**Situation:**

When the unit is power ON, the display went off immediately.

**Verification/Action:**

1. Upon turn on the power supply, if the symptoms are as follows:
  - a. Display light up and then become blank with fan running
  - b. Display light up and hang with fan running
2. Turn OFF the power supply.
3. Remove the existing EPROM and replace with a known good EPROM.
4. Refer to the reference designator of EPROM according to model:

5. Turn ON the unit again and see if the symptom disappears.
6. If the symptom still occurs, turn OFF the unit.
7. Return the unit to factory for Failure Analysis.
