

## **Performance Verification & Adjustment Software Reply Card**

Please take a minute to complete the information on the reply card and return it to Agilent Technologies. We will mail you the latest version of the software when it is available. Future releases of the Performance Verification and Adjustment Software may require a license to enable some features.

### **PSA Series Spectrum Analyzers:**

The C.01.00 version of PSA Performance Verification and Adjustment Software supports all options with the exception of Option AYZ (External Mixing), Option 122 (80MHz Bandwidth Digitizer), and Option 123 (Microwave Preselector Bypass).

### **ESA / EMC Series Spectrum Analyzers:**

The A.02.01 version of ESA Performance Verification and Adjustment Software supports all features with the exceptions of: Option H11 (WLAN) for the E4404B, Options 1DR (Narrow Resolution Bandwidths) and 049 (Color Display) for the ESA-L Series analyzers, and ISO 17025 Compliance.

### **E4406A Vector Signal Analyzers:**

The A.02.09 version of VSA Performance Verification and Adjustment Software supports all features with the exceptions of: Phase Noise and Third Order Intermodulation spec improvements (applicable to serial prefixes US4251, MY4251, or later), and ISO 17025 Compliance.
