

CTIA WIRELESS 2002 Show Floor

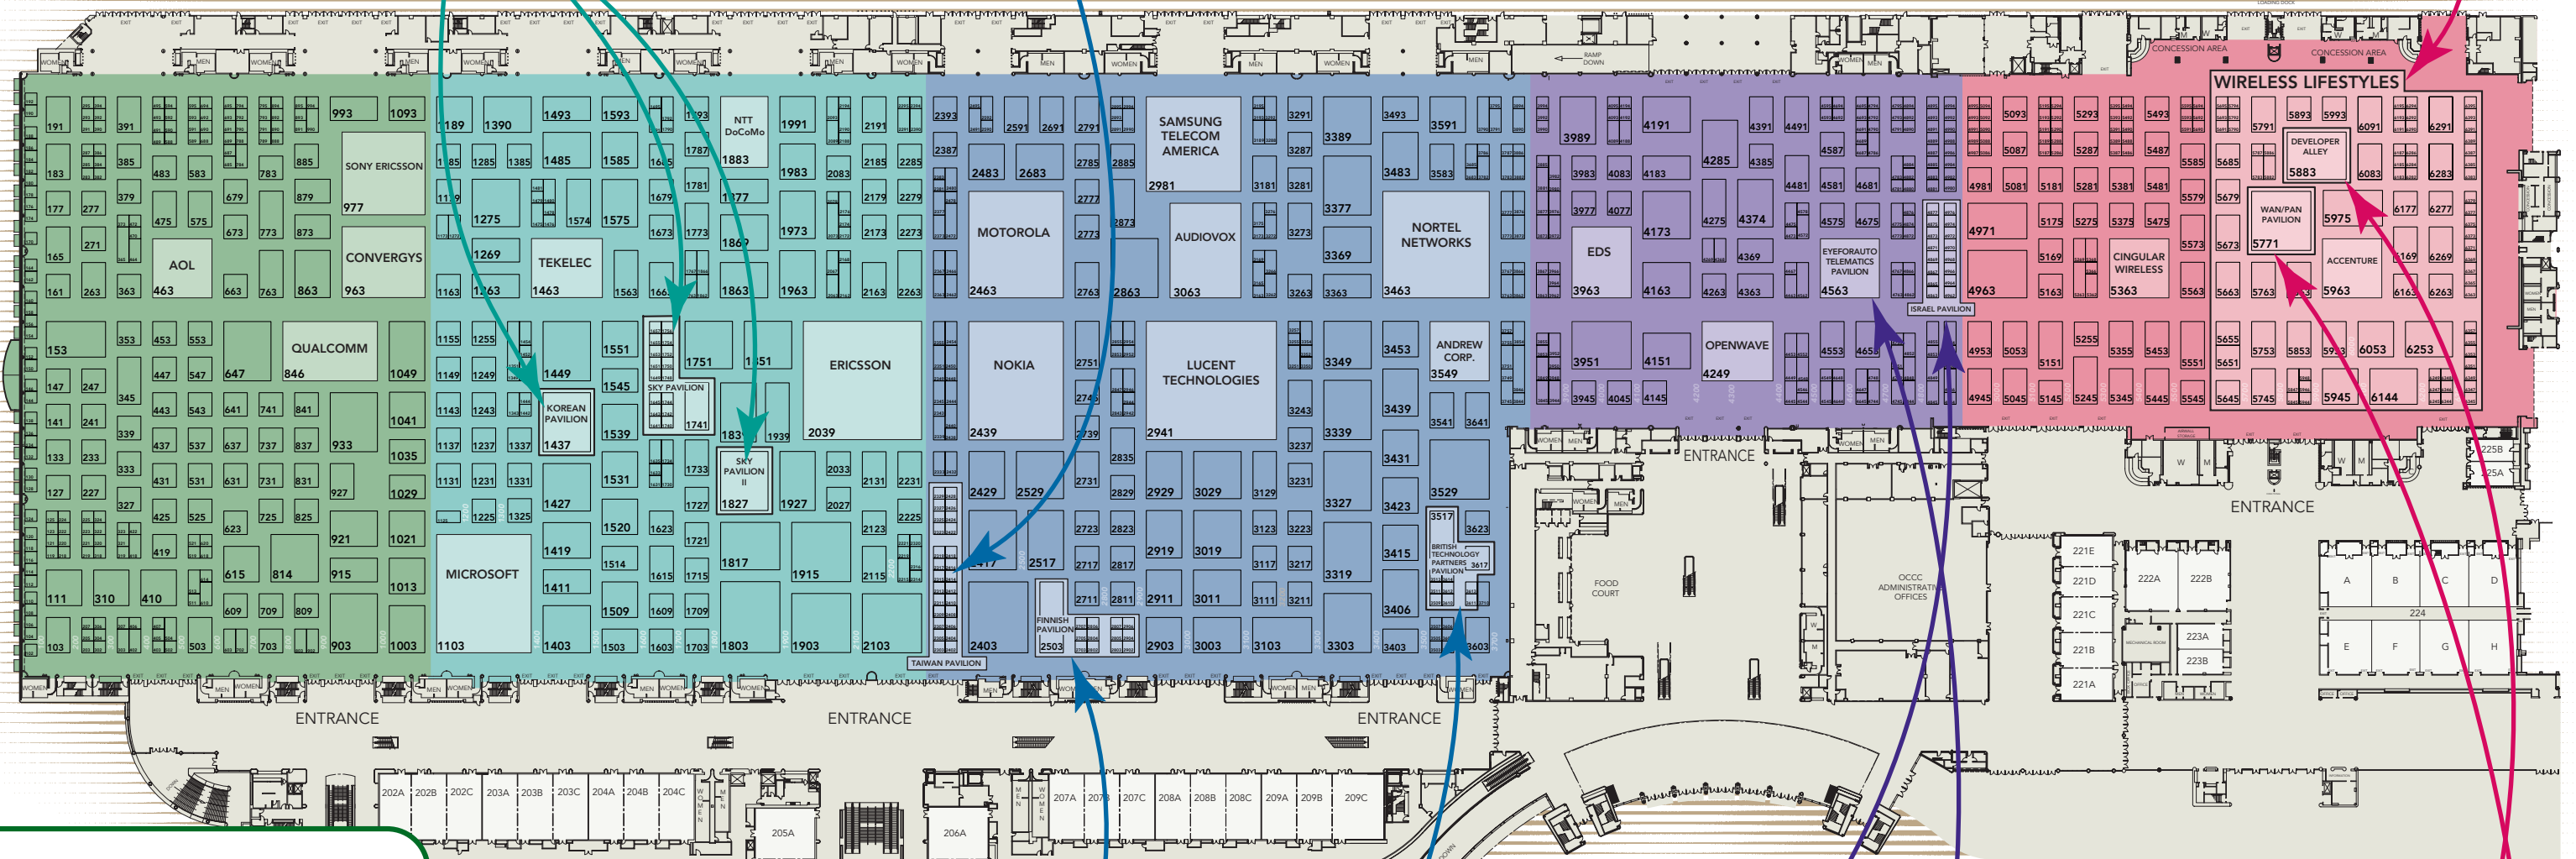

Taiwan Pavilion

Visit leading manufacturers of wireless application products. Meet developers of new wireless applications, as well as the more traditional producers of repeaters, wireless networking equipment and cellular phone accessories.

Korean Pavilions

NEW for CTIA WIRELESS 2002 The Wireless Lifestyles Display!

The Wireless Lifestyles area will encompass one entire hall of the Orange County Convention Center and will house companies pushing the industry to new heights. At the center of this hall will be the "Wireless Lifestyle Experience," an Epcot-like demo of wireless applications in day-to-day environments—school, home, business, hospital, car, etc.

CTIA thanks the following companies for providing coverage and infrastructure support for CTIA WIRELESS 2002:

Official Event Frequency Coordinator:

The Finnish Pavilion

Leading Finnish ICT companies will be displaying their cutting-edge solutions in data security and applications in wireless technologies. Finland is a global leader in wireless telecommunications and its unique development environment has spawned a growing number of technology startups who are seeking international partnerships.

British Technology Partners Pavilion

Sponsored by TIA, the telecommunication industry's prime national trade association in Great Britain, the British Technology Partners Pavilion brings you leading British companies whose main focus is the wireless and mobile computing arenas.

Israeli Pavilion

The Israel Export Institute, the primary organization facilitating trade ties, joint ventures and strategic alliances between overseas businesses and Israeli companies, sponsors the Israeli Pavilion.

EyeForAuto Telematics Pavilion

Telematics is the blending of computers and wireless telecommunications technologies. Come see this HOT technology at CTIA WIRELESS 2002. What happens "When Cars Meet Wireless Technology?" Come find out at CTIA and EyeForAuto's Telematic Pavilion.

Wireless Developer Alley

The Wireless Developer Alley is being hosted by the Wireless Developer Network (www.wirelessdevnet.com). The premier on-line community for information technology professionals interested in mobile computing and wireless communications. This year's Alley will consist of leading wireless technology companies offering solutions and services for voice application, location based services, mobile java, and wireless data applications.

WAN/PAN Pavilion

Networking—it's in the news every time we turn around. Come to the **Wireless Area Networking/Personal Area Networking (WAN/PAN) Pavilion** and see the newest technology allowing for cord-free work environments. This pavilion will be highlighting the innovative companies in the 802.11 and Bluetooth arena.
