- 8560E-02C
- 8563E-02C
- 8561E-01C
- 8562A-67C
- 8563A-20C

**Defective 5-volt regulators on A6 power supply and A14 frequency control assemblies**

**Situation:**

Before the defect was discovered, a number of Rugged Portable Spectrum Analyzers were shipped with faulty 5-volt regulator ICs. The ICs bear the date codes 9118 through 9248, and have HP part number 1826-0367. The regulators are used on the A6 Power Supply assembly at A6U205, and on the A14 Frequency Control assembly at A14U321. (A14U321 is not a concern in HP8560E, HP8561E and HP8563E.) The defect is likely to cause the ICs to fail in the field.

**Solution/Action:**

Replace A14U321 and A6U205 with a date code other than those listed above.

DATE: 10 January 1994
