Packing more punch in a small form factor: 2.5-inch hard disk drives pave the way for new possibilities in the mobile market

- ▶ Provides up to 120GB of storage space with 5,400 RPM speed
- ▶ Low power consumption and power-save features help extend battery life
- ▶ RoHS-compliant, eliminating certain hazardous materials in the manufacturing of electronic equipment
- ▶ High speed and storage thresholds can spur a new generation of consumer entertainment applications
- ▶ Covered by a three-year Limited Warranty

Fujitsu is once again proving that less is more. Our newest 2.5-inch mobile hard disk drive offers increased capacity and processing power, yet actually reduces the power needed to do so. Fluid Dynamic Bearing (FDB) motors help limit acoustic noise, resulting in whisper-quiet operation.

What's more, this pocket-sized drive offers 1.5 ms read/write seek times, while at the same time providing high-capacity, space-efficient storage products to OEMs and resellers.

The history of leadership in research and development by Fujitsu continues to bring innovation to you. The hard disk drives offer up to 120GB storage capacity at 5,400 RPM speeds. This combination can dramatically improve the performance of laptop PCs, small form factor PCs and blade applications.

Clearly, Fujitsu 5,400 RPM mobile hard disk drives are breaking new ground. Leverage thirty-five years of Fujitsu hard disk drive experience to meet your customers' insatiable need for mobile flexibility with increased storage capacity.
