28641B ThinLan Transceiver Discontinued**Situation:**

Agilent Technologies has discontinued the 28641B ThinLan Transceiver (AUI-BNC Adapter) as of November 1, 2000. Currently, this transceiver is bundled into controller products purchaseable through Manufacturing Test Business Unit (MTBU). After November 1, MTBU will not be able to provide this transceiver bundled with controllers. All current workstations shipped with new systems have an integrated 'AUI' port and a 10-BaseT port. The 'AUI' (attachment unit interface) is used to connect an external 'MAU' (media attachment unit) when the customer site requires a LAN connection other than 10-BaseT (sometimes referred to as EtherTwist).

Solution / Action:

Should a ThinLan Transceiver (BNC-AUI) be required, 3rd party suppliers of ThinLan Transceivers are available on the market. Provided below is a small list (not complete) of suppliers.

ADDITIONAL INFORMATION:

Note:

None of the products available from the vendors below have been tested at the factory. Therefore, MTBU is not recommending a specific vendor. All transceivers should provide comparable functionality that the 28641B HP ThinLan Transceiver offered.

1. Allied Telesyn International (United States, Latin America, Canada and Europe)
