## To install the soft case

1. Open the soft carrying case, and place it on the floor as shown on the following page.
2. Set the instrument on the case as shown in the figure. The instrument should be resting on it's feet in the normal operating position.

---

**CAUTION**

---

If the instrument is placed upside down on the soft case, the case's front flap could be damaged when it is closed.

3. Fold the top of the soft case over the instrument.
4. Fold up one of the soft case's side panels, and locate the zipper that joins the side panel to the soft case's rear panel.
5. Close the zipper all the way to the front of the case.
6. Zipper the remaining side panel in place.
7. Open the soft case's rear ventilation flap, and attach the power cord to the instrument.

---

**CAUTION**

---

Operating the instrument with the soft case's rear flap closed causes overheating and could damage the instrument. Always open the flap before turning on the instrument.

**To install the soft case**
