

VCO STEP RESPONSE

ACTION / DESCRIPTION

1. **Select the Mean function. (Shift, 1)**

The Mean is the carrier frequency at approximately 625 kHz.

2. **Select the Peak-Peak function. (Shift, 8)**

The Peak-to-Peak deviation of the modulating signal is approximately 100 kHz.

3. **Select the Rate function. (Shift, 5)**

The Rate of the signal modulating the carrier is approximately 10 kHz.
