Y2K update information only, recommending upgrade path.

To Be Performed By: HP-Qualified Personnel

Situation:

HP 3070 Series I Systems have been discontinued. No changes will be made to Series I and Telecom Systems using Series 300/400 controllers with revision A.xx.xx software. For customers who do not upgrade, there will be some inconsistencies between utilities in the operating system, reports will have the date formatted incorrectly, and PushButton QSTATS will be unusable except withold data.

Solution / Action:

Year2000 Compliance requires a controller upgrade including ControlPlus or ControlXT cards that support revision B.03.xx Software. MTD will provide, on an as-available basis, and at no cost to customers, used Control Plus cards from Quick70 Upgrades.

No changes will be made to revision A.xx.xx software. For additional Information contact your local Board Test Sales Representative.

Date: 26, Oct 1998

Revised: 23, Feb 1999
