**“CC RMS Noise Spec is changed to a Supplemental Characteristic ”**

**Situation:**

Due to the complexity of the test setup and test equipment required to conduct the CC RMS noise test, it has been decided best to change the Specification to a Supplemental Characteristic.

**Solution:**

The CC RMS noise specification is now a Supplemental Characteristic.

**Specifications** are performance parameters warranted over the specified temperature range.

**Supplemental Characteristics** are not warranted but are descriptions of performance determined either by design or type testing.
