

Instrument Software Revision History

This document is relevant for the E6650A, EXF Wireless Test Set for Femtocell

[Software version F.14.69](#)

[Software version F.14.56](#)

Software Version F.14.69 Enhancements (Release Date March 10, 2015)

| Model | Option | Description |
|--------|---|---|
| E6650A | V9065B Sequence Analyzer | In Sequence Analyzer mode, reduced minimum transition time between acquisition steps for some configurations. Added a new feature to query Complex IQ Origin Offset. |
| E6650A | V9080B LTE FDD, V9082B LTE TDD, and V9073B W-CDMA | Added a new feature to query Complex IQ Origin Offset. |

Software Version F.14.69 Issues Resolved (Release Date March 10, 2015)

| Model | Option | Description |
|--------|--------|--|
| E6650A | | Fixed a defect: LAN ports IP addresses incorrectly reported in system display. Fixed a defect: Source sequence initialization occasionally causes operation time-out. |

| | | |
|--------|--------------------------------|---|
| | | <p>Fixed a defect: Source sync operation occasionally times out.</p> <p>Fixed a defect: TRX Configurator launch failed occasionally.</p> <p>Fixed a defect: Intermittent “Source Synthesizer Unlocked – DETECTED” errors when executing a source list sequence.</p> |
| E6650A | V9065B Sequence Analyzer | <p>Fixed a defect: Intermittent timeout errors during sequence execution or when fetching sequence results.</p> |

Software Version F.14.56 (Release Date November 20, 2014)

Software F.14.56 Enhancements

- Supports external trigger delay for source input trigger

Software F.14.56 Issues Resolved

- Fixed an issue with waveform multi-pack licenses

V9065B, Sequence Analyzer Application

- Fixed an issue where recalling a sequence file may not be recalled
-

Software Version F.14.54 (Release Date October 15, 2014)

- Initial Release for E6650A, EXF Wireless Test Set for Femtocell
-
