AUTHOR: TG / MH	ENTITY: 0800	ADDITIONAL INFORMATION: This is a cosmetic adjustment only	

Solution / Action:

1. Place instrument (board down) on bench.
2. Loosen yoke clamp by rotating Phillips screw counterclockwise three turns, and carefully rotate yoke back and forth to loosen it. (See Note 1).
3. With power off, rotate yoke assembly slightly in direction opposite of tilt.
4. Power instrument on and check alignment.
5. If alignment is correct, power instrument off and tighten screw three turns.
6. If alignment is still not correct, repeat steps 3 and 4 until alignment is correct, being sure that power is off during any adjustments.

Note: Care should be taken to not bump the adjustment pot labeled "SUB BRT" while performing this procedure. This pot adjusts the gray shade levels and can adversely affect this parameter if adjusted.
