**Situation:**

The service manual for the DSO80804A will not be available until fall of 2005. Until then service centers and customers can use the performance test section of the 54855-97000 service manual written for the rest of the products in the family. The only difference between the DSO80804A and the rest of the family is that the DSO80804A has a lower bandwidth of 8 GHz.

**Solution/Action:**

Make the following changes to Chapter 3: Testing Performance.

Page 3-16 - Add DSO80804A 8 GHz to the Specification table

Page 3-21 - Add DSO80804A 8 GHz and 100 ps/div to the table in step 11

Page 3-26 - Add DSO80804A = 8 GHz to the top of the table on that page
