

**34908A -03**

**S E R V I C E N O T E**

---

Supersedes:  
NONE

**34908A 40 Channel Multiplexer Single Ended**

**Serial Numbers:** ALL US, MY, SG

**New Relay Verification Procedures:** 34901A, 34902A, 34904A, 34908A Modules

**Parts Required:**  
NONE

**Situation:**

The relay verification procedures have been redesigned for the 34901A, 34902A, 34904A and 34908A. The new procedures use an external DMM to make 4 wire resistance measurements across various paths containing relay contacts. The procedure allows you to identify bad relays. It is more complete compared to the old procedure.

**Solution/Action:**

The new procedures can be found in Edition 3 of the 34970A Service Guide. The 34970A Service Guide can be obtained by:

- 1) Downloading/Viewing Service Guide via the web – Go to [www.agilent.com/find/34970A](http://www.agilent.com/find/34970A) scroll to the bottom of the page and select link “Manuals, Guides and Notifications”
- 2) Ordering the 34970A manual set, part number 34970-90101.
