fi-486PRFR Imprinter Operator's Guide

Operator's Guide

English

INTRODUCTION

Thank you for purchasing the fi-486PRFR Imprinter.

The fi-486PRFR is the fi-4860C image scanner option.

The fi-486PRFR and the fi-486PRRE can be installed in the fi-4860C image scanner together. However, they cannot be used at a time. Either fi-486PRRE or fi-486PRFR can be used during scanning.

The fi-486PRFR installation should be done by a trained service engineer.

fi-486PRFR

The fi-486PRFR prints on the front side of documents.

Printing is done prior to scanning a document and the printed characters are scanned and included in the scanned image.

About this manual

The contents of this manual are as follows.

1. PREPARATIONS

This chapter explains the contents of the imprinter package and the part names.

2. BASIC OPERATIONS

This chapter describes how to use the imprinters.

3. DAILY CARE

This chapter describes how to clean the imprinter and the related area of the scanner.

4. REPLACING PRINT CARTRIDGE

This chapter explains how to replace the Print cartridge and reset the Ink remain counter.

5. PRECAUTION

This chapter explains important details for ensuring the correct use of the products.

6. ERROR MESSAGES

This chapter explains the error messages and the recovery process.

7. SPECIFICATIONS

This chapter describes the specifications of the fi-486PRFR imprinter option.

This manual provides necessary information to make the best use of the fi-486PRFR.

August, 2002

■ Revisions

FCC declaration

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- The use of a shielded interface cable is required to comply with the Class A limits of Part 15 of FCC rules. The length of the SCSI interface cable must be 1.5 meters (5 feet) or less.
 - The length of the AC cable must be 3 meters (10 feet) or less.
-

Canadian DOC Regulations

This digital apparatus does not exceed the Class A limit for radio noise emissions from digital apparatus set out in the Radio interference Regulations of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique dicté par le ministère des Communications du Canada.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

International ENERGY STAR® Program

As an ENERGY STAR® Partner, PFU LIMITED has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

The International ENERGY STAR® Office Equipment Program is an international program that promotes energy saving through the penetration of energy efficient computers and other office equipment. The program backs the development and dissemination of products with functions that effectively reduce energy consumption. It is an open system in which business proprietors can participate voluntarily. The targeted products are office equipment such as computers, monitors, printers, facsimiles, copiers, scanners, and multifunction

devices. Their standards and logos () are uniform among participating nations.

Use in High-safety Applications

This product has been designed and manufactured on the assumption that it will be used in office, personal, domestic, regular industrial, and general-purpose applications. It has not been designed and manufactured for use in applications (simply called "high-safety applications" from here on) that directly involve serious danger to life and health when an extremely high degree of safety is required, for example, in the control of nuclear reactions at nuclear power facilities, automatic flight control of aircraft, air traffic control, operation control in mass-transport systems, medical equipment for sustaining life, and missile firing control in weapons systems, and when provisionally the safety in question is not ensured. The user should use this product without adopting measures for ensuring safety in such high-safety applications. PFU LIMITED assumes no liability whatsoever for damages arising from use of this product by the user in high-safety applications, and for any claims or compensation for damages by the user or a third party.

■ Preface

Safety Precautions

This manual describes important details for ensuring the safe and correct use of this product. Thoroughly read this manual before you start to use this product. In particular, be sure to read and fully understand the Safety Precautions described in this manual before you use this product.

Also, store this manual in a safe place so that it can be easily referred to during use of this product.

Warning Indications Used In This Manual

This manual uses the following indications to ensure safe and correct use of this product, and to prevent possible danger and injury to the operator and other persons.

This indication alerts operators to an operation that, if not strictly observed, may result in severe injury or death.

This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to equipment.

Symbols Used In This Manual

This manual uses the following symbols in explanations in addition to warning indications.

This symbol alerts operators to particularly important information. Be sure to read this information.

This symbol alerts operators to helpful advice regarding operation.

A TRIANGLE symbol indicates that special care and attention is required.

The drawing inside the triangle shows the specific caution.

A CIRCLE with a diagonal line inside shows action which users are not allowed to do. The drawing inside or under the circle shows the specific action that is not allowed.

Outline characters on a colored background shows instructions users should follow. It may include the drawing which shows the sepecific instruction.

■ Safety Precautions

The following describes important warnings described in this manual.

Do not install in locations subject to oil smoke, steam, humidity, and dust.

Do not install the scanner in locations subject to oil smoke, steam, humidity, and dust. Doing so might cause fire or electric shock.

Do not use the scanner if you smell strange odor.

If you sense heat coming from devices or detect other malfunctions such as smoke, strange smells or strange noises, immediately press down the power button to turn off the scanner and then disconnect its power plug.

Make sure that the smoke has disappeared, and then contact the agent where you bought the scanner.

Do not allow liquids to get inside the scanner.

Do not insert or drop foreign metal objects in to the scanner.

Do not scan wet document or document with paper clips.

Do not splash or allow the scanner to get wet.

If foreign objects (water, small metal objects, liquids, etc.) get inside the scanner, immediately press down the power button to turn off the scanner and disconnect the power plug from the power outlet.

Then contact the agent where you bought the scanner or Maintenance Service Center.

Pay particular attention to this warning in households where there are small children.

The following describes important cautions described in this manual.

Protect the scanner from static electricity.

Install the scanner away from strong magnetic fields and other sources of noise. Also, protect the scanner from static electricity as this might cause the scanner to malfunction.

Do not use aerosol sprays near the scanner.

Do not use aerosol sprays, for example, to clean the scanner. Air sprayed from aerosol sprays causes dirt and dust to enter the scanner, resulting scanner failure and malfunction.

Do not install the scanner in the direct sunlight.

Do not install the scanner in the direct sunlight or near heating apparatus. Doing so might cause heat to build up inside the scanner, causing fire or scanner trouble. Install the scanner in a well-ventilated location.

1 PREPARATIONS

This chapter explains how to prepare the imprinter, fi-486PRFR for use.

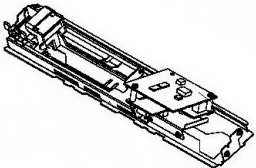

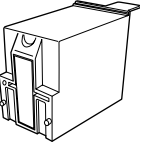

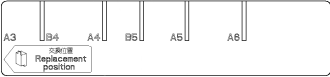

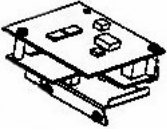

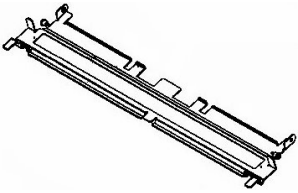

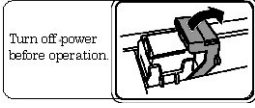

1.1 Checking the Contents of the Imprinter Package	2
--	---

1.2 Outer View	3
----------------------	---

1.1 Checking the Contents of the Imprinter Package

Please confirm that all of the following parts are included in the package. If any parts are missing or defective, contact the FUJITSU Scanner dealer where you purchased the product.

Handle the imprinter and the accessories with care.

Imprinter and Accessories		
<ul style="list-style-type: none"> ○ Imprinter 	<ul style="list-style-type: none"> ○ Print Cartridge 	<ul style="list-style-type: none"> ○ Operator's Guide 
<ul style="list-style-type: none"> ○ Installation screws (Qty 2) 	<ul style="list-style-type: none"> ○ Positioning seal 	<ul style="list-style-type: none"> ○ PCB unit 
<ul style="list-style-type: none"> ○ Glass sheet guide 	<ul style="list-style-type: none"> ○ Operation instruction label 	

1.2 Outer View

This section shows the outer view of the fi-486PRFR.

2 BASIC OPERATIONS

This chapter describes the installation of the Print cartridge, the adjustment of print position, and the setup of the imprinter.

2.1 Installing the Print Cartridge	6
2.2 Adjusting Print Position.....	9
2.3 Setting Imprinter.....	11

2.1 Installing the Print Cartridge

Installation of the Print cartridge is explained in the following.

- 1) Press the Power button on the scanner operator panel and turn off the power.
- 2) Open the Hopper if it is closed (retracted).

- 3) Remove documents from the stacker. Pull up the lever on the right front of the Upper transport unit and then raise it.

Make sure that the Upper transport unit is locked before you put your hands inside of the scanner.

4) Open the imprinter cover.

Imprinter cover

5) Move the Print cartridge holder to left-end, the cartridge replace position.

-
- 6) When the lever is closed, rotate the lever to open before placing the print cartridge.

Insert the cartridge with its Tab positioned toward left side and install it.

- 7) Turn the lever on the print cartridge to fix it.

- 8) Close the imprinter cover.

- 9) Lift the Upper transport unit slightly to release the safety lock and then lower and close the transport unit slowly.

2.2 Adjusting Print Position

Adjust the print position.

- 1) Open the Hopper if it is closed (retracted).

- 2) Remove documents from the stacker. Pull up the lever on the right front of the Upper transport unit and then raise it.

Make sure that the Upper transport unit is locked before you put your hands inside of the scanner.

3) Open the imprinter cover.

Imprinter cover

4) Place the print alignment mark to the position where you want to print.

Print position sticker

The characters will be printed to the position of the alignment allow of print position sticker.

5) Close the imprinter cover.

6) Lift the Upper transport unit slightly to release the safety lock, lower and close the transport unit slowly.

2.3 Setting Imprinter

You must do the following:

- 1) Click the [Option] button is from the main screen of the scanner driver [TWAIN Driver].
- 2) Select the [Imprinter(Endosor)] tab.
The following screen is displayed.

- 3) Enable Imprinter. Setup the position of printing and the print string.
Refer to "FUJITSU TWAIN32 scanner driver User's Guide" stored in the scanner driver (CD-ROM) for the details of the setup.
- 4) Press [OK] button to confirm the setup.
- 5) Click the [Scan] button is from the main screen of the scanner driver [TWAIN Driver] , the defined data is printed on the document.

When you want to setup the imprinter without using a scanner driver.

Refer to "fi-4860C Operator's Guide", the section " 7.3 Setup Mode Details"

3 DAILY CARE

This chapter explains how to clean the fi-486PRFR, the fi-486PRRE, and nozzle surface of the Print cartridge.

When you do the cleaning, turn off the scanner power, and unplug the power cord from the outlet.

If cleaning is done with power turned on, it may cause electric shock or imprinter failure.

Clean the fi-486PRFR and the nozzle surface of the Print cartridge.

Cleaning the fi-486PRFR

As the fi-486PRFR prints the number on a document before reading operation, ink can spatter over the glass and paper path of the Upper transport unit, and vicinity of the print cartridge holder.

We recommend you to clean the scanner after 5000 sheets scanning to avoid smudge on the scanned image. Note that the required cleaning cycle may vary depending upon document type to be scanned.

More frequent cleaning may be required when printing a document on which ink does not easily get dry.

For the cleaning, use lint-free cloth and wipe the parts gently.

- 1) Press the Power button on the scanner operator panel and turn off the power.
- 2) Open the Hopper if it is closed (retracted).

- 3) Remove documents from the stacker. Pull up the lever on the right front of the Upper transport unit and then raise it.

Make sure that the Upper transport unit is locked before you put your hands inside of the scanner .

- 4) Wipe the following parts using a cloth moistened with Cleaner F1 or isopropyl alcohol.

For the details on cleaning the scanner, refer to "fi-4860C Operator's Guide," "Chapter3 Daily Care."

- Glasses of the Upper transport unit and Transport path

- Vicinity of the print cartridge holder

5) Lift the Upper transport unit slightly to release the safety lock, lower and close the transport unit slowly.

Cleaning the Nozzle Surface of the Print Cartridge

Ink or stains stuck to the nozzle surface of the print cartridge or leaving the imprinter unused for a while cause poor printing of characters because of blocked emission holes in the nozzle. If your imprinter has this trouble, clean the nozzle surface of the print cartridge.

For the cleaning, use dry lint-free cloth and wipe the parts gently. Wipe off dirt and stain gently from the nozzle surface.

- 1) Remove the Print cartridge.

Refer to the section "4.1 Replacing the Print Cartridge" (page20).

- 2) Gently wipe off dirt and stain from the Nozzle surface using dry lint-free cloth.

- 3) Make sure that dirt and stain are all removed and then install the cartridge.

Refer to the section "2.1 Installing the Print Cartridge" (page6).

4 REPLACING PRINT CARTRIDGE

This chapter explains how to replace the Print cartridge and reset the Ink remain counter.

Make sure that you turn off the scanner power and unplug the power cable from the outlet.

If the cartridge replacement is done with power turned on, it may cause electric shock or imprinter failure.

4.1 Replacing the Print Cartridge.....20

4.2 Reset the remaining ink counter of imprinter.....23

4.1 Replacing the Print Cartridge

Replace the Print cartridge and reset the Ink remain counter.

- 1) Press the Power button on the scanner operator panel and turn off the power.
- 2) Open the Hopper if it is closed (retracted).

- 3) Remove documents from the stacker. Pull up the lever on the right front of the Upper transport unit and then raise it.

Make sure that the Upper transport unit is locked before you put your hands inside of the scanner.

4) Open the imprinter cover.

Imprinter cover

5) Move the Print cartridge holder to left-end, the cartridge replace position.

6) Turn the blue lever toward right and open the cartridge holder.

7) Take out the Print cartridge from the holder and put the new one.

Insert the cartridge with its Tab positioned toward left side and install it.

8) Move the lever leftward to fix the cartridge.

9) Close the imprinter cover.

10) Lift the Upper transport unit slightly to release the safety lock, lower and close the transport unit slowly.

4.2 Reset the remaining ink counter of imprinter

If the following message comes up, prepare the new Print cartridge.

If no further printing is possible, replace the Print cartridge and reset the Ink Remain Counter.

If the Print cartridge is replaced before Print cartridge error occurs, be sure to reset the Ink remain counter.

```
P l e a s e   a   n   e   w   I   n   k
N o   w   R   e   a   d   i   n   g   !   x   x   x   x
```

[XXXX] is the scanned sheet counter value.

- 1) Press (Next button) or (Previous button) and let LCD display <Screen26>.

<Screen26>

```
! 2 6 I n k ( x x x x )
= ■ ■ ■ ■ □ □ R e s e t / N o
```

Approximate remaining ink amount is shown as below:

■ ■ ■ ■ ■ ■ ■ ■	-	Amount of remaining ink is high.
■ ■ ■ ■ ■ ■ □		
■ ■ ■ ■ □ □ □		
■ ■ ■ □ □ □ □		
■ ■ □ □ □ □ □		
■ □ □ □ □ □ □	-	The amount of remaining ink is low or empty.

In [XXXX], [Pre] or [Post] is displayed.

2) At <Screen26>, to choose to reset the ink remain counter, press ◀ (Left arrow button) and select [Reset].

Press (Enter button). Then <Screen26-1> is displayed.

Not to reset, select [No] and press (Enter button).

3) At <Screen26-1>, to actually reset the counter, press ▶ (Right arrow button) and select [yes].

To cancel the reset, select [No] and press (Enter button).

4) Press (Enter button) and reset the counter (■ ■ ■ ■ ■).

In [XXXX], [Pre] or [Post] is displayed.

5) Press (Exit button) at the end and the LCD display goes back to [Ready] screen.

5 PRECAUTION

This chapter explains the important details for ensuring the correct use of the products.

-
- 1. When installing and replacing the Print cartridge, be careful not to insert the cartridge incorrectly.**
 - 2. When printing near the edge of paper, note that printing may go across the edge depending on the setting position of the imprinter.**
 - 3. Be careful not to touch the contacts or the nozzle on the bottom of the print cartridge. Poor printing or loose contact may occur**
 - 4. Do not move the imprinter during printing. Printing may be out of order.**
 - 5. Do not shock the imprinter or the print cartridge. Poor printing may occur.**
 - 6. We recommend you to remove the print cartridge from the scanner while you do not use it for a long time.
Even when the Imprinter is not used, ink is consumed by such as turning the scanner power on.**

6 ERROR MESSAGES

This chapter explains the error messages and the recovery process.

If the following error messages are displayed on the LCD, the Imprinter is malfunctioning.

Recover the Imprinter following the procedures described.

If the error messages are different from the following or the ones described in "fi-4860C Operator's Guide", "Appendix 3 MESSAGES OF OPERATOR PANEL", or if you can not fix the problem, contact the FUJITSU Scanner dealer where you purchased the scanner, or an authorized FUJITSU Scanner Service Provider.

X X X X
N o l n k C a r t r i d g e

Possible causes are as follows.

- **Loose contact of the signal electrodes of the print cartridge.**
Reinsert the print cartridge in place.
- **Print cartridge is not installed correctly.**
Reinsert the Print cartridge in place.

In [XXXX], [Pre] or [Post] is displayed.

X X X X
l m p r i n t e r A l a r m

Possible causes are as follows.

- **Loose contact of the signal electrodes of the print cartridge.**
Reinsert the print cartridge in place.
- **The program memory is out of order.**
Turn of the power, and then turn on again.
- **The print cartridge is does not work.**
Please change the print cartridge.

In [XXXX], [Pre] or [Post] is displayed.

7 SPECIFICATIONS

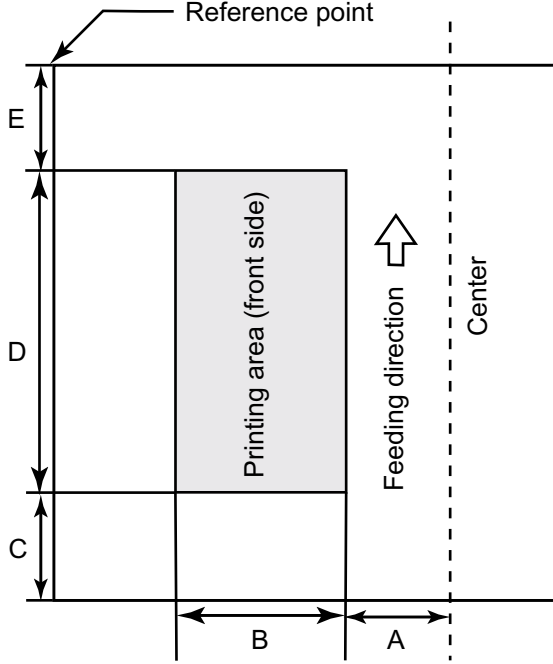

This chapter describes the specifications of the fi-486PRFR imprinter option.

Specification

(Continued from the following page)

Item	Specification
Printing Method	Thermal inkjet printing
Printed Characters	Alphabet Letters : A to Z, a to z Numeric Characters : 0, 1 to 9 Symbols : ! " \$ # % & ' () * + , - . / : ; < = > ? @ [¥] ^ _ ' { } ~
Maximum printable characters per line	Maximum 40 column
Character Size	Height 2.91 mm to width 2.82 mm
Character Pitch	Approximately 3.53mm
Document quality requirements	<p>Documents allowed for fi-4860C For the details ofr the document quality requirements, refer to "fi-4860C Operator's Guide," "Chapter 6 ADF DOCUMENT SPECIFICATIONS."</p> <hr/> <p> Document paper having glossy surface such as thermal paper, thermal transfer paper, coated paper, and art paper take longer time for the ink to dry and may cause poor print quality. The cleaning cycle is also shortened.</p>

(Continued from the previous page)

Item	Specification
Printing Area	<p>Printable area is shown as below.</p> <p>A=40mm or more B=99mm or less C=5mm or more D=140.5mm or less (Max.40 column) E=5mm or more</p>  <p>A document with less than 80 mm length cannot be printed.</p>
Consumable	Print Cartridge

The product life of this imprinter is 5 years or 7,200,000 sheet scans whichever comes first from the date of purchase. Please check the abrasion counter for the number of documents that have ever been scanned.

For details on how to check the scanner life counter, refer to "fi-4860C Installation Guide."

If the scanner is used beyond the product life, failures and/or scan performance degradation may occur.

Purchasing consumables

Contact FUJITSU Scanner dealer where you purchased the imprinter.
