

# HP E7452A E02, HP E7460A-E02, and HP E7472A-E02 Information

The HP E74xx, Option E02 systems have the Japanese frequency range, J-CDMA., and include three basic system configurations:

- HP E7452A E02: receiver-only
- HP E7460A-E02: phone only
- HP E7472A-E02: integrated receiver and phone

Differences between the HP E74xx E02 systems and the standard systems are noted below. Refer to the standard documentation, part number E7450-90017, for further product information.

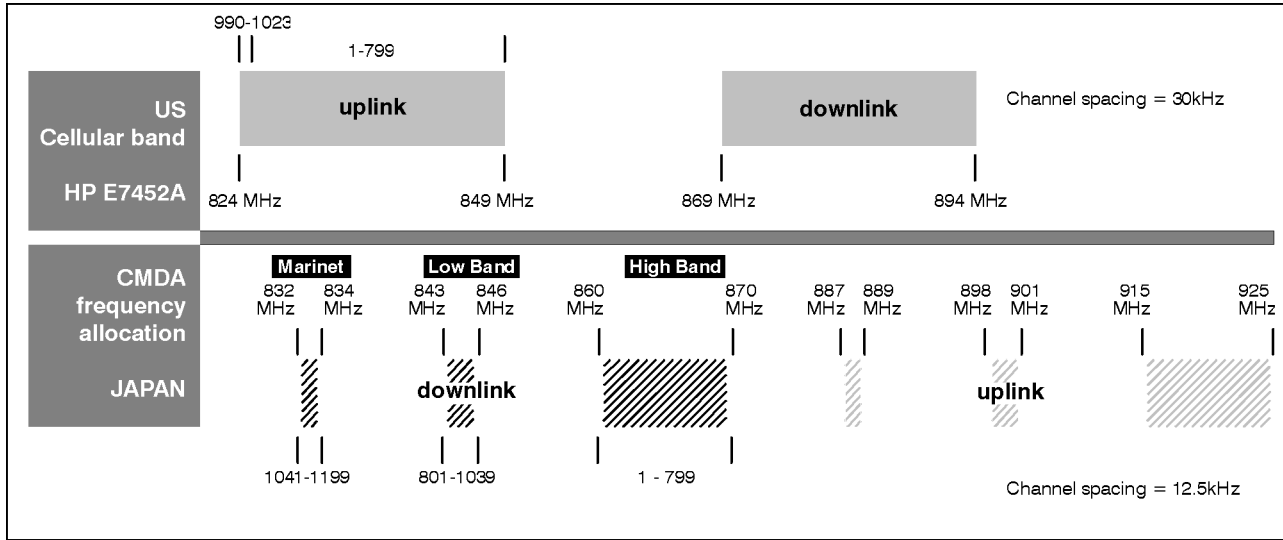

## Frequency Range

<b>Downlink</b>	832 - 870 MHz
<b>Uplink</b>	887 - 925 MHz

## Channelization

The table below indicates the frequency ranges in which the HP E7452A E02 operates. Refer also to Figure 1 on page 2.

<b>Channel spacing</b>	12.5 KHz (The hardware tunes in steps of 30 KHz.)		
<b>Channel numbers</b>	<b>Downlink</b>	<b>Uplink</b>	<b>Channel</b>
<b>ARIB</b>	832 - 834 MHz	887 - 889 MHz	1041 - 1199
	843 - 846 MHz	898 - 901 MHz	801 - 1039
	860 - 870 MHz	915 - 925 MHz	1 - 799
<b>Artificial</b>	834 - 843 MHz	889 - 898 MHz	1841 - 2559
	846 - 860 MHz	901 - 915 MHz	2561 - 3679
<b>Default frequency/channel number</b>	833 MHz / 1120

## Options

The HP E7452A E02 and HP E7472A E02 include an additional receiver upgrade option:

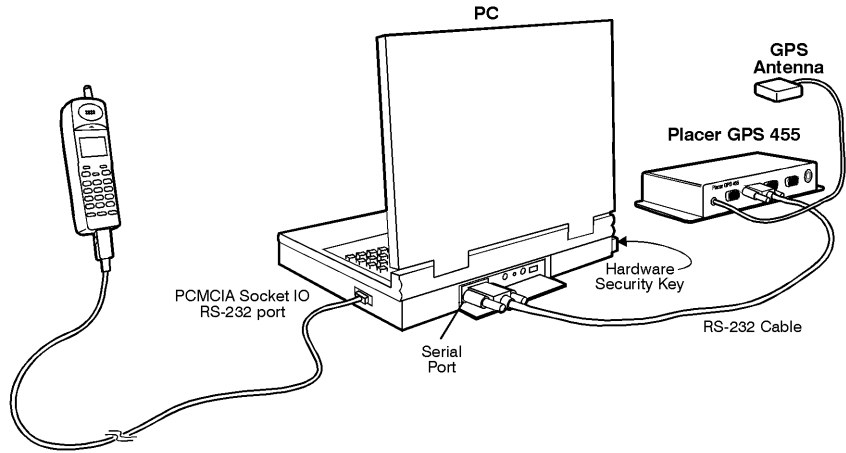

- **HP 86154A, Option E02** is a magnetic-mount antenna kit. It covers 824 to 960 MHz and includes adapters and cable as follows:
  - 1/4 wave antenna, 824-960 MHz magnetic mounting
  - 10-foot extension cable
  - FME male to male adapter
  - FME male to Type N male adapter

The HP E7460A E02 and HP E7472A E02 include an additional phone upgrade option:

- **HP 86154A, Option E11** is a Toshiba CD-10T phone interface cable. See “Phone Cable Setup” on page 3 for setup instructions.

## Phone Cable Setup

Refer to Figure 2 for information on how to connect a phone to your drive test system.
