FUJITSU

THE POSSIBILITIES ARE INFINITE

fi-5750C

Color Duplex Document Scanner

Enhanced features and flexibility for your production environment

The Fujitsu *fi-5750C*, based on the popular M4097 and *fi-4750* series, improves productivity in so many ways. Fast, 57-ppm/114-ipm color and monochrome scanning at 300 dpi (600 dpi. optical resolution) lightens your workload all the way up to its daily duty cycle of up to 8,000 documents. Flatbed operation and a versatile, 200-page automatic document feeder (ADF) handle a wide variety of paper sizes, as well as irregular documents. And for maximum flexibility and comfort, the ADF slides and rotates to three different positions to accommodate left and right handed users.

With 256 MB of memory and onboard JPEG compression the *fi-5750C* processes color images with ease and can accommodate documents up to 34" in length. High-speed UltraSCSI and USB 2.0 interfaces keep up with throughput demands, while the full versions of Adobe® Acrobat® 6.0 Standard and ScandAll 21 add value and functionality.

On-site service helps maximize uptime.

The *fi-5750C* scanner includes a 90-day, on-site, Limited Warranty. A free, nine-month depot service upgrade is also available (some restrictions apply). For full details on the Limited Warranty and on all service programs, go to www.ImagingService.com or call (800) 301-9475.
