E1520A-01

E1520A  HD2000 Development System Bundle
E1521A  HD2000 Run-only System Bundle
E1522A  HD2000 Extender System

Serial Numbers:
0000A00000 / 9999Z99999

Y2K update information
The E1520A provides a development system complete with VXI mainframe, HP V/382
embedded controller (E1499A), two 64-channel scanning A/D's (E1413A), other
VXI modules, and all the required development software.  The E1520A
development
SW runs on the V/382 with a NON Y2K compliant HP-UX operating system.  It's
therefore, non Y2K compliant.

Situation:
The E1520A development and runtime software was developed, qualified and
released on a versions of HP-UX for Series 300 that was not Y2K compliant
(9.0).
It is unknown if or how the E1520A software would fail, and there are no plans
to retest it with a Y2K compliant HP-UX 9.1 (B6736AA).

Solution / Action:
None.

Date:
11 Nov 1998
