THE POSSIBILITIES ARE INFINITE

fi-4640S

Departmental Simplex Document Scanner

Embrace the benefits of image capture on a broader scale.

Whether your organization is expanding its use of image capture or implementing its first scanning station, the Fujitsu fi-4640S provides the right blend of features, performance, and affordability.

The fi-4640S captures fine details with a maximum output resolution of 800 dpi. It also employs sophisticated dithering and diffusion algorithms for superior halftone rendering. Standard, on-board image processing produces consistent, outstanding image quality — ScanRight IPC technology is an available option, as well.

Featuring infrared document double-feed detection to ensure reliable batch scanning, the fi-4640S can support paper sizes from 2.1" by 2.9" to 11.7" by 17", as well as different thicknesses ranging from onion skin to card stock. Automatic length detection conserves file space by eliminating excess white space when scanning batches of mixed-length documents. Additionally, the fi-4640S possesses the ability to scan documents up to 68" long.

On-site service helps maximize uptime

The fi-4640S scanner includes a 90-day, on-site, Limited Warranty. A free, nine-month depot service upgrade to the Limited Warranty is also available (some restrictions apply). For full details on the Limited Warranty and on all service programs, go to www.ImagingService.com or call (800) 626-4686.
