## Color Duplex ADF / Flatbed tandem Scanner

Not only can the fi-5220C scan color double-sided documents at an incredible 50ipm in both color and black & white, it is the first scanner of its class to come loaded with an ultrasonic multi-feed sensor that detects whenever two or more documents are simultaneously fed into the scanner.

- Able to scan color double-sided documents at an incredible 50ipm.  
The fi-5220C scans both color and black & white A4 documents at a speedy 25ppm/50ipm (200dpi). Furthermore, its ability to digitize batches containing up to 50 pages enables this scanner to efficiently scan large batches.
- The first scanner in its class to be armed with an ultrasonic multi-feed sensor and to be capable of mixed batch scanning.  
The fi-5220C is the first scanner of its class to come loaded with an ultrasonic multi-feed sensor that detects whenever two or more sheets of paper have been simultaneously feed into the scanner, regardless of document weight, size or color.  
Note\* 1: This statement stood true for A4 ADF type scanners as of November 8, 2005.
- Overscanability dramatically cuts down on corner cutting.  
Furthermore, this scanner's scanning range has been expanded to virtually eliminate the cutting of corners out of skewed images. By removing the need to rescanned documents due to multi-feeds and cut corners, the fi-5220C improves scanning efficiency.
- Embossed card scannability  
A modified paper path enables this scanner's automatic document feeder (ADF) to digitize member's cards as well as other embossed documents. This frees fi-5220C users from having to scan embossed card data separately, easing users' workloads and expanding duties that scanners can be used for.  
Note\* 1: This scanner is capable of scanning ISO7810 (ID-1 Type) cards.
- The fi-5220C's flatbed scanner is capable of scanning any document not exceeding A4 (letter) in size, regardless of its paper weight.
