To Be Performed By:	(X) Agilent Service Center (X) Personnel Qualified by Agilent (X) Customer
Estimated Installation Time:	1 Hour
Estimated Verification Time:	0.5 Hours

Introduction

This note describes how to use the “Firmware and Measurement Personality” CD to change the option configuration in your instrument.

There are more measurement personality options available than will fit in the instrument memory. The factory installs the license keywords for all the options ordered in the instrument and loads as many personalities that will fit in memory.

To change which options are loaded in your instrument you will need to delete an existing personality from memory and then load the one you want. The self-installation software will lead you through this process.

All of the optional measurement personalities are available for downloading from the CD-ROM that shipped with your instrument. The latest versions are also available from the internet at <http://www.agilent.com/find/psa>.

The approximate memory requirements for the various measurement personalities are accessed by choosing “Version List” from the CD-ROM menu.

Installation Kit Parts List

Tools Required

- Microsoft® Windows® based Personnel Computer with Local Area Network (LAN) card.
- Windows NT® 4.0 or greater, Windows® 98
- CD-ROM drive

Microsoft®, Windows®, and Windows NT® are US registered trademarks of Microsoft Corporation.

Procedure

1. Exit all open applications and insert the “Firmware and Measurement Personality” CD into your CD-ROM Drive. A menu should be displayed automatically.
 - a. If it does not, click START in the lower left corner of your Windows display, then select RUN and type “D:\menu.exe” (assuming “D” is the designation for your CD-ROM Drive).
2. Select Installation Procedure.
3. Carefully follow all parts of the procedure to complete the measurement personality installation.
