

HP 300s Firmware Release

Release Date: 2012-11-29

Version information: Rev. 19029

Multiple Emulators

This error only occurs in Windows 8 & Windows 7! One emulator is open and shows on the taskbar. If the user right clicks the 300s calculator emulator and then clicks on the HP SmartCalc300s Emulator to open a new one, an error message appears: "Have no valid SMART300-389-738.KML file!!" and the calculator does not open properly. The user can choose the 300s from the Start Menu to open a new instance of the emulator as a workaround.

No other known issues exist at this time.
