

Instrument Software Revision History

This revision history document is relevant for the Agilent E6630A, Wireless Connectivity Test Set. Agilent recommends that all instruments be kept up to date by installing the most recent version. Only the most current version, along with update instructions, is accessible via the web and can be downloaded from:

http://www.agilent.com/find/e6630a_software

To view the version that is currently installed in your instrument press [**System**], {**Show**}, {**System**} using the virtual front panel feature and view the Instrument S/W Revision using an external display.

Downgrading the instrument software to a previous version is not supported.
