¹ It is possible to program the output frequency of HP 6812B and 6813B from dc to 45 Hz (see note 3).

² Full current is available at voltages between 50% and 100% of the output voltage range.

³ Product may be operated between dc and 45 Hz subject to the following conditions: measurements may be extended to 4.5 Hz at full accuracy only by selecting a digitization

rate of 250 μseconds per point; frequency content of the measured signal must be limited to 4 kHz or less to avoid aliasing effects.
