

16600A-02

HP 16600A 204-channel Logic Analysis System Mainframe
HP 16601A 136-channel Logic Analysis System Mainframe
HP 16602A 102-channel Logic Analysis System Mainframe
HP 16603A 68-channel Logic Analysis System Mainframe

Serial Numbers:
US00000000 / US39159999

Y2K update information. Product requires Software update revision 1.40

Duplicate Service Notes:
16600A-02
16601A-02
16602A-02
16603A-02

To Be Performed By: HP-Qualified Personnel, and customer

Parts Required:
HP P/N Description Quantity
B3760-68712 SW Update CD-ROM v1.40 1

December 1996 Serial Number:
US00000000

Situation:
The HP 16600-series Logic Analysis System mainframe operating system runs on top of HP-UX 10.20. At product release, the HP-UX 10.20 infrastructure operating system included with the mainframe did not include Y2K patches.

Solution / Action:
Install operating system software revision 1.40 using the procedure provided with the update CD-ROM.

Operating system software version 1.40 includes the Y2K patches for the infrastucture HP-UX 10.20 operating system. Note that the HP 16600-series mainframe currently passes HP's date roll tests. However the B4600-series Tool Sets running in the mainframe may display the year 2000 as "100".

Date:
21 May 1999
