E2085J: SRM/UX Server Software
For HP-UX and RedHat Linux

March 2002

This CD contains SRM/UX server software for all versions of HP-UX and Linux that TAMS currently supports for SRM/UX.

See page 4-2 in the "SRM/UX: System Administrator's and User's Guide" manual for detailed instructions on installing the SRM/UX server software. NOTE that some path names in those instructions will be different because there are now different versions of SRM/UX for different versions of HP-UX and Linux.

The following sections contain details about each of the HP-UX and Linux versions.

1. SRM/UX version 13.02-2 for Red Hat Linux 7.x:
    The SRM/UX software for Red Hat Linux 7.x (kernel 2.4.x) is contained in the two rpm files in the **SRMUX.for.Linux.7.x** sub-directory on this CD. It is installed on PC's running Linux by using the rpm command.

2. SRM/UX version 13.01-2 for Red Hat Linux 6.x:
    The SRM/UX software for Red Hat Linux 6.x (kernel 2.2.x) is contained in the two rpm files in the **SRMUX.for.Linux.6.x** sub-directory on this CD. It is installed on PC's running Linux by using the rpm command.

    If you already have SRM/UX version 13.01-1 installed, and working correctly, on Red Hat Linux 6.x, then you do NOT need to update to this version. If you are having problems with booting clients from the SRM/UX server, then you should update to this newer version.

3. SRM/UX version A.13.02 for HP-UX 11.x on Series 700 and 800:
    The SRM/UX software for HP-UX 11.x is contained in the swinstall depot in the **SRMUX.for.HPUX.11.x.swinstall** sub-directory on this CD. It is installed on HP-UX 11.x Series 700 and 800 computers by using the swinstall command.

4. SRM/UX version A.13.01 for HP-UX 10.x on Series 700 and 800:
    There are no changes to this version from E2085H.

    The SRM/UX software for HP-UX 10.x is contained in the swinstall depot in the **SRMUX.for.HPUX.10.x.swinstall** sub-directory on this CD. It is installed on HP-UX 10.x Series 700 and 800 computers by using the swinstall command.

5. SRM/UX version A.13.01 for HP-UX 9.x on Series 300 and 400:
    There are no changes to this version from E2085H.

    The SRM/UX software for HP-UX 9.x is contained in the update image in the
    SRMUX.for.HPUX.9.x.update file on this CD. It is installed on HP-UX 9.x Series 300 and
    400 computers by using the update command. (NOTE - HP-UX 9.x on Series 700 and 800 is
    no longer supported, because it is not Y2K compliant.)
