

# High Speed Radar Conversion

Applicable **ONLY** to the following radar models:

1932MK2, 1942MK2, 1933CBB, 1943CBB, 1934CBB, 1944CBB, 1935 & 1945

## 24 RPM

Motor RM8025  
000-169-460

Antenna Turning Gear  
(straight-cut teeth)  
362-225-013

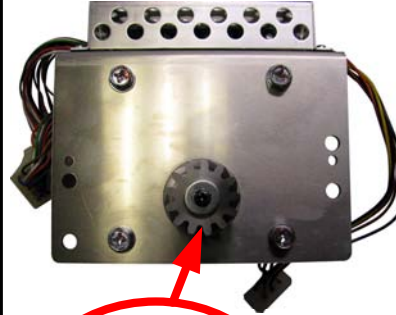

Straight-cut teeth

This is the standard (24 RPM) motor and gear that come installed in the radar.

## 48 RPM

Motor RM8711  
000-122-318

Antenna Turning Gear  
(angle-cut teeth)  
100-109-984

Angle-cut teeth

This is the motor and gear that are installed in the radar for the (48 RPM) conversion.

The cost for the High Speed Radar Conversion includes the list price of the 48 RPM parts shown above and 1 hour labor. This will be *in addition* to the purchase price of the radar.

If the conversion is done by Furuno USA, prior to initial delivery, there will be a credit for the list price of the 24 RPM Motor and Antenna Turning Gear.

If the conversion is done after the radar is delivered, or by any other repair facility, the 24 RPM parts can not be returned for credit.
