

BenchLink XL 54600 Version 2.0

Notice of availability

- BenchLink XL 54600 version 2.0 for the Agilent 54621A and 54621D oscilloscopes can be downloaded from the web to your pc at:

www.agilent.com/find/5462xsw

BenchLink XL 54600 is a Windows application that makes it very easy for you to download images, waveform data, or oscilloscope setups from the oscilloscope to your pc using either Microsoft Word or Microsoft Excel. After installation of BenchLink XL, a toolbar in these Microsoft applications will make connection and data transfer from the oscilloscope very simple.

You can connect your pc using either RS-232 or GPIB interface.

RS-232 All the new Agilent 54620-series oscilloscopes have a standard RS-232 port on the rear panel of the oscilloscope. We recommend the purchase of Agilent model number 34398A RS-232 cable for your 60-MHz oscilloscope. This cable has been fully tested for connectivity.

GPIB For GPIB connectivity, you should order the N2757A GPIB Interface module for use with your oscilloscope. Using a standard GPIB cable and pc hardware, GPIB connectivity will be complete.
