

Memory Information and Procedures

Product: 6571A, 6572A, 6573A, 6574A, 6575A Power Supplies (includes all options unless otherwise noted)

Date: August 10, 2006

Memory Type: CMOS EEPROM	Memory Size: 2K
Memory Function: GPIB address, model, cal constants, 5 store states	
User Modifiable (Y/N): Yes	Volatile (Y/N): No
Memory Erase Processes: Store zero in locations 0 thru 5	

Memory Type: CMOS ROM	Memory Size: 256K
Memory Function: Operating instructions, languages and model parameters	
User Modifiable (Y/N): No	Volatile (Y/N): No
Memory Erase Processes: Not user modifiable - OTP device	

Memory Type: CMOS MPU w/o ROM	Memory Size:
Memory Function:	
User Modifiable (Y/N): No	Volatile (Y/N): No
Memory Erase Processes: Not user modifiable No memory	

Memory Type: CMOS MPU with ROM	Memory Size: 4Kx8
Memory Function: Operating instructions, voltage, current parameters	
User Modifiable (Y/N): No	Volatile (Y/N): No
Memory Erase Processes: Not user modifiable - masked device
