

HP E6450B, E6451A, or E6452A Receiver

Your Hewlett-Packard E6450B, E6451A, or E6452A receiver adds multiple-receiver capabilities to the following systems only:

Receiver(s)	Systems	Getting Started Guide PN
E6450B, E6452A	E7450B, E7452A, E7470A, E7472A	E7450-90017
E6451A	E7451A, E7471A	E7451-90001

Your receiver includes no software or programming commands, but relies on those found on the system to which it is connected.

Please refer to the *Getting Started Guide* (see above table for part number) that came with the system to which you're connecting your new receiver for specification information and configuration instructions. The illustration below shows a sample multi-receiver system with external GPS configuration. The system also works with optional internal GPS.

Note: The E6450A receiver is not capable of multiple-receiver functionality.
