

Engineering Applications I Course

By: John Getty
Laboratory Director
Engineering Department
University of Denver
Denver, CO

Recommended Course Sequence:

Week 1	The Art of Electrical Measurements
Week 2	Voltage and Current Division
Week 3	Proportionality and Superposition
Week 4	Thevenin's Theorem and Interface Circuit Design
Week 5	Introduction to the Transistor
Week 6	Introduction to the Operational Amplifier
Week 7	Circuit Loading and the OP AMP
Week 8	Applications of the OP AMP
Week 9	Interface Circuit Design with OP AMPs
