THE POSSIBILITIES ARE INFINITE

fi-4750L

Low-Volume Production Duplex Document Scanner

Speed and flexible paper-handling for the production environment.

The Fujitsu fi-4750L gives you the ability to scan virtually any document up to 11.7" by 17" in 256-level grayscale and monochrome. Its 55-ppm/100-ipm scan rate (monochrome, 200 dpi, A4 portrait) and 250-page automatic document feeder (ADF) with continuous-feed capability make short work of most scanning tasks, while its flatbed capability readily accepts unusual objects, such as books and fragile documents.

For the ultimate in flexibility, the duplex document feeder supports paper sizes as small as 2.1" x 2.9" to 11.7" x 17" and paper thicknesses from onion skin to card stock. The scanner's automatic length detection senses the end of the document and eliminates excess white space when scanning batches of mixed-length documents and its infrared document double-feed detection simplifies the batch scanning process. In addition, the Fujitsu fi-4750L also handles long documents (up to 68") with ease.

For image enhancement purposes, make use of the scanner's standard, on-board image processing features or consider ScanRight IPC as an option.

On-site service helps maximize uptime

The fi-4750L scanner includes a 90-day, on-site, Limited Warranty. A free, nine-month depot service upgrade to the Limited Warranty is also available (some restrictions apply). For full details on the Limited Warranty and on all service programs, go to www.ImagingService.com or call (800) 626-4686.
