Action:

In the event of a customer complaint concerning the above situation, access and view the assembly concerned (see list above). On the assembly, if there are 2×1 cm square through hole capacitors marked 225M 1H TDK, loaded vertically and blue in colour then replace with P/N 0160-0128.

Note: There are only 2 x 1cm square capacitors loaded on the assembly. The replacement capacitors should be marked AVX 2.2M 305C and be yellow in colour. If the capacitor parts received through the parts system are the same as the type being replaced then contact QTO Product Support, quoting this service note, for parts issue.

Once the replacement has been done, perform a Self Test to verify instrument operation (contained in Service Manual P/N 37724-90000).
