SOLUTIONS

TOP 3 REASONS TO UPGRADE

1. TEST HIGHER PERFORMANCE DEVICES.
2. REDUCE COST OF TEST AND IMPROVE FLEXIBILITY.
3. GET THE GREATEST IMPACT FOR YOUR CAPITAL EXPENDITURE WITH 25% CREDIT.

1. TEST HIGHER PERFORMANCE DEVICES.

We can help you:

- Perform more complex and data-intensive tests, and fit more high-speed applications into a single chassis.

- The M9018A PXIe chassis provides the highest data rate to each system slot and slot-to-slot. The chassis system bandwidth of 8 GB/s to each slot is at least 2x that of trade-in models; the system bandwidth of 4 GB/s slot-to-slot is at least 4x that of trade-in models.

- The M9018A provides the highest per-slot cooling, with up to 68% better cooling than trade-in models. The innovative cooling design lets the chassis fit into 4U of rack space, with 1U additional needed for a rack-mounted computer.

2. REDUCE COST OF TEST AND IMPROVE FLEXIBILITY.

We can help you:

- **Re-use more of your existing PXI-H and cPCI cards, and ensure compatibility with a wider range of modules, including computers.** The M9018A provides 16 PXIe hybrid slots, at least 2X the number provided in trade-in models, for complete flexibility in module placement.

3. GET THE GREATEST IMPACT FOR YOUR CAPITAL EXPENDITURE WITH 25% CREDIT.

For a limited time, upgrade to the new M9018A PXIe chassis and receive a credit worth up to 25% when you trade an eligible model.

Trade-in model	Maximum Trade-in credit**
	25%
