

HP 8920B RF Communications Test Set

HP 8920B Option 800 for TDMA Test

Configuration Guide

*Improve throughput
and quality*

For additional HP 8920B information,
refer to the following literature:

- **Brochure:**
literature number 5965-1571E
- **Technical Specifications:**
literature number 5965-1573E
- **Price List:**
literature number 5965-1574EUS

Index	Pages
List of options	2
Configuration examples	2
Analog cellular phone test	3 - 6
Digital cellular phone test	7 - 9
AM, FM, ΦM, cordless phone test	10 - 13
FM and trunked mobile radio test	14 - 15
VSWR, cable fault test	16
Additional options and accessories.....	17 - 18
Upgrades and retrofits	19
PCS upgrade	19

Configuration examples

The HP 8920B can be configured for land mobile, trunked, cordless, and cellular phone test applications. For flexibility in specifying a solution to meet your exact needs, follow the recommendations in this configuration guide to determine the appropriate hardware, software, accessories, and support options for radio and phone testing with the HP 8920B.

AMPS test configuration example

Sample order for AMPS cellular phone testing with software and three-year return repair service.

HP 8920B RF communications test set qty. 1
Option 004 (required) qty. 1
Option W30 return repair service qty. 1

HP 11807E software qty. 1
Option 004 AMPS/EAMPS/NAMPS qty. 1

AMPS/NAMPS/DAMPS/DCCH test configuration example

Sample order for AMPS, NAMPS, DAMPS (IS-54), and DCCH (IS-136) cellular phone testing with optional spectrum analyzer, 10 W to 50 µW power measurement range, C-message weighting filter, 6 kHz bandpass filter and three-year return repair service.

HP 8920B RF communications test set qty. 1
Option 001 (required) H.S. timebase qty. 1
Option 004 (required) signaling qty. 1
Option 006 (required) 10W to 50 µW power range qty. 1
Option 051 (required) dual-mode conn. qty. 1
Option 800 (required) TDMA adapter qty. 1
Option 102 spectrum analyzer qty. 1
Option 013 C message weighting filter qty. 1
Option 014 6 kHz bandpass filter qty. 1
Option W30 return repair service qty. 1

HP 83206A (for return repair service) qty. 0
Option W30 (for return repair service) qty. 1

HP 11807E software qty. 1
Option 014 AMPS/NAMPS/DAMPS/DCCH. qty. 1

Lists of available options

RF communications test set options

HP 8920B RF communications test set

Options

- 001** High stability timebase
- 004** Tone/digital signaling
- 006¹** 10 W to 50 µW power measurement range
- 007¹** Low-level RF power measurements
- 010²** 400 Hz high pass filter
- 011²** CCITT weighting filter
- 012²** 4 kHz bandpass filter
- 013²** C-Message weighting filter
- 014²** 6 kHz bandpass filter
- 020** Radio interface card
- 031** Delete handle and cover
- 051** Dual-mode rear panel connectors
- 102** Spectrum analyzer with tracking generator and ACP (adjacent channel power)
- 500³** HP 83201B Opt. 003 TDMA cellular adapter (IS-54)
- 800³** HP 83206A TDMA cellular adapter (IS-54, IS-136)
- H08¹** High-level RF power measurements to 100 watts continuous

Radio test software options

HP 11807E radio test software for HP 8920B

Options

- 001** North American FM tests
- 002** European ΦM tests
- 003** AM tests
- 004** AMPS/EAMPS/NAMPS cellular phone tests
- 005** TACS/ETACS cellular phone tests
- 007** JTACS/NTACS cellular phone tests
- 008** TDMA dual-mode (DAMPS, IS-54) cellular phone tests
- 009** AMPS/EAMPS/NAMPS/TDMA dual-mode (DAMPS, IS-54) cellular phone tests
- 010** LTR trunked radio tests
- 011** EDACS trunked radio tests
- 014** AMPS/NAMPS/DAMPS/DCCH mobile test software
- 100** System support tests

HP 11807A radio test software for HP 8920B

Options

- H29** NMT cellular phone test

AMPS/EAMPS/NAMPS cellular phone test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Tone/digital signaling	Option 004	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
10 W to 50 µW power measurement range ¹	Option 006	<input type="checkbox"/> <input type="checkbox"/>
C-Message weighting filter ²	Option 013	<input type="checkbox"/> <input type="checkbox"/>
6 kHz bandpass filter ²	Option 014	<input type="checkbox"/> <input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/> <input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
AMPS/EAMPS/NAMPS cellular phone test option	Option 004	<input type="checkbox"/>

Radios supported:

- AMPS, EAMPS, and NAMPS cellular phones

Standard derived from:

- Advanced mobile phone service (AMPS)
- Electronic Industries Association (EIA) [EIA/TIA-553 and EIA-IS-19B] cellular radio specifications with modifications for narrowband systems (NAMPS)[EIA IS-89]

AMPS/EAMPS/NAMPS cellular phone performance tests:

CP call processing registration	TX frequency error	RX expandor response
CP call processing page	TX RF power output	RX audio frequency response
CP call processing release	TX modulation deviation limiting	RX audio distortion
CP call processing origination	TX audio frequency response	RX hum and noise
CP call processing hook flash	TX audio distortion	RX SINAD
CP flow chart (manual phone test)	TX signaling tone/DST	RX FVC order message error rate
	TX FM hum and noise	RX MRI
	TX SAT/DSAT	RX quick general test
	TX RVC data deviation	
	TX compressor response	
	TX current drain	
	TX DTMF frequency error	
	TX switch channels	
	TX quick general test	
	TX/RX quick functional test (no audio)	

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

³ HP 8920Bs cannot be configured with more than one TDMA cellular adapter. Do not order options 500 and 800 concurrently.

TACS/ETACS cellular phone test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Tone/digital signaling	Option 004	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
10 W to 50 µW power measurement range ¹	Option 006	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
6 kHz bandpass filter ²	Option 014	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
TACS/ETACS cellular phone test option	Option 005	<input type="checkbox"/>

Radios supported:

- TACS and ETACS cellular phones

Standard derived from:

- Total Access Communication System (TACS)

TACS/ETACS cellular phone performance tests:

CP call processing registration	TX frequency error	RX expandor response
CP call processing page	TX carrier power	RX audio frequency response
CP call processing release	TX peak frequency deviation	RX audio distortion
CP call processing origination	TX audio frequency response	RX hum and noise
CP call processing hook flash	TX audio distortion	RX SINAD
CP TACS-2 page and release	TX signaling tone	RX FVC order message error rate
CP flow chart (manual phone test)	TX FM hum and noise	RX quick general test
	TX SAT frequency error and deviation	
	TX wideband data deviation	
	TX compressor response	
	TX current drain	
	TX DTMF frequency error	
	TX switch channels	
	TX quick general test	
	TX/RX quick functional test (no audio)	

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

JTACS/NTACS cellular phone test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Tone/digital signaling	Option 004	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
10 W to 50 μ W power measurement range ¹	Option 006	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
JTACS/NTACS cellular phone test option	Option 007	<input type="checkbox"/>

Radios supported:

- JTACS and NTACS cellular phones

Standard derived from:

- Total Access Communications System for Japan (JTACS) mobile station compatibility specification, version five with modifications for narrowband systems (NTACS).

JTACS/NTACS cellular phone performance tests:

CP call processing registration	TX frequency error	RX expandor response
CP call processing page	TX carrier power	RX audio frequency response
CP call processing release	TX peak frequency deviation	RX audio distortion
CP call processing origination	TX audio frequency response	RX hum and noise
CP call processing hook flash	TX audio distortion	RX SINAD
CP flow chart (manual phone test)	TX DTMF frequency error	RX FVC order message error rate
	TX signaling tone/DST	RX quick general test
	TX FM hum and noise	
	TX SAT/DSAT	
	TX RVC data deviation	
	TX compressor response	
	TX current drain	
	TX switch channels	
	TX quick general test	
	TX/RX quick functional test (no audio)	

NMT cellular phone test

HP 8920B RF communications test set	HP 8920B	<input type="checkbox"/>
• Required			
Tone/digital signaling	Option 004	<input type="checkbox"/>
• Recommended			
High stability timebase	Option 001	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
4 kHz bandpass filter ²	Option 012	<input type="checkbox"/>
• Additional performance options			
Spectrum analyzer with tracking generator and adjacent channel power	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807A radio test software	HP 11807A	<input type="checkbox"/>
NMT cellular phone test option	Option H29	<input type="checkbox"/>

Radios supported:

- 450 and 900 MHz NMT cellular phones

Standard derived from:

- Nordic mobile telephone (NMT) [DOC.1.1980, DOC.3.1979, and DOC-900-3.1985]

NMT cellular phone performance tests:

CP roaming updating	TX frequency error	RX RF sensitivity
CP call MTX to MS	TX carrier power	RX amplitude characteristic of limiter
CP clearing from MTX	TX frequency deviation	RX harmonic distortion
CP call MS to MTX	TX limit characteristic of modulator	RX AM suppression
CP clearing from MS	TX audio frequency response	RX audio frequency response
CP switch channel	TX harmonic distortion	RX noise and hum
CP flow chart	TX residual modulation	RX quick
CP all call processing	TX audio muting	RT current drain
	TX mic. sensitivity	RT quick functional audio
	TX supervisory signal deviation	
	TX quick	

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

³ HP 8920Bs cannot be configured with more than one TDMA cellular adapter. Do not order options 500 and 800 concurrently.

⁴ Not compatible with HP 8920B Option 500.

⁵ Not compatible with HP 8920B Option 800.

AMPS/EAMPS/NAMPS/DAMPS/DCCH cellular phone test (800 MHz)

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
10 W to 50 μ W power measurement range ¹	Option 006	<input type="checkbox"/>
Dual-mode rear panel connectors	Option 051	<input type="checkbox"/>
HP 83206A TDMA cellular adapter ³	Option 800	<input type="checkbox"/>
• Recommended		
C-Message weighting filter ²	Option 013	<input type="checkbox"/>
6 kHz bandpass filter ²	Option 014	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.....	HP 11807E	<input type="checkbox"/>
AMPS/NAMPS/DAMPS/DCCH mobile test option ⁴	Option 014	<input type="checkbox"/>

Radios supported:

- AMPS, NAMPS, EAMPS, DAMPS (IS-54), and DCCH (IS-136) cellular phones

Standard derived from:

- Electronic Industries Association (EIA) [EIA/TIA-553 and EIA-IS-19B] cellular radio specifications with modifications for narrowband systems (NAMPS) [EIA IS-89]
- TIA/EIA/IS-137 800 MHz TDMA Cellular Radio Interface, Minimum Performance Standards for Mobile Stations
- TIA/EIA/IS-55-A Recommended Minimum Performance Standards of 800 MHz Dual-mode Mobile Stations

AMPS/NAMPS/DAMPS/DCCH cellular phone test (preliminary)

CP registration on analog control channel	RXA audio distortion	TXA RF power output
CP registration on digital control channel	RXA audio frequency response	TXA RF power output vs. channel (plotted)
CP page	RXA expandor	TXA signaling tone frequency and deviation
• Analog control channel to analog voice channel	RXA FVC order message error rate	TXA SAT frequency and deviation
• Analog control channel to digital traffic channel	RXA hum and noise	TXA wideband data deviation
• Digital control channel to analog voice channel	RXA mobile reported interference (MRI)	
• Digital control channel to digital traffic channel	RXA RF sensitivity (SINAD)	
CP origination	RXA RF sensitivity vs. channel (plotted)	
• Analog control channel to analog voice channel	RXD receiver sen. (channel quality BER, RSSI)	TXD adjacent channel power
• Analog control channel to digital traffic channel	RXD receiver sensitivity (loopback), includes:	TXD calibrate RF power (non-Opt. 006 only)
• Digital control channel to analog voice channel	• BER	TXD modulation accuracy including:
• Digital control channel to digital traffic channel	• FACCH WER	• Error vector magnitude (EVM)
CP release to analog control channel	• SACCH WER	• Peak error vector magnitude (EVM)
CP release to digital control channel	• Speech WER	• Phase error
CP call processing handoffs including:		• Magnitude error
• Digital to digital (D-D)	TXA audio distortion	• Burst amplitude droop
• Digital to analog (D-A)	TXA audio frequency response	• I/Q origin offset
• Analog to digital (A-D)	TXA compressor response	• Carrier frequency error
• Analog to analog (A-A)	TXA current drain	TXD modulation accuracy (10 burst),
• Analog to narrow analog (A-NA)	TXA digital signaling tone (DST) deviation and code	including:
• Narrow analog to analog (NA-A)	TXA DTMF key pad and DTMF frequency error	• Error vector magnitude (EVM)
CP hook flash	TXA DSAT deviation, closure, and phase jitter	• Peak error vector magnitude (EVM)
MISC battery life test, transmit	TXA FM hum and noise	• Phase error
MISC battery life test, standby	TXA frequency error	• Magnitude error
MISC digital talk back	TXA modulation deviation limiting	• Burst amplitude droop
MISC no audio functional		• I/Q origin offset
MISC quick test		• Carrier frequency error
		TXD RF power output
		TXD RF power output vs. channel (plotted)
		TXD time alignment

AMPS/EAMPS/NAMPS/DAMPS cellular phone test (800 MHz)

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
Dual-mode rear panel connectors	Option 051	<input type="checkbox"/>
HP 83201B Option 003 TDMA cellular adapter ³	Option 500	<input type="checkbox"/>
• Recommended		
10 W to 50 µW power measurement range ¹	Option 006	<input type="checkbox"/>
C-Message weighting filter ²	Option 013	<input type="checkbox"/>
6 kHz bandpass filter ²	Option 014	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
AMPS/EAMPS/NAMPS/TDMA dual-mode (DAMPS, IS-54) cellular phone test option ⁵	Option 009	<input type="checkbox"/>

Radios supported:

- AMPS/EAMPS/NAMPS/North American TDMA dual-mode (DAMPS, IS-54) cellular phones

Standard derived from:

- Electronic Industries Association (EIA) [EIA/TIA-553 and EIA-IS-19B] cellular radio specifications with modifications for narrowband systems (NAMPS)[EIA IS-89]
- TIA/EIA/IS-55-A Recommended Minimum Performance Standards of 800 MHz Dual-mode Mobile Stations

DAMPS dual-mode cellular phone performance tests:

CP call processing handoffs including:	TXA frequency error	TXD RF output power
• Digital to digital (D-D)	TXA RF power output	TXD calibrate RF power
• Digital to analog (D-A)	TXA modulation deviation limiting	TXD adjacent channel power
• Analog to digital (A-D)	TXA audio frequency response	
• Analog to analog (A-A)	TXA audio distortion	RXA expandor response
• Analog to narrow analog (A-NA)	TXA signaling tone/DST	RXA audio frequency response
• Narrow analog to analog (NA-A)	TXA FM hum and noise	RXA audio distortion
CP call processing registration	TXA SAT/DSAT	RXA hum and noise
CP flow chart (manual phone test)	TXA RVC data deviation	RXA SINAD
	TXA compressor response	RXA FVC order message error rate
CPA call processing page	TXA current drain	RXA MRI
CPA call processing release	TXA DTMF frequency error	RXA quick general test
CPA call processing origination	TXA switch channels	
CPA call processing hook flash	TXA quick general test	RXD receiver sensitivity (loop back)
CPD call processing talkback	TXA/RXA quick functional test (no audio)	• BER
CPD quick digital test		• WER (FACCH, SACCH, speech data)
CPD call processing page	TXD modulation accuracy including:	RXD receiver sensitivity (channel quality, RSSI)
CPD switch channel	• Error vector magnitude	
CPD origination	• 10 burst error vector magnitude	
CPD release	• Magnitude error	
	• Phase error	
	• Burst amplitude droop	
	• I/Q origin offset	
	• Carrier frequency error	

AMPS/DAMPS cellular phone test. Using TIA adapter (800 MHz)

HP 8920B RF communications test set	HP 8920B	<input type="checkbox"/>
• Required		
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
Dual-mode rear panel connectors	Option 051	<input type="checkbox"/>
HP 83201B Option 003 TDMA cellular adapter ³	Option 500	<input type="checkbox"/>
• Recommended		
10 W to 50 µW power measurement range ¹	Option 006	<input type="checkbox"/>
C-Message weighting filter ²	Option 013	<input type="checkbox"/>
6 kHz bandpass filter ²	Option 014	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software	HP 11807E	<input type="checkbox"/>
TDMA dual-mode cellular phone tests option. Using TIA adapter ⁵	Option 008	<input type="checkbox"/>

Radios supported:

- North American TDMA dual-mode (DAMPS, IS-54) cellular phones

Standard derived from:

- Electronic Industries Association (EIA) [EIA/TIA-553 and EIA-IS-19B] cellular radio specifications.
- TIA/EIA/IS-55-A Recommended Minimum Performance Standards of 800 MHz Dual-mode Mobile Stations

TDMA dual-mode cellular phone performance tests:

NAM numeric assignment module	CPD quick digital test	TXA DTMF frequency error
CP call processing registration	CPD call processing page	TXA quick general test
CP call processing handoffs including:	CPD call processing talkback	TXA/RXA functional (no audio)
• Digital to digital (D-D)	CPD switch channel	TXD RF output power
• Digital to analog (D-A)	CPD origination	TXD modulation accuracy including:
• Analog to digital (A-D)	CPD release	<ul style="list-style-type: none"> • Error vector magnitude • 10 burst error vector magnitude • Magnitude error • Phase error • Burst amplitude droop • I/Q origin offset • Carrier frequency error
• Analog to analog (A-A)	TXA frequency error	TXD calibrate RF power
CP manual flow chart (manual phone test)	TXA RF output power	TXD adjacent channel power
CPA call processing page	TXA modulation deviation limiting	RXA expandor response
CPA call processing origination	TXA audio frequency response	RXA audio frequency response
CPA call processing release	TXA audio distortion FM hum, noise, and muting	RXA audio distortion FM hum, noise and muting
CPA switch channels	TXA signaling tone	RXA SINAD
	TXA SAT frequency error and deviation	RXA quick general test
	TXA wideband data deviation	RXD usable sensitivity including:
	TXA compressor response	<ul style="list-style-type: none"> • BER • WER on speech data • FACCH, and SACCH
	TXA current drain	

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

³ HP 8920Bs cannot be configured with more than one TDMA cellular adapter. Do not order options 500 and 800 concurrently.

⁵ Not compatible with HP 8920B Option 800.

AM radio test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>
High level RF power measurements to 100 watts continuous ¹	Option H08	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
AM radio tests option.....	Option 003	<input type="checkbox"/>

Radios supported:

- Single and multiple channel AM radios

Standard derived from:

- Electronic Industry Association (EIA) AM radio test specifications [RS-382-A]

AM transceiver performance tests:

TX and RX standby current drain	RX hum and noise
TX frequency error	RX audio distortion
TX output power	RX audio frequency response
TX audio frequency response	RX sensitivity (signal to noise)
TX audio distortion	RX sensitivity (SINAD)
TX microphone sensitivity	RX audio squelch sensitivity
TX AM hum and noise	RX automatic gain control
TX quick general test	RX quick general test

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

North American FM radio test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
400 Hz high pass filter ²	Option 010	<input type="checkbox"/>
C-message weighting filter ²	Option 013	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>
High-level RF power measurements to 100 watts continuous ¹	Option H08	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
North American FM tests option	Option 001	<input type="checkbox"/>

Radios supported:

- Single and multiple channel FM radios, duplex FM radios, CTCSS squelched radios, CDCSS squelched radios

Standard derived from:

- Electronic Industry Association (EIA)
FM test specifications EIA/TIA 603 Land Mobile FM or PM Communications Equipment Measurement and Performance Standard

North American FM transceiver performance tests:

TX and RX standby current drain	RX hum and noise
TX frequency error	RX audio distortion
TX output power	RX frequency response
TX modulation limiting	RX usable sensitivity
TX audio frequency response	RX audio squelch sensitivity
TX audio distortion	RX squelch blocking
TX microphone sensitivity	RX CTCSS/CDCSS opening
TX FM hum and noise	RX audio sensitivity
TX residual AM hum and noise	RX variation of sensitivity with frequency
TX CTCSS/CDCSS deviation, freq./code	RX quick general test
TX quick general test	

European ΦM radio test

HP 8920B RF communications test set	HP 8920B	<input type="checkbox"/>
• Recommended			
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
400 Hz high pass filter ²	Option 010	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
• Additional performance options			
Spectrum analyzer with tracking generator and adjacent channel power	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software	HP 11807E	<input type="checkbox"/>
European ΦM tests option	Option 002	<input type="checkbox"/>

Radios supported:

- Single and multiple channel FM radios
- Duplex FM radios
- CTCSS squelched radios
- CDCSS squelched radios

Standard derived from:

- Conference of European Postal Telecommunications (CEPT)
ΦM tests T/RA-24-01
- European Telecommunications Standards Institute (ETSI)
Project team 8 final report (June 1990)

European ΦM transceiver performance tests:

TX and RX standby current drain	RX noise and hum
TX frequency error	RX audio distortion
TX output power error	RX frequency response
TX modulation limiting	RX usable sensitivity
TX frequency deviation	RX amplitude characteristics
TX audio frequency response	RX audio squelch sensitivity
TX audio distortion	RX CTCSS/CDCSS opening
TX microphone sensitivity	RX quick general test
TX residual modulation	
TX CTCSS/CDCSS deviation, freq./code	
TX quick general test	

Cordless phone test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Low-level RF power measurements ¹	Option 007	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
Tone/digital signaling	Option 004	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

LTR trunked mobile radio test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Tone/digital signaling	Option 004	<input type="checkbox"/>
400 Hz high pass filter ²	Option 010	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
CCITT weighting filter ²	Option 011	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>
High-level RF power measurements to 100 watts continuous ¹	Option H08	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.....	HP 11807E	<input type="checkbox"/>
LTR trunked mobile radio tests option	Option 010	<input type="checkbox"/>

Radios supported:

- Simplex and duplex FM radios, both conventional (carrier squelch, CTCSS, and CDCSS) and those using the LTR trunking protocol

Standard derived from:

- Electronic Industry Association (EIA)
FM test specifications
TIA/EIA-603 as modified to support the EF Johnson logic trunked radio (LTR) protocol

LTR trunked mobile radio performance tests:

TX and RX standby current drain	RX hum and noise
TX frequency error	RX audio distortion
TX output power	RX frequency response
TX modulation limiting	RX usable sensitivity
TX audio frequency response	RX conv. audio squelch sensitivity
TX audio distortion	RX conv. squelch blocking
TX microphone sensitivity	RX squelch opening with signaling
TX FM hum and noise	RX audio sensitivity
TX residual AM hum and noise	RX conv. variation to sensitivity with freq.
TX signaling deviation and freq/code	RX quick test
TX quick test	RT trunked manual test

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.

EDACS trunked mobile radio test

HP 8920B RF communications test set.....	HP 8920B	<input type="checkbox"/>
• Required		
Tone/digital signaling	Option 004	<input type="checkbox"/>
• Recommended		
High stability timebase	Option 001	<input type="checkbox"/>
400 Hz high pass filter ²	Option 010	<input type="checkbox"/>
• Additional performance options		
Spectrum analyzer with tracking generator and adjacent channel power.....	Option 102	<input type="checkbox"/>
Radio interface card	Option 020	<input type="checkbox"/>
High-level RF power measurements to 100 watts continuous ¹	Option H08	<input type="checkbox"/>

SOFTWARE

HP 11807E radio test software.	HP 11807E	<input type="checkbox"/>
EDACS trunked mobile radio tests option	Option 011	<input type="checkbox"/>

Radios supported:

- Simplex and duplex FM radios, both conventional (Carrier squelch, CTCSS, and CDCSS) and those using the EDACS trunking protocol

Standard derived from:

- Electronic Industry Association (EIA)
FM test specifications
- TIA/EIA-603 as modified to support the Ericsson GE enhanced digital access
Communications system (EDACS) protocol

EDACS trunked mobile radio performance tests:

TX and RX standby current drain	RX hum and noise
TX frequency error	RX audio distortion
TX output power	RX frequency response
TX modulation limiting	RX usable sensitivity
TX audio frequency response	RX conv. audio squelch sensitivity
TX audio distortion	RX conv. squelch blocking
TX microphone sensitivity	RX squelch opening with signaling
TX FM hum and noise	RX audio sensitivity
TX residual AM hum and noise	RX conv. signal displacement bandwidth
TX signaling deviation and freq/code	RX quick test
TX quick test	RT manual test
TX transient frequency behavior	

System support test software

HP 8920B RF communications test set..........HP 8920B
• Required⁶
Spectrum analyzer with tracking generator and adjacent channel power.....Option 102

SOFTWARE

HP 11807E radio test software.HP 11807E
System support tests optionOption 100

RF tests:

Swept gain
Swept insertion loss
Swept return loss
AMPS channel return loss
Cable fault
ERP calculator
Replot data files
Transfer stored data
SA self calibration on/off
Catalog memory card
Create/edit data collection labels

Field strength:

Performs field strength measurements

Intermodulation products:

Calculates intermodulation products

Scanner:

Discrete frequency scanning
Swept frequency scanning

⁶ For making VSWR and cable fault measurements external components are required.
A kit containing these components (BKH-8920) can be ordered directly from Eagle,
P.O. Box 4010, Sedona AZ 86340. Telephone: (520) 204-2597, FAX: (520) 204-2568.

Additional Options and Accessories

Software support and accessories

HP 83224A IBASIC development tools

For creating or modifying radio test programs:

HP 83224A IBASIC development tools	HP 83224A	<input type="checkbox"/>
IBASIC development tool kit (includes software, HP-IB interface, cable, etc.)	Option 001	<input type="checkbox"/>
IBASIC development tool kit, (software only).....	Option 002	<input type="checkbox"/>

PCMCIA memory cards for IBASIC program and data storage

64 Kbytes SRAM card with battery	HP 83230A	<input type="checkbox"/>
1 Mbyte SRAM card with battery	HP 83231A	<input type="checkbox"/>

Printers⁷

(Must order one for screen and test printouts)

DeskJet 520 printer	C2170A	<input type="checkbox"/>
DeskJet 560C printer	C2168A	<input type="checkbox"/>

Hardware support

HP 8920B options

Three-year return repair service ⁸	Option W30	<input type="checkbox"/>
Five-year return repair service ⁸	Option W50	<input type="checkbox"/>
Calibration certificate with test data	Option UK6	<input type="checkbox"/>
Three-year customer return calibration service ⁹	Option W32	<input type="checkbox"/>
Five-year customer return calibration service ⁹	Option W52	<input type="checkbox"/>
Three-year standards compliant calibration service	Option W34	<input type="checkbox"/>
Five-year standards compliant calibration service	Option W54	<input type="checkbox"/>

⁷ Supported printers include those printers that emulate the Epson FX80 and LQ850, as well as the HP DeskJet, LaserJet, ThinkJet, and QuietJet models.

⁸ For three- or five-year return repair service on HP 8920B Options 500 and 800, order Option W30 on the HP 8920B and Option W30 on a stand-alone HP 83201B or HP 83206A. See examples on page 2.

⁹ For three- or five-year customer return calibration service on HP 8920B Options 500 and 800, order as described in footnote 8.

Rack mount

	HP 8920B options
Delete handle and cover from HP 8920B.....	Option 031 <input type="checkbox"/>
HP 8920B rack mount kit without handle (part no. 5061-4846)	Option 1CM <input type="checkbox"/>
HP 8920B Option 500, 800 rack mount kit (part no. 08921-61037)	Option AXK <input type="checkbox"/>
	HP 83236A options
HP 83236A rack mount kit	Option AX4 <input type="checkbox"/>

Manuals and videos

	HP 8920B options
Delete manual set from HP 8920B.....	Option OBO <input type="checkbox"/>
Extra manual set for HP 8920B	Option OB1 <input type="checkbox"/>
HP instrument BASIC user's handbook (included with HP 8920B)	E2083-90005 <input type="checkbox"/>
HP 8920 user's guide (included with HP 8920B)	08920-90171 <input type="checkbox"/>
HP 8920 applications handbook	08920-90212 <input type="checkbox"/>
HP 8920/8921 programmer's guide (included with HP 8920B).....	08920-90204 <input type="checkbox"/>
HP 8920/8921 assembly level repair manual (included with HP 8920B).....	08920-90168 <input type="checkbox"/>
HP 83201 user's guide (included with HP 83201B)	83201-90034 <input type="checkbox"/>
HP 83201B assembly level repair manual (included with HP 83201B)	83201-90018 <input type="checkbox"/>
HP 83206A user's guide (included with HP 83206A)	83206-90002 <input type="checkbox"/>
HP 83206A assembly level repair manual (included with HP 83206A)	83206-90009 <input type="checkbox"/>
HP 83236A user's guide (included with HP 83236A)	83236-90001 <input type="checkbox"/>
HP 8920 basic operation video tape (VHS/NTSC)	Option OBP <input type="checkbox"/>
HP 8920 basic operation video tape (VHS/PAL)	Option OBQ <input type="checkbox"/>
HP 8920 basic operation video tape (VHS/SECAM)	Option OBZ <input type="checkbox"/>

Transit cases

Hard shell transit case for HP 8920B	08920-90033 <input type="checkbox"/>
Padded carrying case for HP 8920B	1540-1130 <input type="checkbox"/>
Hard shell transit case for HP 8920B, Option 500 or 800	08920-90141 <input type="checkbox"/>
Padded carrying case for HP 8920B, Option 500 or 800	08920-61147 <input type="checkbox"/>

Miscellaneous accessories

CRT sunshade	08920-61051 <input type="checkbox"/>
Antenna	08920-61060 <input type="checkbox"/>
Microphone for HP 8920B	08920-61059 <input type="checkbox"/>
DC battery pack for HP 8920B (24 Volt).....	08920-80027 <input type="checkbox"/>
Battery charger	08920-80028 <input type="checkbox"/>
Connector kit (Contains DC power, mic/acc, RS-232 to RJ-11, and radio interface connectors).	08920-61061 <input type="checkbox"/>
Oscilloscope probe (1 MΩ/7.5 pF 10:1 probe).....	10435A <input type="checkbox"/>
Oscilloscope probe (High Z/40 pF 1:1 probe).....	10438A <input type="checkbox"/>
Oscilloscope probe (High Z/64 pF 1:1 probe).....	10439A <input type="checkbox"/>
RF detector probe for RF mV measurement.....	34301A <input type="checkbox"/>
(100 kHz to 700 MHz. Requires BNC to banana jack adapter, model number 10110B)	
Detector probe for RF mV measurement	54006A <input type="checkbox"/>
(Allows for RF mV measurements up to 1 GHz when used with HP 8920A/B/D)	
Power splitter (DC to 3 GHz, 50 Ω)	11850C <input type="checkbox"/>

Upgrades and Retrofits

Upgrades of existing HP 8920Bs for DAMPS/DCCH and PCS

DAMPS/DCCH

Order HP 83206A - TDMA cellular adapter HP 83206A

Note: Requires HP 8920B with firmware revision \geq 2.01 and Option 001, 004, 006, 051.

Option 013 and 014 are recommended.

PCS Upgrade

Add the HP 83236A PCS Interface to HP 8920B configurations for AMPS, DAMPS, DCCH to translate measurements to the 1850 to 1990 MHz PCS band.

HP 83236A HP 83236A

Rack flange kit without handles (for HP 83236A only) Option AX4

Retrofit kits for HP 8920B options

HP 8920B options

Retrofit Kit for Option 001	R01	<input type="checkbox"/>
Retrofit Kit for Option 004	R04	<input type="checkbox"/>
Retrofit Kit for Option 006 ¹	R06	<input type="checkbox"/>
Retrofit Kit for Option 007 ¹	R07	<input type="checkbox"/>
Retrofit Kit for Option 010 ²	R10	<input type="checkbox"/>
Retrofit Kit for Option 011 ²	R11	<input type="checkbox"/>
Retrofit Kit for Option 012 ²	R12	<input type="checkbox"/>
Retrofit Kit for Option 013 ²	R13	<input type="checkbox"/>
Retrofit Kit for Option 014 ²	R14	<input type="checkbox"/>
Retrofit Kit for Option 020	R20	<input type="checkbox"/>
Retrofit Kit for Option 051	R51	<input type="checkbox"/>
Retrofit Kit for Option 102	R02	<input type="checkbox"/>
Firmware Feature Upgrade Kit	R58	<input type="checkbox"/>
Factory Retrofit for Option H08 ¹	G05	<input type="checkbox"/>

¹ HP 8920Bs cannot be configured with more than one input range option. Do not order options 006, 007, H08 (or any combination of these options) concurrently.

² A maximum of two filter options (010 through 014) can be added to each HP 8920B.
