Keysight U1115A Remote Logging Display
Operating Instructions

The Keysight U1115A Remote Logging display is designed to be used with the Keysight U1200 Series handheld meters, Keysight U1117A IR-to-**Bluetooth**®[1] Adapter, Keysight U1177A IR-to-**Bluetooth** Adapter and mobile/software[2] applications to provide you a total wireless remote connectivity solution. With the U1115A, you can view readings from up to four handheld meters simultaneously, from an extended distance of up to 100-metres (U1117A) within the line-of-sight.

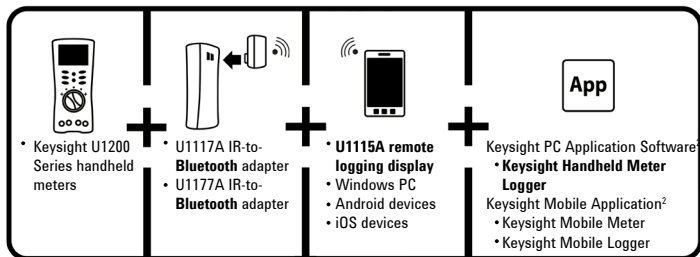

Figure 1 Keysight wireless remote connectivity solution

Standard Shipped Items Checklist
The following items are included with your purchase:
*   U1115A Remote Logging Display.
*   Three 1.5 V AA batteries.
*   USB to micro USB cable (for external power only).
*   Operating Instructions (this booklet).
*   Soft Carrying Case.

[1] *The **Bluetooth**® word mark and logos are registered trademark owned by **Bluetooth** SIG, Inc and any use of such marks by Keysight is under license. Other trademark and trade names are those of their respective owners.*
[2] *The Keysight U1115A only supports Keysight Handheld Meter Logger software for downloading logged data to PC via **Bluetooth** connection.*

Product Characteristics

Temperature	**Operating condition:** −20 °C to 55 °C **Storage condition:** −40 °C to 70 °C
Relative Humidity (R.H)	**Operating condition:** Up to 80 % at 40 °C (non-condensing) **Storage condition:** Up to 95 % at 40 °C (non-condensing)
Dimension (W x L x H)	92.0 mm × 107.9 mm × 33.5 mm
Weight	238 g with batteries , 170 g without batteries.
Battery Type	• Carbon Zinc 15D (ANSI/NEDA) and R6 (IEC) • Alkaline 15A (ANSI/NEDA) and LR6 (IEC) • Lithium 15LF (ANSI/NEDA) and FR6 (IEC)
Battery Lifespan	• Lithium batteries: 30 hours • Alkaline batteries: 20 hours
Power Consumption	Maximum 1 VA for 3 AA batteries Maximum 5 V +10 %, 250 mA for external power Auto Power Off mode, current consumption 3 mA
Warranty	One year (Does not cover normal wear and tear of mechanical parts and batteries)
Bluetooth	**Bluetooth** SPP profile, Class 1 device
Compatibility	**Keysight Handheld Meter/Display:** • Keysight U1200 Series Handheld Meters • Keysight U1117A IR-to-**Bluetooth** Adapter • Keysight U1177A IR-to-**Bluetooth** Adapter **Keysight Application Software:** • Keysight Handheld Meter Logger **Hardware Device:** • Windows PC (with **Bluetooth**-enabled)

Regulatory
 	
Complies with IDA Standards (DA 106994)
	The U1115A complies with the requirements of the following product standards:
	• EMC EN 301 489–1:V1.9.2
	               EN 301 489–17:V2.2.1
	               EN 55022:2010 (Group 1 Class A)
	               EN 55024:2010
	
	• RF (**Bluetooth**) EN 300 328 V1.7.1
	
	• RF (Health) EN 62311:2008
	
	• Safety EN 60950–1:2006+A11:2009
	               +A1:2010+A12:2011

Regulatory	• India Equipment Type Approval (ETA) Certificate No: NER-ETA/924
	• COFETEL Certificate No: RCPKEU115-0018, registered under Keysight Technologies Mexico S de RL de CV
	"This telecommunication equipment conforms to the NTC technical requirement"

NOTE

- Canada IC: The device contains transmitter IC: 5123A–BGTWT11IA
- To comply with FCC and Industry Canada RF radiation exposure limits for general population, the antenna(s) used for this transmitter must be installed such that a minimum separation distance of 20 cm is maintained between the radiator (antenna) and all persons at all times and must not be colocated or operating in conjunction with any other antenna or transmitter.
- ''La operación de este equipo está sujeta a las siguientes dos condiciones: (1) es posible que este equipo o dispositivo no cause interferencia perjudicial y (2) este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.''

WARNING

- The radio module certified by Japanese Radio Law is integrated inside.
- NCC Warning Statement:
  - Article 12
    Without permission, any company, firm or user shall not alter the frequency, increase the power, or change the characteristics and functions of the original design of the certified lower power frequency electric machinery.
  - Article 14
    The application of low power frequency electric machineries shall not affect the navigation safety nor interfere a legal communication, if an interference is found, the service will be suspended until improvement is made and the interference no longer exists.

CAUTION

- According to FCC part 15.21, changes or modifications not expressly approved by the manufacturer for compliance may void the user's authority to operate the equipment.
- According to FCC part 15.105(b):
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accoradance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

Turning On the U1115A

To turn on the U1115A , set the slide power switch to **On.** *(as shown in figure 4)*

NOTE

• Once a connected IR-to-**Bluetooth** Adapter is turned off, below scenarios will occur :

1 The **Not Connected** annunciator will appear on the display.

2 Subsequently, the 🚫 annunciator will appear after 15 s-20 s.

Supplying External Power to the U1115A

1 Plug the micro USB head to the micro USB port on the side of the U1115A. *(refer to figure 3)*

2 Plug the USB connector to a USB power source to supply external power to the U1115A.

NOTE

• The micro USB port on the U1115A serves as an external power port and not for data transfer or battery charger.

• Batteries can be left in the U1115A when operating from external power.

Installing and Replacing the Batteries

|	
	Make sure you turn off the U1115A before installing or replacing the batteries.
	To avoid the U1115A being damaged from battery leakage: • Always remove dead batteries immediately. • Always remove the batteries and store them separately if the U1115A is not going to be used for a long period of time.

Remove the battery protective sheet before using for the first time.
Connecting to Devices
Front view of the U1117A IR-to-**Bluetooth** adapter	**1** Ensure that the Link LED at the IR-to-**Bluetooth** adapter is blinking before establishing a connection. Power cycle if necessary. If the U1115A is switched off, wait for 30 seconds for the U1177A or U1117A to terminate the connection before powering on the U1115A for reconnection.

	2
	CONNECT **F3** Press to enter Connection Manager. (U1115A)
3	**4**	**5**
Connection Manager display showing: ✳ 01:01 **Connection Manager** A> Add Device B> Add Device C> Add Device D> Add Device Back | Bluetooth | Enter Typical Connection Manager display.	**Enter** **F4** Press to add devices.	**Scan** **F3** Press to scan for devices.

NOTE

The U1115A screen display will show **- - - - -** when:
1. No meter is connected.
2. Meter(s) function/mode is not supported by the U1115A.
3. When the user changes the meter's function. Typical wait time is 5s.
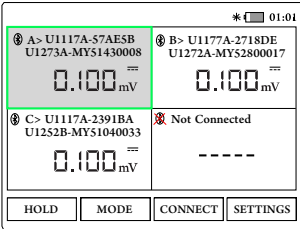

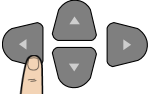

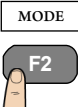

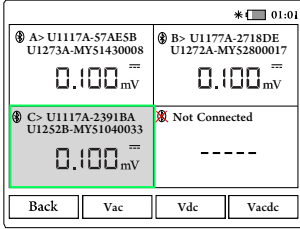

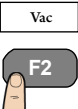

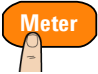

Identifying a Connected Meter

The identify meter function allows you to easily identify your connected meter(s).

To identify the connected meter, follow the steps below :

1 In the meter view, select the desired meter and press **CONNECT.**

2 Then, navigate to the desired connected device and press **Identify.**

3 The meter corresponds to the selected device will beep and flash it's backlight.

Selecting Measurement Mode

1 Typical meter view display.	**2** Press to navigate to the desired meter.	**3** Press to enter mode menu.
4 Typical mode menu display. The active window will be highlighted.	**5** Press to select desired mode. In this example, ACV is selected.	**6** Press to exit mode menu.

Performing Data Logging
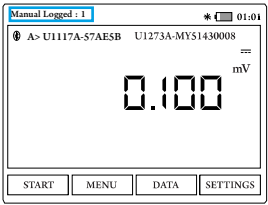

The data logging function provides you the convenience of recording test data for future review or analysis.

Table 3 Data logging maximum capacity

Data logging option	Maximum storage capacity
Manual log	500 pts
Interval log	60 000 pts/100 sessions[1]

[1] *For interval log, a maximum of 60 000 points or 100 sessions can be stored, whichever occurs first. Session ends when the U1115A powers off, count mode ends, restarts new logging or all connected meter(s) disconnect*

Performing Manual Logging

Reviewing Previously Recorded Data

1 Logger — Press to enter data log mode.	**2** DATA / F3 — Press to enter data menu.
3 Interval F2 / Manual F3 — Press to view the interval or manual previously stored records.	**4** ✳ 🔋 01:0i / Interval Log (1/2) / 25 Jan 2013 00:54:05 AM (4 pts) / 25 Jan 2013 00:54:35 AM (4 pts) / Back View Erase All — Typical Interval Log data display.
5 ✳ 🔋 01:0i / Manual Log (1/2) / 26 Jan 2013 00:54:05 AM / 26 Jan 2013 00:54:35 AM / Back View Erase All — Typical Manual Log data display.	**6** ▲ ▼ Press to navigate to desired logged data. / View F2 — Press to view the selected data.

## Freezing the Display (Hold)

To freeze the meters' display(s), press **HOLD**. Press again to unhold.

Connect the U1115A to PC via Bluetooth

NOTE   Before you begin, make sure the **Bluetooth** connection to your PC is enabled.

1 First, follow the steps below to set the U1115A to slave mode :

1	**2**	**3**
CONNECT **F3**	**Bluetooth** **F3**	* ▯ 01:01 **Bluetooth Setup** Role — Master Default PIN — 1234 Back — Edit
Press to enter Connection Manager.	Press to enter Bluetooth Setup.	Typical Bluetooth Setup display.

4	**5**	**6**
Edit **F4**	▲ ▼ Press to select **Slave.**	**OK** **F4**
Press to edit Role.		Press to save.

2 From your PC (Windows 7), go to **start > Devices and Printers.**
3 Click **Add a device.**
4 Select **U1115A-XXXXXX**[1] and click **Next.**
5 Type the default **Bluetooth** pairing code "1234" (default) and click **Next.**
**6** Once pairing is successful, a notification window will appear. Click **Close.**
**7** The **U1115A-XXXXXX** is now added and successfully connected to your PC.
**8** Then, you can connect the U1115A to the Keysight Handheld Meter Logger software which is available at www.keysight.com/find/hhmeterlogger

---

[1] *XXXXXX denotes the U1115A device name and can be obtained from the U1115A System Info (for more information, refer to page 19).*
