CHRONOMETRE A RESONANCE

USER MANUAL

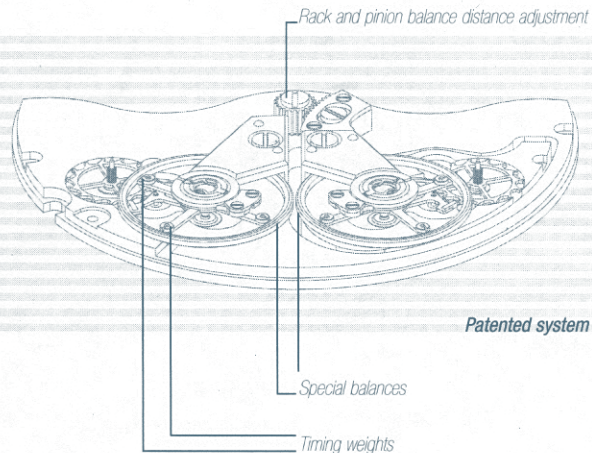

*The only wristwatch
in the world based on resonance,
a natural physical phenomenon!*

A unique design based
on an exclusive mechanism

F.P. JOURNE
Invenit et Fecit

*A unique design based
on an exclusive mechanism
F.P.JOURNE "Invenit et Fecit"*

Characteristics:

The **Chronomètre à Résonance** has two exclusive four-arm balances fitted with timing weights for fast/slow adjustment. They have been adjusted in our workshops to beat with a frequency of 21 600 alt/hour.

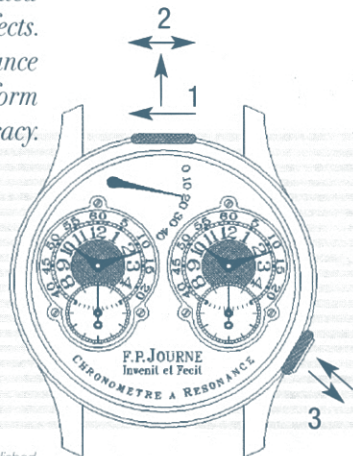

The two balances are synchronised by means of the resonance effect and naturally beat alternately.

The negative effects of wrist and body movements are thus considerably reduced.

The resonance point is obtained through precise adjustment of the difference in motion of the right balance in relation to the left balance. This is adjusted by means of the rack and pinion.

This careful adjustment is done exclusively in our workshops and should never be done by anyone else!

Resonance is a natural physical phenomenon reputed to have perturbing effects. In this case, the resonance effect is controlled to perform maximum accuracy.

Twin engine-turned and polished dials in silver, each showing hours, minutes and synchronized seconds, held by bezels of polished steel screwed on an 18k gold face-plate.*

Patented system

Position 1: winding
Position 2: time setting
3: Time signal

1. Winding

Turn the crown until it can turn no further.

To guarantee an optimum resonance effect, it is recommended to rewind the **Chronomètre à Résonance** within 30 hours from the last winding when the amplitude decreases naturally. The **Chronomètre à Résonance** has a total power reserve of 40 hours.

As in antique marine chronometers, the power reserve indicator shows the number of hours elapsed since the watch was last wound.

2. Time setting

Pull the crown out one notch and turn it to the left to adjust the hands on the left dial or to the right to set the hands on the right dial. The hands can only move clockwise.

3. Time signal

- Pull the crown out one notch and both seconde hands will be reset to sixty simultaneously.
- Push the crown back towards the case.

Maintenance:

Your wristwatch should be thoroughly cleaned once every three years!

Important:

Keep carefully the original warranty card supplied with the wristwatch. Your retailers will need this identity card for any after sales servicing.

For all maintenance or repair, your wristwatch must be entrusted to an appointed **F.P.JOURNE "Invenit et Fecit"** agent.

Guarantee:

Your **F.P.JOURNE "Invenit et Fecit"** wristwatch is guaranteed against any manufacturing defects for a period of 12 months from the date of purchase written on the back of the warranty card.

This guarantee is only valid on presentation of the original warranty card, duly completed by the retailer (serial number, purchase date, retailer's stamp).

The guarantee does not include defects or wear resulting from abnormal use of the product or bad treatment (accidents, shocks, modifications...).
