Features

Storage of Display Values to Memory (HOLD)

The current measurement value or MIN-MAX value can be frozen at the display.

Data Logging (RECORD, MIN-MAX)

Measurement values can be stored over a period of up to 24 hours for long-term observation of measured quantities. Maximum, minimum and mean values are determined for the selected recording duration. All changes to minimum and maximum values are indicated with an acoustic signal.

Measurement Value Smoothing

For purposes of stabilization, measurement values can be averaged and displayed at an interval of 3 seconds.

Overrange Indication

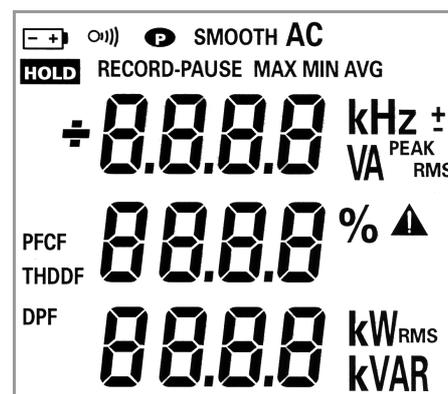

Optical, and in some cases acoustic signals are generated if measuring ranges are exceeded.

Automatic Shut-Down

The instrument shuts itself off automatically if any of the keys or the rotary switch are not activated for a period of 10 minutes. The automatic shut-down function can be disabled.

Triple LCD Display

Display	7 segment characters with background illumination
Places	4½ digits
