium was liberated from German occupation, FN rebuilds more than 2 million U.S. small arms from the European Theater of Operation, and resumes manufacturing.

1953-1976

FN produces the GP 35, (an updated edition of the Browning Hi Power™), FAL, FNC and M2HB QCB for the Western world and soon earns the reputation as the "right arm of the free world." The GP 35 remains the benchmark against which all other 9mm autoloading service pistols are measured. Through this same period, FN also develops the 7.62x51mm cartridge that was approved by NATO in 1957.

1977-1980s

1977: FN acquires Browning Arms.

1977-1982: The U.S. military adopts both the FN MINIMI Squad Automatic Weapon (M249) and the FN MAG 58 General Purpose Machine Gun (M240). FN opens FN Manufacturing, LLC. (FNM), in Columbia, South Carolina, to build small arms for the U.S. military.

1982: FN's SS109, 5.56x45mm caliber cartridge becomes the NATO standard.

1989: FN becomes The Herstal Group.

1990s

1990: FN's 5.7x28mm caliber P90® submachine gun, soon followed by the Five-seveN® pistol, are introduced to military, elite law enforcement and security forces around the globe.

1998: The Herstal Group establishes FNH USA, LLC to manage U.S. government relations as well as military new business development, marketing, sales and service for law enforcement and commercial markets of FN firearms in the U.S.

Our commercial and sporting firearms benefit from FN's long-standing legacy of quality and reliability.

2001

The FN 303 Less Lethal Launcher is introduced as the premier less lethal system for law enforcement and is adopted by the U.S. Department of Homeland Security (2008). In addition, the 303 is put into use by the U.S. Army in multiple units through the fielding of the Rapid Equipping Force (REF).

2003

The FN SPR A3G precision bolt-action rifle becomes available to U.S. law enforcement. It is one of two rifles that were selected by the FBI for its precision tactical rifle program. FN also expands upon the success of the Browning M2 and M3AN with the GAU-21 (M3M), which fires from the open bolt with twice the rate of fire of the M2 and offers the ability to fire at extreme angles.

2004-2008

2004: The FN P90® and FN Five-seveN® pistol are introduced into the U.S. market.

2007-2008: FN introduces the large caliber FNP-45 polymer-framed autoloading pistol and the selective-fire FN SCAR® 16 and SCAR® 17 to the U.S. law enforcement market.

2008-2010

2008-2010: FN develops a family of remotely operated weapon stations capable of providing protective fire when mounted on tactical vehicles and deployed on stationary positions. The FN deFNder™ Light is developed in 2008 and is optimized to handle 7.62x51mm and 5.56x45mm belt-fed machine guns. The FN deFNder™ Medium is developed in 2010 and is designed to mount .50-caliber machine guns and 40mm grenade launchers for deployment on tactical vehicles.

2010: The FN SCAR®—designated as the MK 16 and MK 17—is operationally deployed around the globe to U.S. special operators and other agencies, along with the MK 13 EGLM (Enhanced Grenade Launcher Module).

TODAY

2011-2012: FN launches the FNS, a new polymer, striker-fired pistol developed for law enforcement and available to both military and commercial markets. The company also launches the 303P Less Lethal Pistol for military, law enforcement, corrections, and security duty. Additionally, the FN SCAR® PDW (Personal Defense Weapon) and the FN HAMR (Heat Adaptive Modular Rifle) are launched to the U.S. market.

THE HISTORY OF FN

TECHNOLOGY, PROCESS & DESIGN

Two words have always been synonymous with the leading edge of firearms design and manufacturing—Fabrique National (FN).

For more than a century, FN has been at the forefront of every aspect of firearm innovation. From the legendary Hi Power™ and FAL to today's innovative FN Five-seveN® and SCAR®, the path forward has been blazed by FN. You might even say that innovation is in our DNA. Let's look at some of the things that set FN apart from other gunmakers.

Today's FN firearms represent the end product of some of the most sophisticated technology available anywhere in the world. Every aspect, from the initial conceptual design through engineering, manufacturing, final assembly and testing all benefit from our investment in advanced technology.

Every FN firearm begins with a detailed analysis of the end user's needs. These user needs drive every aspect of the design process. How will the firearm ultimately be used and under which environments? How can FN design the firearm to be more operator friendly? How can the ergonomics be improved to allow the firearm to fit a wider variety of operators and be more adaptable to their individual needs?

These user-defined criteria are then applied to the basic design and to the initial selection of materials. Which components of the new firearm design would be best executed in forged steel, aircraft-grade alloy or a high-performance polymer? What interior and exterior finishes will improve the durability and reliability of the firearm under all conditions?

Each FN firearm design is carefully developed with the aid of state-of-the-art Computer-Aided Design and Manufacturing systems (CAD/CAM) to allow the design engineer to see how each part interacts with every other component. Each aspect of the firearm design is meticulously refined, computer-modeled and tested. Functional prototypes

are developed and rigorously tested through hundreds of thousands of rounds so the design can be further refined. The end result is an FN firearm design that is precise, accurate, durable and reliable.

As the design moves into the manufacturing phase, these computer-designed components are fabricated on state-of-the-art machinery that's capable of holding tolerances to mere fractions of an inch. FN rifle and pistol barrels are cold hammer-forged from ordnance-grade steel on the same production lines used to build the machine guns that protect America's warriors. Barrel interiors are polished to a mirror finish, and are often hard-chromed for longer life. Internal parts are fashioned with precision surfaces to ensure smooth function and flawless reliability for tens of thousands of rounds. Internal and external surfaces receive highly-advanced protective coatings that are able to shrug off the effects of the most adverse environmental conditions.

While FN firearms are manufactured on state-of-the-art multi-axis CNC machinery, it is the human touch of a highly skilled craftsman

in final assembly that ultimately brings them to life. Each component is assembled with precision and pride. Every mechanical function and operating control is tested, double-checked and re-tested. Nothing is left to chance. When an FN firearm is placed in its box or case, it is ready for action.

Through every step of the process, a dedicated group of FN quality control engineers monitor each of the endless production details to create a product that meets and exceeds our customers' exacting standards. Our investment in advanced technology, in systems like our multi-point, laser-guided quality control instrumentation helps ensure this level of perfection in our products. That's why every FN firearm proudly displays the ISO 9001 Quality seal, the highest international standard for manufacturing quality.

When you choose an FN firearm, you can be confident that its design, manufacture and assembly are done right. It is a quality firearm you can depend on, day in and day out, for many years to come. We call it total confidence, and it is only available from FN.

HANDGUNS

RELIABLE... ANYTIME AND ANYWHERE

America's most celebrated gun designer John M. Browning forged a lasting relationship with FN at the close of the 19th century. From 1898 to the time of his death in 1926 Browning and FN shaped the direction of firearms design for decades to come.

What was old is new again. FN is no stranger to building "striker-fired" pistols. Beginning in 1898 FN brought the world the Model 1898/1900 pistol, producing more than 700,000 units. Following that success FN created the M1910 and its variant the M1922. With an unquestioned reputation for reliability and accuracy FN pistols were in demand. In 1955 another variant was built expressly for the American market. The M1955 and later the M1971 were both built to serve the needs of the American public. With more than 70 years of experience in building some of the finest striker-fired pistols, FN introduces its latest: the FNS.

FN has a stable of hammer-driven pistols, too. From the unique and flat shooting FN Five-seven® to the FNX-9 and FNX-40, and moving up to their big brothers the FNX-45 and versatile "optic-ready" FNX-45 Tactical. It is said that the greatest source of knowledge is experience, and with more than a century of experience, FN knows pistols.

NEW ITEM

ISO 9001
QUALITY

GENERAL SPECIFICATIONS

- AVAILABLE IN 9MM, 40 S&W, AND A COMPACT VERSION
- STRIKER-FIRED AUTOLOADER
- 1 DOUBLE-ACTION OPERATION WITH MANUAL SAFETY LEVERS
- 5.5 TO 7.7 LBS. TRIGGER PULL
- LENGTH: 7.25"
- HEIGHT: 5.5"
- WIDTH: 1.35"
- SLIDE**
- ALL STAINLESS STEEL CONSTRUCTION

- 2 EXTERNAL EXTRACTOR WITH LOADED CHAMBER INDICATOR
- 3 FRONT AND REAR COCKING SERRATIONS
- THREE-DOT NIGHT SIGHTS
- BARREL**
- 4 HAMMER-FORGED STAINLESS STEEL
- POLISHED CHAMBER AND FEED RAMP
- FNS-9: 4.0" LONG (BORE AND CHAMBER); FNS-40: 4.0" LONG (BORE AND CHAMBER)

- TWIST AND DIRECTION: FNS-9: 1:10" RH FNS-40: 1:16" RH
- FRAME**
- RUGGED POLYMER CONSTRUCTION WITH REPLACEABLE STEEL FRAME/SLIDE RAILS
- 5 TWO INTERCHANGEABLE BACKSTRAP INSERTS WITH LANYARD EYELETS
- 6 MIL-STD 1913 ACCESSORY MOUNTING RAIL
- SERRATED TRIGGER GUARD

OPERATING CONTROLS

- FULLY-AMBIDEXTROUS SAFETY LEVERS, SLIDE STOP LEVERS, AND MAGAZINE RELEASE BUTTON

MAGAZINE

- FNS-9: 17-ROUNDS; FNS-40: 14-ROUNDS

THE FN FNS REAR SIGHT ALLOWS COMPLETE VISIBILITY OF THE FRONT DOT WITH A THREE-DOT SIGHT SYSTEM, OR THE TRADITIONAL METHOD OF ALIGNING THE TOP EDGES OF THE SIGHTS CAN BE USED.

STRIKE FIRST, HARD AND FAST WITH THE FN FNS

The FN FNS is an all new autoloading service pistol design introduced to law enforcement in 2011. The FNS offers the simplicity of double-action striker-fired operation combined with the proven ergonomics of the FNX platform. The manual safety levers, slide stop levers and magazine release buttons are all fully ambidextrous for ease of operation with either hand and from any firing position. Both the slide and barrel are stainless steel, and the checkered polymer frame has two interchangeable backstraps with lanyard eyelets. A MIL-STD 1913 mounting rail on the underside accepts tactical lights and lasers.

The manual safety levers, slide stop levers and magazine release buttons are all fully ambidextrous for ease of operation with either hand from any firing position.

NON-ADJUSTABLE SIGHT VERSIONS OF THE PISTOL ARE DESIGNED TO BE USED WITH SS195LF (LEAD FREE) AMMUNITION.

THE MOST UNIQUE AND VERSATILE CENTER-FIRE PISTOL ON THE MARKET

The FN Five-seveN® autoloading pistol was developed for NATO in the early 1990s as the sidearm component of the integrated 5.7x28mm Weapon System. The cold hammer-forged barrel is chrome-lined for extended service life. The polymer-framed FN Five-seveN® offers single-action operation, low felt recoil, 20-round magazine capacity and is equipped with ambidextrous forward-mounted manual safety levers and an accessory rail that accepts tactical lights and lasers.

See page 149 for 5.7x28mm ammunition information.

MAKE A BOLD STATEMENT ON THE FIRING RANGE

Improving on the FNP-45 Tactical, developed for the U.S. Joint Combat Pistol Program (JCP), the FN FNX-45 Tactical is the latest in technological advancements in handgun engineering, offering 45 ACP performance and a host of unique features no other handgun can match. The checkered polymer frame is offered in Flat Dark Earth (FDE) and black and has a low-bore axis for reduced felt recoil and enhanced operator controls. Four interchangeable backstraps—two arched and two flat—come standard to quickly customize the grip feel. All operating controls are fully ambidextrous for ease of use. The 5.3" hammer-forged, stainless steel barrel has a threaded muzzle to accept sound suppressors, compensators and other accessories. The stainless steel slide has high-profile combat night sights and includes two mounting bases to accept multiple styles of optional red-dot electronic sights.

SHOTGUNS

THE WORLD'S FASTEST TACTICAL SHOTGUNS

A milestone was created more than 110 years ago when John M. Browning brought to FN the world's first successful self-loading shotgun design: the Auto-5®. Browning was so pleased with his design and sure that this shotgun would be a success, that he "steamed across the pond" to FN bringing the Auto-5® with him. The rest, as they say, is history. The attributes designed into the Auto-5® are present in FN's latest self-loading shotgun, the FN SLP. Available in several configurations, this workhorse commands attention wherever it goes. Incredibly fast, sure in its reliability and built to run, if you are up to the task the FN SLP is your gun. For personal defense, tactical matches or full-blown 3-gun competitions, the FN SLP will keep you in the lead. Browning had to go to Europe to have his shotgun built to his exacting standards; FN is proud to bring the best in self-loading shotguns back to you.

FN SLP autoloading shotguns come standard with **two pistons** for a wider range of functional reliability. The black piston is optimized for heavy tactical and field loads, while the red piston is intended for lighter target and field loads. The FN SLP cycles everything from light target and field loads to the heaviest 3" magnum buckshot and slug loads with incredible reliability.

...the FN SLP Tactical and FN SLP MK I Tactical models... [are] the perfect choice for home security and for practical competition.

THE MOST VERSATILE SELF-LOADING SHOTGUNS MADE, AND NOW THEY'RE EVEN BETTER

Introduced in 2011 both the FN SLP Tactical and FN SLP MK I Tactical models offer a highly ergonomic pistol grip synthetic stock and multiple MIL-STD 1913 rails, making them the perfect choice for home security and for practical competition. Like all FN SLPs, these tactical models feature ultra-reliable gas operation, a durable, matte black aircraft grade alloy receiver, an extended magazine tube and fully-adjustable rifle sights.

RIFLES

▶ EXCELLENCE IN PRECISION RIFLES

Much of what goes into an FN rifle comes from our long history as an arms manufacturer. FN began as an association of gunsmiths that answered the Belgian military's call for 150,000 Mauser rifles. It was this alliance of highly skilled craftsmen that ultimately formed FN. More than 120 years later we still rely on highly skilled craftsmen to build rifles worthy of our heritage.

The words "pre-64" and BAR® both evoke images of great guns: guns used by sportsmen and carried into harm's way by those in uniform. FN bolt action rifles for 2012 range from the TSR XP through multiple variations of the SPR. All FN rifles feature a forged steel "pre-64" style receiver and an external claw extractor with true controlled round feeding. All are fitted with hammer-forged barrels, in both fluted and non-fluted. The top-of-the-line FN SPR A3G is designed and manufactured to achieve and maintain a sub- $\frac{1}{2}$ MOA standard, the same performance that the FBI demands.

TACTICAL RIFLES BUILT FOR EXTREME PERFORMANCE

Introduced in 2009, the FN TSR XP series is based on the FN Special Police Rifle (SPR) bolt-action design, a rifle renowned around the world for its rugged reliability and pinpoint accuracy. The FN TSR XP uses the same forged receiver with integral recoil lug and flat bottom profile as the heavyweight FN SPRs. The FN TSR XP's free-floating fluted barrel is hammer-forged and target crowned for enhanced accuracy. These rifles are fitted into a sleek FN/Hogue® synthetic stock to create the ideal light rifle for precision shooting and sporter-class high power competition.

The **Tactical Box Magazine Kit** is an upgrade kit that allows owners of SPRs with the standard DBM magazine assembly (.308 Only) to upgrade to the TBM magazine assembly with 5 and 10-round magazines (DBM is only 4-round capacity). Kit replaces the trigger guard assembly. Does not require modification of or fitting to the rifle. Does not fit SPRs with hinged floorplate. TSRs or PBRs with DBM equipment might require fitting by a gunsmith. Retrofit on SPRs can be accomplished in minutes and requires few tools (torque wrench is required). Comes with new trigger guard/bottom metal, 5 and 10-round TBM magazines, new action screws and instructions.

For more information, see page 147.

Used by law enforcement and elite long-range competitors, the FN A1 and A1a SPRs are equal to any task requiring absolute precision from every shot.

ACCURACY DELIVERED WITH EVERY SHOT

Introduced in 2002 and 2003, respectively, the FN Special Police Rifle (SPR) models A1 and A1a are based on the legendary Pre-'64 Model-70 bolt-action design with a forged steel receiver and an integral recoil lug for greater accuracy. The flat bottom profile gives increased bedding stability for a non-shifting zero. The FN SPR A1 and A1a's free-floating barrels are hammer-forged, chrome-lined and target crowned and all models are fitted with McMillan™ fiberglass tactical stocks. Used by law enforcement and elite long-range competitors, the FN A1 and A1a SPRs are equal to any marksmanship task requiring absolute precision from every shot.

THE RIFLE YOU REACH FOR WHEN YOU NEED ABSOLUTE PRECISION

Based on the FN Special Police Rifle (SPR) A1, the FN SPR A5M series was originally introduced in 2006. Every FN SPR has a forged receiver with an integral recoil lug for greater accuracy, as well as a flat bottom profile resulting in improved bedding stability. The FN SPR A5M's free-floating barrel is hammer-forged, chrome-lined and target crowned for greater accuracy. Models are available with tactical box magazines. All FN SPR A5Ms are fitted with McMillan™ fiberglass stocks that are fully adjustable for length-of-pull and cheekpiece height to fit the individual shooter. Used by numerous law enforcement and security services and popular with demanding long range marksmen, the FN SPR A5M is equal to any competition task requiring every shot made with absolute precision.

ONE RIFLE. THREE CALIBERS. MANY MISSIONS. PICK THE RIGHT RIFLE...

Designed and built by Unique Alpine AG and commercialized by FNH USA, the FN/Unique Alpine Ballista™ represents the next generation of fully modular, multi-caliber bolt-action rifles designed to bring surgically precise fire at extended ranges. At the heart of the multi-caliber Ballista™ (338 Lapua Mag., 300 Win. Mag. and 308 Win.) is a high-strength, vibration-isolated aluminum alloy receiver with a top mounted MIL-STD 1913 rail plus multiple rail segments for slings, bipod, lasers, lights and other accessories. The Ballista's™ trigger system is fully adjustable for single-stage or two-stage release between 2 and 5 pounds. The 26" fluted barrel may be changed in less than two minutes and each barrel remains true to the receiver's centerline. The Ballista™ ambidextrous folding stock is fully adjustable for length-of-pull, buttplate height, comb height, cast-on and cast-off, and includes an integrated folding rear monopod. The detachable box magazine is fitted with caliber-specific interior assemblies to ensure reliable feeding under all conditions.

AUTOLOADING RIFLES

▶ AUTOLOADING SPEED— BOLT-ACTION ACCURACY

“As fast as an autoloader and as accurate as a bolt gun” is an apt description of the FN FNAR series of rifles. Inspired by the legendary BAR®, these self-loading rifles chambered in 7.62x51mm (308 Win.) bring a whole new meaning to “fast and accurate”. With a fully adjustable pistol grip stock and fluted hammer-forged barrel (in either a 16” standard or 20” heavy contour), the FN FNAR is quick to get and stay on target: shot to shot to shot. Looking for the “last word” in bolt-gun performance from a rifle that loads itself? Look no further than the synthetic stocked FNAR. This precision shooting instrument was designed from the ground up to deliver performance. Guaranteed. If you were to own but one self-loading 308 rifle, this should be it.

BOLT-ACTION ACCURACY IN AN AUTOLOADING RIFLE

The FN FNAR was introduced in 2008, originally conceived from the Browning BAR® system. This FN autoloading rifle boasts an enhanced receiver and operating system built to withstand more than 10,000 rounds. The FN FNAR provides the operator with a highly ergonomic platform, a bolt-action level of accuracy and outstanding reliability. The FN FNAR's hammer-forged barrel is chrome-lined for ease of cleaning and extended service life. Multiple MIL-STD 1913 rails allow mounting of optical or electronic sights, tactical lights or lasers as well as slings or bipods.

CARBINES

▶ MATCH-WINNING CARBINES FROM FN

Historically, "carbines" were little more than "cut-down" versions of their rifle counterparts, a compromise created to improve portability. FN has moved well beyond history and into the future, building carbines without compromise. FN offers two innovative and highly flexible bullpup designs that support different ballistic requirements. The easy-to-shoot FN PS90 (chambered in 5.7x28mm) is ideal for personal security and general sporting use, while the more powerful FN FS2000 (chambered in 5.56x45mm) represents the best in high performance bullpup carbines. The FN SCAR® series of carbines are proven performers both in the crucible of 3-gun competition and in U.S. military trials. The FN SCAR® embodies what every carbine should be: unfailingly reliable, light in weight, fast to shoulder, quick to target and capable of accuracy rivaled only by our own FN bolt-action rifles. The FN SCAR® is designed and built to adapt to the user, incorporating fully ambidextrous controls and a folding stock, adjustable for comb height and length-of-pull. Pick your SCAR® (the 16S in 5.56x45mm or the 17S in 7.62x51mm) and name the task. What ever the mission or game, your FN SCAR® will exceed your expectations on command, every time.

The FN SCAR® is the semi-auto only version of the newest service rifle of U.S. special operators. Light, fast-handling and quick shooting, the FN SCAR® 16S is chambered in 5.56x45mm NATO (223 Rem.) and features a free-floating, cold hammer-forged MIL-SPEC barrel with chrome-lined bore. The FN SCAR® 17S is chambered in 7.62x51mm NATO (308 Win.) and features a free-floating, cold hammer-forged MIL-SPEC barrel with chrome-lined bore. Fully-ambidextrous operating controls on both models instantly adapt to any shooter and any shooting position. The receiver-integrated MIL-STD 1913 optical rail and three accessory rails enable mounting scopes or electronic sights, plus tactical lights and lasers. The telescoping, side-folding polymer stock is fully adjustable for comb height and length-of-pull, and is available in Flat Dark Earth (FDE) or matte black.

LOCK AND LOAD THE MOST INNOVATIVE CARBINE EVER

The easy-to-shoot FN PS90 represents a flexible, compact bullpup carbine design that's ideal for personal security and sporting use. Chambered in the high-velocity 5.7x28mm cartridge, the FN PS90 utilizes a closed-bolt blowback operation and fixed barrel for greater accuracy and reliability. The FN PS90's 16" cold hammer-forged, chrome-lined MIL-SPEC barrel is equipped with an integrated muzzle brake to reduce recoil and comes with a 10 or 30-round polymer detachable magazine. The FN PS90's safety switch is located inside the trigger guard for easy access. Dual magazine latches, cocking handles and an innovative synthetic thumbhole stock with a molded-in sling attachment point help make the FN PS90 fully ambidextrous.

See page 149 for 5.7x28mm ammunition information.

THE BEST IN SEMI-AUTO BULLPUP PERFORMANCE

Chambered in 5.56x45mm NATO (223 Rem.), the FN FS2000 is a semi-auto only variant of the proven FN F2000 selective-fire bullpup carbines. It is gas-operated, uses a rotating bolt lock-up for reliability and greater accuracy and has a 17.44" cold hammer-forged, chrome-lined MIL-SPEC barrel and muzzle brake. Fired cases are ejected through a forward port away from the operator. The FN FS2000 Tactical offers an integrated MIL-STD 1913 top-mounting rail and emergency backup folding sights and is available with 10 or 30-round Detachable Box Magazines (DBM). The polymer stock is fully-ambidextrous. An accessory fore-end is also available that provides three MIL-STD 1913 forward mounting rails.

5.7x28MM AMMUNITION

ISO 9001
QUALITY

× FEDERAL CARTRIDGE COMPANY IS THE LICENSED DISTRIBUTOR OF **SS197SR AMMUNITION** IN THE U.S. FOR FNH USA.

× **DUMMY AMMUNITION**

× **SS195LF AMMUNITION**

Cross-section of the unrestricted SS195LF round. The hollow point jacket contains a lead free metal core. The primer compound is also lead free, making this round ideal for any location where lead contamination is to be avoided.

THE NEW BENCHMARK IN AMMUNITION PERFORMANCE

Fully compatible with the FN Five-seveN® pistol and FN PS90 carbine, the 5.7x28mm cartridge has been specifically tailored to excel in several sport shooting roles. The SS195LF Lead Free cartridge is ideal for any situation where lead contamination must be minimized. The SS197SR Sporting round features a polymer tip jacketed bullet and is distributed in the USA by Federal Cartridge Company. 5.7x28mm Dummy rounds for training are also available.

FN COMPETITION

TURN UP THE HEAT!

There are two great proving grounds for firearms—the heat of battle and the heat of competition. FN's legendary battlefield performance needs no further introduction. Today FNH USA leads the field with pistols, shotguns, rifles and carbines that are optimized for virtually any competition format from run-and-gun practical matches to high precision long-range target events. FN firearms are proven in the uncompromising crucible of elite competition. When you bring your FN to the firing line, you're bringing some serious heat to the competition.

FNH USA continues its sponsorship of competitive shooting with "FNH USA 3-Gun Nation" that airs weekly on the Versus Channel (NBC Sports). The show takes you around the United States on the 3-gun practical shooting circuit as competitors face some of the most difficult stages of fire found anywhere in the shooting sports.

Shooters accumulate points during the 3-Gun Nation series. In 2011, the top eight shooters were determined during the Veteran's Day 3-Gun Championship; those eight shooters will square off to determine the overall 3-Gun Champion in a televised finale on January 18, 2012 during SHOT Show.

COMPETITION »

FROM THE FIRING LINE

Serious marksmen know that competitive shooting demands the utmost in skill, mental focus and a lifelong dedication to personal excellence. It also requires top-level accuracy and absolute reliability from every item of the shooter's equipment. Like auto racing, competitive shooting provides a proving ground for new ideas and new technologies.

CORPORATE SUPPORT

Corporate support for the shooting sports is important to help recognize competitive excellence, build the sport and bring new participants into organized programs around the country. Programs like these are key to improving shooting skills as well as promoting the safe and responsible ownership and use of firearms. FNH USA is proud to be involved in supporting marksmanship at the highest levels of national competition.

DOMINATING 3-GUN COMPETITION WITH FIREARMS FROM FNH USA

3-gun practical shooting competition is quickly becoming one of the most popular shooting sports in America, and FNH USA is the ONLY company that makes guns that are ideal for all three stages: pistol (FNS), rifle (SCAR®) and shotgun (SLP). Absolute reliability, smooth handling and pin-point accuracy are critical to success in practical shooting. FN firearms give you absolute confidence that your equipment is going to perform when you step to the firing line. FN firearms are made to help you win.

SUPPORTING SHOOTING SPORTS

FNH USA has a long tradition of offering corporate support to many dedicated organizations and worthy causes related to the shooting sports. Along with numerous other corporate and organizational partners, FNH USA is proud to do its part to help build the shooting sports and to give back to those who have given the most in support of freedom.

FNH USA participated in the 2011 Shooting Industry Master's Tournament. The industry-wide event raised more than \$32,000 for the NSSF First Shots program to promote the shooting sports to newcomers.

When it comes to supporting the shooting sports, FNH USA leads the way!

FNH USA IS PROUD TO WORK WITH THESE COMPANIES, ORGANIZATIONS AND CHARITABLE PROGRAMS:

COMPETITION SHOTGUNS »

SC 1 OVER/UNDER

PERFORMANCE, STYLE AND TRADITION

The FN SC 1 Over/Under Shotgun is competition ready, right out of the box; designed with features that make it a contender across the entire array of competitive shotgun sports. Adjustable for comb height, cast, and length-of-pull and topped with a 10mm wide ventilated rib and fiber-optic front sight with brass mid-bead, the FN SC 1 O/U provides the ultimate sighting plane for flying targets. The 28" or 30" barrels are light weight and are back-bored and ported for ballistic performance and low recoil providing the perfect balance of speed and maneuverability.

✕ THE FN SC 1 OVER/UNDER SHOTGUN FEATURES 28" OR 30" PORTED BARRELS WITH A FIBER-OPTIC FRONT SIGHT, AND A BLUE/GRAY LAMINATED STOCK WITH ADJUSTABLE COMB.

SLP/SLP MK I COMPETITION

THE **FN SLP COMPETITION SHOTGUN** FEATURES A BLUE HARD-ANODIZED RECEIVER, 8+1 CAPACITY, 24" BACK-BORED VENT-RIB BARREL WITH FLIP-UP REAR SIGHT, FIBER-OPTIC FRONT SIGHT AND INTERCHANGEABLE INVECTOR-PLUS™ CHOKE TUBES MAKING IT IDEAL FOR 3-GUN PRACTICAL COMPETITION. THE FLIP-UP REAR SIGHT ENABLES PRECISE ENGAGEMENT WITH SLUGS AT FURTHER DISTANCES.

ENGINEERED TO WIN

With legendary reliability and enhanced features ideal for practical shotgun sports, the FN SLP and SLP MK I Competition shotguns are engineered to win. Holding the enviable reputation as the world's fastest cycling shotgun, both models offer 3" chambers, extended magazine tubes, and interchangeable choke tubes.

THE **FN SLP MK I COMPETITION SHOTGUN** FEATURES A BLUE HARD-ANODIZED RECEIVER, 8+1 CAPACITY, 22" CANTILEVER SCOPE BASE, ADJUSTABLE REAR SIGHT, FIBER-OPTIC FRONT SIGHT AND INTERCHANGEABLE STANDARD INVECTOR™ CHOKE TUBES FOR TRUE PERFORMANCE ON THE FIRING LINE.

FNS

WHEN IT IS ALL ON THE LINE

What do you get from five years of development and more than 400,000 rounds of testing? Reliability, accuracy and speed: all driving factors for what you need to win. The FN FNS has been tested in every type of major shooting event, from high speed IPSC/USPSA and grueling 3-gun matches to precision bulls-eye and action events like the NRA Bianchi Cup. Match after match the FNS has shown that the years of testing has paid off. If you are looking for the edge in your next competition then search no more.

SCAR® 16S

ISO 9001
QUALITY

WHEN YOU'RE READY FOR THE BIG LEAGUES

The FN SCAR® 16S is the semi-auto only version of the newest service rifle of U.S. special operators. Light, fast-handling and quick shooting, the FN SCAR® 16S is chambered in 5.56x45mm NATO (223 Rem.) and features a free-floating, cold hammer-forged MIL-SPEC barrel with chrome-lined bore. Fully-ambidextrous operating controls instantly adapt to any shooter and any shooting position. The receiver-integrated MIL-STD 1913 optical rail and three accessory rails enable mounting scopes or electronic sights, plus tactical lights and lasers. The side-folding polymer stock is fully adjustable for comb height and length-of-pull, and is available in authentic Flat Dark Earth (FDE) or matte black.

FN products are manufactured in the U.S. by FN Manufacturing, LLC., Columbia, SC, and in Belgium by FN Herstal S.A. Its corporate mission is to expand its global leadership position in defense, law enforcement and commercial markets by delivering superior products and the finest in training and logistical support. This catalog represents FN's product offerings for military, law enforcement and commercial markets. Photos of U.S. military personnel are used courtesy of the U.S. Department of Defense.

Every reasonable effort has been made to ensure that all product photographs, descriptions and specifications in this catalog are accurate. However, inadvertent errors may occur, and changes in design or materials, due to our continual effort to improve products, may result in some changes in specifications before subsequent publications are issued. FN Herstal S.A. reserves the right to modify or change specifications without notice. Some FN products shown in action photos in this catalog may be equipped with user-supplied, optional accessories. If you have any questions regarding FN products, please visit www.fnhusa.com or contact us directly.
