# Software Installation Instructions for the HP E2485A Memory Expansion Interface

The HP E2485A software disk is in a white envelope labeled "E2485A Software." You will need to install the software on your HP 16505A Prototype Analyzer. The disk contains software for re-integrating the data, the online help, and configuration files for setting up measurements with the HP E2485A.

Before beginning the upgrade, turn off all equipment.

---

**IMPORTANT!**

---

The HP E2485A software requires Rev. 1.30 or higher of the HP 16505A. If you do not have Rev. 1.30, contact your HP Sales Office for a version upgrade and do NOT install this software.

- 1 Turn on the HP 16500 and wait for the System Configuration menu to appear.
- 2 Turn on the HP 16505A system. Do not start a session. If a session starts automatically, exit the session.
- 3 Insert the installation disk into the HP 16505 disk drive.
- 4 In the Session Manager, click **Update**.
- 5 For each file on the disk, click **Update/Install**.  
DO NOT CLICK ABORT.
- 6 When the upgrade is finished, click **Close**.
