## FடபKㅌ

# Model 187 \& 189 

True RMS Multimeter

## Getting Started

## LIFETIME LIMITED WARRANTY

Each Fluke 20, 70, and 180 Series DMM purchased after October 1, 1996 will be free from defects in material and workmanship for its lifetime. This warranty does not cover fuses, disposable batteries and damage from neglect, misuse, contamination, alteration, accident or abnormal conditions of operation or handling, including overvoltage failures caused by use outside the DMMs specified rating, or normal wear and tear of mechanical components. This warranty covers the original purchaser only and is not transferable.

For ten years from the date of purchase, this warranty also covers the LCD. Thereafter, for the lifetime of the DMM, Fluke will replace the LCD for a fee based on then current component acquisition costs.

To establish original ownership and prove date of purchase, please complete and return the registration card accompanying the product. Fluke will, at its option, repair at no charge, replace, or refund the purchase price of a defective product purchased through a Fluke authorized sales outlet and at the applicable international price. Fluke reserves the right to charge for importation costs of repair/replacement parts if product purchased in one country is sent for repair elsewhere.

If product is defective, contact your nearest Fluke authorized service center to obtain return authorization information, then send the product to that service center, with a description of the difficulty, postage and insurance prepaid (FOB Destination). Fluke assumes no risk for dam age in transit. Fluke will pay return transportation for product repaired or replaced in-warranty. Before making any non-warranty repair, Fluke will estimate cost and obtain authorization, then invoice you for repair and return transportation.
THIS WARRANTY IS YOUR ONLY REMEDY. NO OTHER WARRANTIES, SUCH AS FITNESS FOR A PARTICULAR PURPOSE, ARE EXPRESSED OR IMPLIED. FLUKE SHALL NOT BE LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSSES, INCLUDING LOSS OF DATA, ARISING FROM ANY CAUSE OR THEORY. AUTHORIZED RESELLERS ARE NOT AUTHORIZED TO EXTEND ANY DIFFERENT WARRANTY ON FLUKE'S BEHALF. Since some states do not allow the exclusion or limitation of an implied warranty or of incidental or consequential damages, this limitation of liability may not apply to you. If any provision of this warranty is held invalid or unenforceable by a court or other decision-maker of competent jurisdiction, such holding will not affect the validity or enforceability of any other provision.

## True RMS Multimeter

## Introduction

This Getting Started Manual provides basic information on Models 187 and 189. Refer to the Users Manual on the accompanying CD-ROM for complete operating instructions.

## Contacting Fluke

To order accessories, receive assistance, or locate the nearest Fluke distributor or Service Center, call:

## Safety Information

The Fluke Model 187 and Model 189 True RMS Multimeters (hereafter referred to as the "meter") comply with:

- EN61010.1:1993
- ANSI/ISA S82.01-1994
- CAN/CSA C22.2 No. 1010.1-92
- 1000 V Overvoltage Category III, Pollution Degree 2
- 600V Overvoltage Category IV, Pollution Degree 2
- UL 3111-1

Use the meter only as specified in the Users Manual.
Otherwise, the protection provided by the meter may be impaired.

A Warning identifies conditions and actions that pose hazards to the user. A Caution identifies conditions and actions that may damage the meter or the equipment under test.

## Safety Information

## $\triangle$ Warning

To avoid possible electric shock or personal injury, follow these guidelines:

- Do not use the meter if it is damaged. Before you use the meter, inspect the case. Look for cracks or missing plastic. Pay particular attention to the insulation surrounding the connectors.
- Inspect the test leads for damaged insulation or exposed metal. Check the test leads for continuity. Replace damaged test leads before you use the meter.
- If this product is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.
- Do not use the meter if it operates abnormally. Protection may be impaired. When in doubt, have the meter serviced.
- Do not operate the meter around explosive gas, vapor, or dust.
- Do not apply more than the rated voltage, as marked on the meter, between terminals or between any terminal and earth ground.
- Before use, verify the meter's operation by measuring a known voltage.
- When measuring current, turn off circuit power before connecting the meter in the circuit. Remember to place the meter in series with the circuit.
- When servicing the meter, use only specified replacement parts.
- Use caution when working above 30 V ac rms, 42 V peak, or 60 V dc. Such voltages pose a shock hazard.
- Avoid working alone.

## Safety Information (cont.)

## $\triangle$ Warning

- When using the probes, keep your fingers behind the finger guards on the probes.
- Connect the common test lead before you connect the live test lead. When you disconnect test leads, disconnect the live test lead first.
- Remove test leads from the meter before you open the battery door.
- Do not operate the meter with the battery door or portions of the cover removed or loosened.
- To avoid false readings, which could lead to possible electric shock or personal injury, replace the batteries as soon as the low battery indicator ( $\dagger \mathbf{+}$ ) appears.
- Use only type AA batteries, properly installed in the meter case, to power the meter.
- To avoid the potential for fire or electrical shock, do not connect the thermocouples to electrically live circuits.

## Caution

To avoid possible damage to the meter or to the equipment under test, follow these guidelines:

- Disconnect circuit power and discharge all high-voltage capacitors before testing resistance, continuity, diodes, or capacitance.
- Use the proper terminals, function, and range for your measurements.
- Before measuring current, check the meter's fuses and turn power OFF to the circuit before connecting the meter to the circuit.

## Rotary Switch

Turn the meter on by selecting any measurement function (identified with white letters around the rotary switch). The meter presents a standard display for that function (range, measurement units, modifiers, etc.) The display may also be influenced by some of the choices made in Setup.
Use the blue button to select any rotary switch alternate function (labeled in blue letters). You can also use other buttons to choose modifiers for the selected function.

When you turn the rotary switch from one function to another, a display for the new function appears. Button choices made in one function do not carry over into another function.
With Model 189, a VIEW MEM switch position is available.
Each position is described in Table 1.

## Pushbuttons

The buttons activate features that augment the function selected with the rotary switch. The buttons are described in Table 2.

Use the blue button ( $\bigcirc$ ) to access functions labeled in blue for some of the rotary switch positions. Table 1 defines all blue button functions.

Use the yellow button $\qquad$ ) followed by other buttons to access additional features. These features appear in yellow above the appropriate keys. Table 2 defines yellow button features. This manual identifies the yellow button feature in parentheses following the button sequence . For example, activating the FAST MN MX mode appears as $\qquad$ min max (FAST MN MX).

The following yellow button features are not available on Model 187: (YES), (NO), (LOGGING), and (SAVE).

Table 1. Rotary Switch Selections

| Position | Rotary Switch Function | Blue Key Function |
| :---: | :---: | :---: |
| ${ }_{\text {dв }} \tilde{\mathbf{V}}$ | AC voltage measurement from 0 V to 1000.0 V | $d B$ over $A C, A C$ over dB |
| ${ }_{\mathrm{dB}} \tilde{\mathbf{m V}}$ | AC millivolt measurement from 0 mV to 3000.0 mV | dB over $A C, A C$ over dB |
| ${ }_{\text {actdc }} \overline{\overline{\mathbf{V}}}$ | DC voltage measurement from 0 V to 1000.0 V | AC over DC (AC in primary display, DC in secondary display), DC over AC, ac+dc |
| $\text { ac+dc } \overline{\mathrm{mV}}$ | DC millivolt measurement from 0 mV to 3000.0 mV | AC over DC (AC in primary display, DC in secondary display), DC over AC, ac+dc |
| $\begin{gathered} \text { nS } \\ \text { inlil) } \\ \Omega \end{gathered}$ | Resistance measurement from $0 \Omega$ to $500.0 \mathrm{M} \Omega$ | Continuity test <br> Conductance measurement from 0 nS to 50.00 nS |
| $\begin{aligned} & \vec{\rightarrow} \\ & -1 \end{aligned}$ | Capacitance measurement from 0.001 nF to 50 mF | Diode test |
| ${ }^{\circ} \mathrm{C}$ | Temperature measurement | Toggles between ${ }^{\circ} \mathrm{C}$ and ${ }^{\circ} \mathrm{F}$. |

Table 1. Rotary Switch Selections (cont.)

| Position | Rotary Switch Function | $\bigcirc$ Blue Key Function |
| :---: | :---: | :---: |
| $\stackrel{A}{\mathrm{~mA}}$ | AC current measurements from 0 mA to 20.000 A | none |
| $\mu \mathrm{A} \sim$ | AC current measurements from $0 \mu \mathrm{~A}$ to $5000.0 \mu \mathrm{~A}$ | none |
| $\max _{\mathrm{ac}+\mathrm{dc}}^{\mathrm{A}} \bar{\sim}$ | DC current measurements from 0 mA to 20.000 A | AC over DC (AC in primary display, DC in secondary display), DC over AC, ac+dc |
| $\underset{\mathrm{ac}+\mathrm{dc}}{\mu \mathbf{A}}=$ | DC current measurements from $0 \mu \mathrm{~A}$ to $5000.0 \mu \mathrm{~A}$ | AC over DC (AC in primary display, DC in secondary display), DC over AC, ac+dc |
| VIEW MEM | (Model 189 only.) Access data held in the meter's memory. | CLEAR MEM. |

Table 2. Pushbuttons

| Button | Description | Yellow Button Function | Description |
| :---: | :---: | :---: | :---: |
| Press $\square$ to access "Yellow Button Functions." The $\square$ box and the 24-hour clock appear in the lower corners of the display and the primary display freezes, allowing time to press a second button. |  |  |  |
| $\stackrel{i}{\circ}$ | Press to turn backlight on or off. Also, in Setup, use the arrow function $(\triangleleft)$ to select the previous digit or item in a list. | SETUP $\square$ (o) | Press to access Setup selections. Press to store a Setup selection and proceed to the next selection. |
| HOLD | Press to freeze the displayed value. Press again to release the display. | AutoHOLD $\square$ HOLD | Press to begin AutoHOLD; the last stable reading is displayed. |
| min max | Press to start retaining min, max, and average values. Press successively to display max, min, and average values. Press $\square$ $\mathrm{H}_{2} \% \mathrm{~ms}$ (CANCEL) to stop. | FAST MN MX $\square$ MIN MAX | Press to start FAST MN MX mode, where min and max values for short duration events are stored. |
| REL $\triangle$ | Press to store the present reading as an offset reference; subsequent readings show only the relative difference from this value. Press again to show the difference as a percentage of the reference. |  | Press to start and stop Logging (Model 189). Press $\square$ $+\mathrm{Hz}_{\mathrm{Hz} \text { ms }}$ (CANCEL) to stop. |

Table 2. Pushbuttons (cont.)

| Button | Description | Yellow Button Function | Description |
| :---: | :---: | :---: | :---: |
| $\triangle \pi$ | - In Setup, increment a digit . <br> - In counter functions, select positive pulse slope. <br> - In ohms continuity, select beep on open. <br> - For VIEW MEM (Model 189), refer to Chapter 4 of the Users Manual. | (none) |  |
| $\nabla v$ | - In Setup, decrement a digit . <br> - In counter functions, select negative pulse slope. <br> - In ohms continuity, select beep on short. <br> - For VIEW MEM (Model 189), refer to Chapter 4 of the Users Manual. | (none) |  |
| RANGE | Exit AUTO and enter MANUAL ranging. In MANUAL, select next input range. Press $\square$ $\mathrm{Hz} \% \mathrm{~ms}$ (CANCEL) to return to AUTO. |  | Press to save present reading (Model 189) |
| Hz \% ms | Successively press for frequency, duty cycle, and pulse width. | CANCEL $\square$ $\mathrm{Hz} \% \mathrm{~ms}$ | CANCEL any $\bigcirc$ (blue key) function and all other button features. |
| $\begin{aligned} & \bigcirc \\ & D \end{aligned}$ | The blue button. Press to access blue functions on the rotary switch. In Setup, use arrow function ( $D$ ) to select the next digit or item in a list. | (none) |  |

## Understanding the Display

Display features are shown in Figure 1 and described in Table 3. Major display features are described in the Users Manual.

## Note

You can show all display segments (as shown in Figure 1) by pressing HoLD while turning the meter on. Release HoLD to turn off the full display.

Figure 1. Display Features

Table 3. Display Features

| Number | Feature | Description |
| :---: | :---: | :---: |
| (1) | '11) | Continuity test function is selected. |
| (2) |  | Bar Graph. <br> In normal operation 0 (zero) is on the left. In Relative \%, 0 is in the center, negative values are to the left and positive to the right. <br> The polarity indicator left of the bar graph shows the polarity of the input. Both polarity indicators appear in REL\% mode. <br> The arrow right of the bar graph indicates an overload condition. <br> Both arrows appear (without bar graph) when you can use $\bigcirc(\checkmark)$ and $\bigcirc(\nabla)$ to select settings in the setup mode. |
| (3) | \% | Percent difference in Relative mode is being displayed in the primary display. The reference value is shown in the secondary display |
| (4) | $\Delta$ | Relative ( $\operatorname{REL} \Delta$ ) mode is active. The primary display has been modified by the reference value shown in the secondary display. |
| (5) | $\square$ | Indicates negative readings. In Relative mode, this sign indicates that the present input is less than the stored reference. |
| (6) | 4 | $>30 \mathrm{~V}$ ac and/or dc may be present at the input terminals. |
| (7) | $\pm$ | Low battery. If flashing, battery failure is imminent, and logging and backlight are disabled. <br> $\triangle$ Warning <br> To avoid false readings, which could lead to possible electric shock or personal injury, replace the battery as soon as the low battery indicator appears. |

Table 3. Display Features (cont.)

| Number | Feature | Description |
| :---: | :---: | :---: |
| (8) | FAST <br> MIN <br> MAX <br> AVG | FAST MN MX mode is enabled. ( $\square$ MIN MAX) <br> Minimum reading displayed. <br> Maximum reading displayed. <br> Average reading displayed. |
| (9) | LOG | Readings are being recorded in memory (Model 189 only.) ( $\square+$ REL $\Delta$ ) |
| (10) | HOLD | The meter is in Hold mode. (HOLD) |
| (11) | HOLD | AutoHOLD is active. ( $\square+$ HOLD) |
| (12) | $\begin{gathered} \text { B.B.B.B.B } \\ \text { EL } \end{gathered}$ | Primary Display (4-1/2 digit) |
|  |  | Overload input. |
| (13) | $\begin{aligned} & \mathrm{V}, \mathrm{mV} \\ & \mathrm{dBm}, \mathrm{dBV} \end{aligned}$ | Measurement Units |
|  |  | V: Volts. The unit of voltage. mV : Millivolt. $1 \times 10^{-3}$ or 0.001 volts. |
|  |  | For ac volts functions, reading is shown in decibels of power above or below 1 mW (dBm) or decibels of voltage above or below $1 \mathrm{~V}(\mathrm{dBV})$. |

Table 3. Display Features (cont.)

| Number | Feature | Description |
| :---: | :---: | :---: |
| (13) | $\begin{aligned} & A C+D C \\ & \Omega, k \Omega M \Omega \end{aligned}$ | For dc volts and dc amps functions, reading represents the rms total of ac and dc measurements. |
|  |  | $\Omega$ : Ohm. The unit of resistance. <br> $\mathrm{k} \Omega$ : Kilohm. $1 \times 10^{3}$ or 1000 ohms. <br> $\mathrm{M} \Omega$ : Megohm. $1 \times 10^{6}$ or $1,000,000$ ohms. |
|  | nS$\mathrm{nF}, \mu \mathrm{~F}, \mathrm{mF}$ | S : Siemens. The unit of conductance. <br> nS: Nanosiemens. $1 \times 10^{-9}$ or 0.000000001 Siemens. |
|  |  | F: Farad. The unit of capacitance. <br> nF: Nanofarad. $1 \times 10^{-9}$ or 0.000000001 farads. <br> $\mu \mathrm{F}$ : Microfarad. $1 \times 10^{-6}$ or 0.000001 farads. <br> mF : Millifarad. $1 \times 10^{-3}$ or 0.001 farads. |
|  | $\begin{aligned} & { }^{\circ} \mathbf{C},{ }^{\circ} \mathrm{F} \\ & \mathrm{~A}, \mathrm{~mA}, \mu \mathrm{~A} \\ & \mathrm{~Hz}, \mathrm{kHz}, \mathrm{MHz} \end{aligned}$ | Degrees Celsius (default) or Fahrenheit |
|  |  | A: Amperes (amps). The unit of current. mA : Milliamp. $1 \times 10^{-3}$ or 0.001 amperes. $\mu \mathrm{A}$ : Microamp. $1 \times 10^{-6}$ or 0.000001 amperes. |
|  |  | Hz : Hertz. The unit of frequency. <br> kHz : Kilohertz. $1 \times 10^{3}$ or 1000 hertz. <br> MHz : Megahertz. $1 \times 10^{6}$ or $1,000,000$ hertz. |

Table 3．Display Features（cont．）

| Number | Feature | Description |
| :---: | :---: | :---: |
| （14） | $\begin{array}{ll} \hline 51000 \\ \text { AUTO MANUAL } \end{array}$ | Range．Digits display range in use． |
| （15） | ©̀m8日： 8 日 <br>  | Time Display．Used with HOLD，AutoHOLD，MIN MAX，FAST MN MX，（SAVE，and LOGGING Model 189）． <br> Elapsed Time Display（ $\bar{\Theta}$ on）：shown in minutes：seconds to maximum of 59：59－used if time since Min，Max，or Logging started is less than 60 minutes．Always used for Min， Max，Avg．Displays hours：minutes after 1 hour． <br> 24－hour Display（ $\bar{\Theta}$ off）：shown in hours：minutes to maximum of 23：59． |
| （16） |  | Secondary Display |
| （17） | MEM <br> 188日 | Memory Index Display（Model 189）．Also used for dBm reference resistance． <br> appears when you can use $\square$ $\Delta \pi$ and $\square$ $\nabla$ u to increment or decrement settings． |

## Setup Selections

The meter allows you to change the default operating configuration of the meter by changing setup options made at the factory. Many of these setup options affect general meter operations and are active in all functions. Others are limited to one function or group of functions. To enter the Setup mode, turn the meter on and press
$\qquad$ ©) (SETUP). In the Setup mode, each press of (\%). (SETUP) saves changes to the last selection and steps to the next option.

Each setup option appears in the primary display in the sequence shown in Tables 4 and 5 .

The options in Table 4 are available only when the preconditions are met. The options in Table 5 are available for all functions. (When measuring dc volts, none of the preconditions in Table 4 are required, and only the selections shown in Table 5 will appear.)
To exit the Setup mode, Press $\qquad$ $\mathrm{Hz} \% \mathrm{~ms}$ (CANCEL). Be sure to save your last selection by pressing $\qquad$ ( first.

Table 4. Function Specific Setup Selections

| Selection | Precondition | Option | Choices ( $\langle\downarrow$ ) | Factory Default |
| :---: | :---: | :---: | :---: | :---: |
| $\begin{array}{ll} \hline 000.0 \text { of } \\ \text { or } & \\ 000.0 \text { of } \end{array}$ | $\begin{aligned} & \text { Temperature }\left({ }^{\circ} \mathrm{C}{ }^{\circ}\right) \\ & \text { selected. } \end{aligned}$ | Temperature offset adjust | $000.0^{\circ}$ to $\pm 100.0^{\circ}$ ( $\left.180.0^{\circ} \mathrm{F}\right)$ - Use $\stackrel{\Delta}{\boldsymbol{\nabla}}$ to increment or decrement digit. <br> Use $4 \boldsymbol{\rightharpoonup}$ to select digit. Selected digit flashes. | 800.0 ${ }^{\circ}$ ( ${ }^{\circ}{ }^{\circ}$ ) |
| L Int | Model 189 only. | Log interval | MM:SS - Use $\boldsymbol{\rightharpoonup}$ to increment or decrement minute or second values. <br> Use $4>$ to select minute or seconds. Selected values flash. | 15:00 |
| dbref | AC volts (ав $\widetilde{v}$ or ${ }_{\mathrm{dB}} \mathrm{mv}$ ) selected. | dB type | dBm or dBV (m or V flashing) - Use $\downarrow \downarrow$ to select. | dBV |
| dbref | AC volts (ав $\mathbb{V}$ or ${ }_{\mathrm{aB}} \mathbf{m V}$ ) and dBm selected. | dBm reference | $0001 \Omega$ to $1999 \Omega$ - Use $\mathbf{\Delta}$ to increment or decrement digit. <br> Use $\boldsymbol{\rightharpoonup} \downarrow$ to select digit. | $0600 \Omega$ |

Table 5．Common Setup Selections

| Selection | Option | Choices | Factory Default |
| :---: | :---: | :---: | :---: |
| bEEP | Beeper | YES or no（flashing）Use 4 to select． | YES |
| 時日 | Display digits |  | 咟时 |
| bloff | Backlight time out | MM：SS－Use $\boldsymbol{\rightharpoonup} \boldsymbol{\nabla}$ to increment or decrement minute or second values． <br> Use $\downarrow$ to select minutes or seconds．Selected values flash．Setting value to 00：00 disables timeout． | 15：00 |
| Proff | Power off time out | HH：MM－Use $\boldsymbol{\rightharpoonup}$ to increment or decrement hour or minute values． <br> Use $\downarrow$ to select hours or minutes．Selected values flash． | 00：15 |
| Hour | 24－hour clock | HH：MM－Use $\boldsymbol{\rightharpoonup}$ to increment or decrement hour or minute values． <br> Use $\downarrow$ to select hours or minutes．Selected values flash． | 00：00 |
| 50－60 | Line／Main frequency | 60 or 50 （flashing）－Use 4 to select． | 60 |
| foty | Restore factory defaults | YES or no（flashing）－Use $\downarrow$ to select． | no |

## Parts

Replacement parts are listed in Table 6. These parts can be ordered by contacting Fluke. Refer to the Users Manual for a complete list of user-replaceable parts.

Table 6. Parts

| Description | Reference Designators | Part Number | Qty |
| :---: | :---: | :---: | :---: |
| Access Door, Battery / Fuse | MP14 | 666446 | 1 |
| Tilt-Stand | MP8 | 659026 | 1 |
| Accessory Mount | MP9 | 658424 | 1 |
| $\triangle$ Fuse, $0.44 \mathrm{~A}(44 / 100 \mathrm{~A}, 440 \mathrm{~mA}), 1000 \mathrm{~V}$, FAST | F1 | 943121 | 1 |
| $\triangle$ Fuse, $11 \mathrm{~A}, 1000 \mathrm{~V}$ FAST | F2 | 803293 | 1 |
| Battery, 1.5 V, 0-15 mA, AA Alkaline | H8, H9, H10, H11 | 376756 | 4 |
| Fasteners, Battery / Fuse Access Door | H12, H13 | 948609 | 2 |
| Screws, Phillip-Head | H4, H5, H6, H7 | 832246 | 4 |
| AC70A Alligator Clip (Black) | MP38 | 738047 | 1 |
| AC70A Alligator Clip (Red) | MP39 | 738120 | 1 |
| TL71 Right-Angle Test Lead Set | MP34 | 802980 | 1 |
| Getting Started Manual | (TM1-TM5) | (see footnote) | 5 |
| CD-ROM (Contains Users Manual) | (TM6) | 1576992 | 1 |

Getting Started Manual PNs: English=1547486; French, German, Italian, Dutch=1555282; Danish, Finnish, Norwegian,

## Safety and Compliances

| Maximum voltage between any terminal and earth ground. | 1000 V dc or rms ac |
| :---: | :---: |
| Compliances - DUAL RATINGS | Complies with IEC 1010-1 to 1000 V Overvoltage Category III, Pollution Degree 2; and IEC 664-1 to 600 V Overvoltage Category IV, Pollution Degree 2 * |
| Certifications (listed and pending) | CSA per standard CSA/CAN C22.2 No. 1010.1-92 UL per standard UL 3111 <br> TÜV per standard EN 61010 Part 1-1993 |
| Surge Protection | 8 kV peak per IEC 1010.1-92 |
| $\triangle$ Fuse Protection for $m A$ or $\mu \mathrm{A}$ inputs $\triangle$ Fuse Protection for A input | 0.44 A (44/100 A, 440 mA ), 1000 V FAST Fuse 11 A, 1000 V FAST Fuse |
| Markings | C $\epsilon$, ¢® ${ }_{\text {® }}$, UL, and TÜV |
| * OVERVOLTAGE (Installation) Categories refer to the level of Impulse Withstand Voltage protection provided at the specified Pollution Degree. <br> - Overvoltage Category III equipment is equipment in fixed installations. Examples include switch gear and polyphase motors. <br> - Overvoltage Category IV equipment is equipment for use at the origin of the installation. Examples include electricity meter and primary over-current protection equipment. |  |

Feature Summary

| Feature | Description |
| :--- | :--- |
| Dual Digital Displays | Primary: 50,000 counts <br> Secondary: 5,000 count <br> Bar graph: 51 segments, updates 40 times/second |
| Analog Bar Graph | Bright white backlight for clear readings in poorly lighted areas |
| Facklight with 2 brightness levels | Meter automatically selects best range - instantly |
| AC+DC true rms, ac rms specified to 100 kHz | Choices for AC only, AC and DC dual display, or AC+DC readings |
| dBm, dBV | User selectable impedance references for dBm |
| AutoHOLD | Holds readings on display |
| Continuity / Open test | Beeper sounds for resistance readings below threshold, or to indicate <br> a momentary open circuit |
| Fast Bar Graph | 51 segments for peaking and nulling |
| Duty cycle / Pulse width | Measure signed on or off time in \% or milliseconds. |
| MIN MAX Mode | Record maximum, minimum, and average values. <br> 24-hour clock for MAX or MIN, elapsed time for AVG. <br> FAST MN MX captures peaks to 250 $\mu$ sec. |
| FAST MN MX with 24-hour time stamp | No internal adjustments needed |
| Closed-Case Calibration | Battery or fuse replaceable without voiding calibration |
| Battery / Fuse Access Door | Protective holster features |
| Hi-Impact Overmolded Case |  |

## Physical Specifications

| Display (LCD) | Digital: 50000/5000 counts primary display, 5000 counts secondary display; updates $4 /$ second. <br> Analog: 51 segments, updates 40/second. |
| :---: | :---: |
| Operating Temperature | $-20^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$ |
| Storage Temperature | $-40^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ |
| Temperature Coefficient | $0.05 \times$ (specified accuracy) $/{ }^{\circ} \mathrm{C}\left(<18{ }^{\circ} \mathrm{C}\right.$ or $\left.>28^{\circ} \mathrm{C}\right)$ |
| Relative Humidity | $\begin{aligned} & 0 \% \text { to } 90 \%\left(0^{\circ} \mathrm{C} \text { to } 35^{\circ} \mathrm{C}\right) \\ & 0 \% \text { to } 70 \%\left(35^{\circ} \mathrm{C} \text { to } 55^{\circ} \mathrm{C}\right) \end{aligned}$ |
| Altitude | Operating: $0-2000$ meters per EN61010 CAT III, 1000 V; CAT IV, 600 V <br>  $0-3000$ meters per EN61010 CAT II, 1000 V; EN61010 CAT III, 600 V ; <br> CAT IV, 300 V  |
| Battery Type | 4 AA Alkaline, NEDA 15A or LR6 |
| Battery Life | 72 Hours typical (with backlight off) |
| Shock Vibration | Per MIL-T-PRF 28800 for Class II instruments |
| Electromagnetic Compatibility (EMC) | Susceptibility and Emissions: Commercial Limits per EN61326-1 |
| Size | $\begin{aligned} & 10.0 \mathrm{~cm} \times 20.3 \mathrm{~cm} \times 5.0 \mathrm{~cm}(3.94 \text { in } \times 8.00 \mathrm{in} \times 1.97 \mathrm{in}) \\ & \text { (Not Including Accessory Mount) } \end{aligned}$ |
| Weight | 545 grams (1.2 lbs.) |
| Case Sealing | IP-42 per IEC 529, Section 3 |
| Warranty | Lifetime |
| Calibration Interval | 1 year |

## Basic Specifications

| Function | Ranges/Description |
| :--- | :--- |
| DC Voltage | 0 to 1000 V |
| AC Voltage, true RMS | 2.5 mV to $1000 \mathrm{~V}-100 \mathrm{kHz}$ bandwidth |
| Basic Accuracy | DC voltage: $0.025 \%$ <br> AC voltage: $0.4 \%$ |
| DC Current | 0 to $10 \mathrm{~A} \mathrm{(20} \mathrm{~A} \mathrm{for} 30$ seconds) |
| AC Current, true RMS | $25 \mu \mathrm{~A}$ to $10 \mathrm{~A}(20 \mathrm{~A}$ for 30 seconds) |
| Resistance | 0 to $500 \mathrm{M} \Omega$ |
| Conductance | 0 to 500 nS |
| Capacitance | 0.001 nF to 50 mF |
| Diode Test | 3.1 V |
| Temperature | $-200{ }^{\circ} \mathrm{C}$ to $1350{ }^{\circ} \mathrm{C}\left(-328^{\circ} \mathrm{F}\right.$ to $\left.2462{ }^{\circ} \mathrm{F}\right)$ |
| Frequency | 0.5 Hz to 1000 kHz |
| LOGGING Intervals <br> (Model 189 only) | At least 288 intervals may be stored. Up to 707 unstable event values (see AutoHOLD) <br> are automatically added to LOGGING memory for viewing only through optional PC <br> software. Additional intervals will be logged up to 995 if the signal is stable. |
| SAVE Readings <br> (Model 189 only) | Up to 100 readings may be saved by the user in a memory separate from LOGGING <br> memory. These readings may be viewed using VIEW MEM. |

## Detailed Accuracy Specifications

Accuracy is specified for a period of one year after calibration, at $18{ }^{\circ} \mathrm{C}$ to $28^{\circ} \mathrm{C}\left(64^{\circ} \mathrm{F}\right.$ to $\left.82^{\circ} \mathrm{F}\right)$, with relative humidity to 90 $\%$. Accuracy specifications are given as:

$$
\pm \text { ( [ \% of reading ] + [ number of least significant digits ] ) }
$$

$A C \mathrm{mV}, \mathrm{AC} \mathrm{V}, \mathrm{AC} \mu \mathrm{A}, \mathrm{AC} \mathrm{mA}$, and AC A specifications are ac coupled, true rms and are valid from $5 \%$ of range to $100 \%$ of range. AC crest factor can be up to 3.0 at full-scale, 6.0 at half-scale except the 3000 mV and 1000 V ranges where it is 1.5 at full scale, 3.0 at half-scale.

|  |  |  | Accuracy |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Function | Range | Resolution | $45 \mathrm{~Hz}-1 \mathrm{kHz}$ | 20-45 Hz | $1 \mathrm{kHz-10} \mathrm{kHz}$ | $10 \mathrm{kHz}-20 \mathrm{kHz}$ | $20 \mathrm{kHz}-100 \mathrm{kHz}$ |
| AC mV ${ }^{1,2}$ | 50.000 mV | 0.001 mV | 0.4 \% + 40 | $2 \%+80$ | $5 \%+40$ | 5.5 \% + 40 | $15 \%+40$ |
|  | 500.00 mV | 0.01 mV | $0.4 \%+40$ | $2 \%+80$ | $5 \%+40$ | $5.5 \%+40$ | $8 \%+40$ |
|  | 3000.0 mV | 0.1 mV | $0.4 \%+40$ | $2 \%+80$ | $0.4 \%+40$ | $1.5 \%+40$ | $8 \%+40$ |

| Capacitance $^{2}$ | 1.000 nF | 0.001 nF | $2 \%+5$ |
|  | 10.00 nF | 0.01 nF | $1 \%+5$ |
|  | 100.0 nF | 0.1 nF |  |
|  | $1.000 \mu \mathrm{~F}$ | $0.001 \mu \mathrm{~F}$ |  |
|  | $10.00 \mu \mathrm{~F}$ | $0.01 \mu \mathrm{~F}$ |  |
|  | $100.0 \mu \mathrm{~F}$ | $0.1 \mu \mathrm{~F}$ |  |
|  | $1,000 \mu \mathrm{~F}$ | $1 \mu \mathrm{~F}$ |  |
|  | 10.0 mF | 0.01 mF | $2 \%+10$ |
| Diode Test ${ }^{1}$ | 50.00 mF | 0.01 mF |  |

1. For the 5,000 count mode, divide the number of least significant digits (counts) by 10 .
2. For film capacitor or better, using Relative mode (REL $\Delta$ ) to zero residual on 1.000 nF and 10.00 nF range.
3. Least significant digit not active above 10 mF .

| Function | Range | Resolution | Accuracy |
| :---: | :---: | :---: | :---: |
| Frequency | 500.00 Hz | $0.01 \mathrm{~Hz}^{1}$ | $\pm(0.0050 \%+1)$ |
|  | 5.0000 kHz | 0.0001 kHz |  |
|  | 50.000 kHz | 0.001 kHz |  |
|  | 999.99 kHz | 0.01 kHz |  |
| Duty Cycle | 10.00\% to 90.00 \% | 0.01 \% | $\pm$ ((voltage range/input voltage) $\times 300$ counts) ${ }^{5,6}$ |
| Pulse Width | $\begin{aligned} & 499.99 \mathrm{~ms} \\ & 999.9 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & 0.01 \mathrm{~ms} \\ & 0.1 \mathrm{~ms} \end{aligned}$ | \pm (3 \% X (voltage range/input voltage) +1 count $)^{5,6}$ |
| Temperature | -200 to $+1350{ }^{\circ} \mathrm{C}$ | $0.1{ }^{\circ} \mathrm{C}$ | $\pm\left(1 \% \text { of reading }+1^{\circ} \mathrm{C}\right)^{2,3}$ |
|  | -328 to +2462 ${ }^{\circ} \mathrm{F}$ | $0.1{ }^{\circ} \mathrm{F}$ | $\pm\left(1 \% \text { of reading }+1.8{ }^{\circ} \mathrm{F}\right)^{2,3}$ |
| MIN MAX AVG | Response: 100 ms to $80 \%$ |  | Specified accuracy $\pm 12$ counts for changes $>200 \mathrm{~ms}$ in duration. ( $\pm 40$ counts in AC for changes $>350 \mathrm{~ms}$ and inputs > $25 \%$ of range) |
| FAST MN MX | $250 \mu \mathrm{~s}{ }^{4}$ |  | Specified accuracy $\pm 100$ counts up to 5,000 count (full range) reading. For higher peak readings (to 20,000 counts), specified accuracy $\pm 2 \%$ of reading. |
| 1. Reading will be 0.00 for signals below 0.5 Hz . <br> 2. Accuracy specification is relative to the user-adjustable temperature offset, and assumes ambient temperature stable to $\pm 1^{\circ} \mathrm{C}$. <br> 3. For ambient temperature changes of $\pm 5^{\circ} \mathrm{C}$, rated accuracy applies after 1 hour. <br> 4. For repetitive peaks; 2.5 ms for single events. Use DC function settings below 20 Hz .50 mV range not specified. <br> 5. Frequency greater than 5 Hz , except for VDC, 500 mVDC and 3000 mVDC functions; 0.5 Hz to 1 kHz . Signals centered around trigger levels. <br> 6. Range/input ratios also apply to current functions. 500 counts or $5 \%$ for 10 A ranges. |  |  |  |

## Frequency Counter Sensitivity

| Input Range | Approximate VAC Sensitivity (RMS Sine Wave) ${ }^{1}$ |  | VAC Bandwidth ${ }^{3}$ | Approximate VDC Trigger Levels | VDC Bandwidth ${ }^{3}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & 15 \mathrm{~Hz} \text { to } \\ & 100 \mathrm{kHz}^{2} \end{aligned}$ | $500 \mathrm{kHz}^{2}$ |  |  |  |
| 50 mV | 5 mV | 10 mV | 1 MHz | -5 mV \& 5 mV | 1 MHz |
| 500 mV | 20 mV | 20 mV | 1 MHz | 5 mV \& 65 mV | 1 MHz |
| 3000 mV | 500 mV | 2000 mV | 800 kHz | 140 mV \& 200 mV | 90 kHz |
| 5 V | 0.5 V | 2.0 V | 950 kHz | 1.4 V \& 2.0 V | 14 kHz |
| 50 V | 5 V | 5.0 V | 1 MHz | 0.5 V \& 6.5 V | $>400 \mathrm{kHz}$ |
| 500 V | 20 V | 20 V | 1 MHz | 5 V \& 65 V | $>400 \mathrm{kHz}$ |
| 1000 V | 100 V | 100 V | $>400 \mathrm{kHz}$ | 5 V \& 65 V | $>400 \mathrm{kHz}$ |

1. Maximum input $=10 \times$ Range ( 1000 V max). Noise at low frequencies and amplitudes may affect accuracy.
2. Useable at reduced sensitivity to 0.5 Hz and 1000 kHz .
3. Typical frequency bandwidth with full scale (or maximum $2 \times 10^{7} \mathrm{~V}-\mathrm{Hz}$ product) RMS sine wave.

## Burden Voltage (A, mA, $\mu A$ )

| Function | Range | Burden Voltage (typical) |
| :---: | :---: | :---: |
| $\mathrm{mA}-\mu \mathrm{A}$ | $500.00 \mu \mathrm{~A}$ | $102 \mu \mathrm{~V} / \mu \mathrm{A}$ |
|  | $5,000 \mu \mathrm{~A}$ | $102 \mu \mathrm{~V} / \mu \mathrm{A}$ |
|  | 50.000 mA | $1.8 \mathrm{mV} / \mathrm{mA}$ |
|  | 400.00 mA | $1.8 \mathrm{mV} / \mathrm{mA}$ |
| A | 5.0000 A | $0.04 \mathrm{~V} / \mathrm{A}$ |
|  | 10.000 A | $0.04 \mathrm{~V} / \mathrm{A}$ |
