Permission to modify the code and to distribute modified code is granted, provided the Copyright, this License, and the Availability note are retained, and a notice that the code was modified is included. UMFPACK Availability: <http://www.cise.ufl.edu/research/sparse/umfpack> UMFPACK (including versions 2.2.1 and earlier, in FORTRAN) is available at <http://www.cise.ufl.edu/research/sparse> . MA38 is available in the Harwell Subroutine Library. This version of UMFPACK includes a modified form of COLAMD Version 2.0, originally released on Jan. 31, 2000, also available at <http://www.cise.ufl.edu/research/sparse> . COLAMD V2.0 is also incorporated as a built-in function in MATLAB version 6.1, by The MathWorks, Inc. <http://www.mathworks.com> . COLAMD V1.0 appears as a column-preordering in SuperLU (SuperLU is available at <http://www.netlib.org>). UMFPACK v4.0 is a built-in routine in MATLAB 6.5. UMFPACK v4.3 is a built-in routine in MATLAB 7.1.

Qt Version 4.6.3 - Qt Notice: The Qt code was modified. Used by permission. Qt copyright: Qt Version 4.6.3, Copyright (c) 2010 by Nokia Corporation. All Rights Reserved. Qt License: Your use or distribution of Qt or any modified version of Qt implies that you agree to this License. User documentation of any code that uses this code or any modified version of this code must cite the Copyright, this License, the Availability note, and "Used by permission." Permission to modify the code and to distribute modified code is granted, provided the Copyright, this License, and the Availability note are retained, and a notice that the code was modified is included. Qt Availability: <http://www.qtsoftware.com/downloads> Patches Applied to Qt can be found in the installation at: `$HPEESOF_DIR/prod/licenses/thirdparty/qt/patches`. You may also contact Brian Buchanan at Agilent Inc. at brian_buchanan@agilent.com for more information.

The HiSIM_HV source code, and all copyrights, trade secrets or other intellectual property rights in and to the source code, is owned by Hiroshima University and/or STARC.

Errata The ADS product may contain references to "HP" or "HPEESOF" such as in file names and directory names. The business entity formerly known as "HP EEsof" is now part of Agilent Technologies and is known as "Agilent EEsof". To avoid broken functionality and

to maintain backward compatibility for our customers, we did not change all the names and labels that contain "HP" or "HPEESOF" references.

Warranty The material contained in this document is provided "as is", and is subject to being changed, without notice, in future editions. Further, to the maximum extent permitted by applicable law, Agilent disclaims all warranties, either express or implied, with regard to this documentation and any information contained herein, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Agilent shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein. Should Agilent and the user have a separate written agreement with warranty terms covering the material in this document that conflict with these terms, the warranty terms in the separate agreement shall control.

Technology Licenses The hardware and/or software described in this document are furnished under a license and may be used or copied only in accordance with the terms of such license. Portions of this product include the SystemC software licensed under Open Source terms, which are available for download at <http://systemc.org/> . This software is redistributed by Agilent. The Contributors of the SystemC software provide this software "as is" and offer no warranty of any kind, express or implied, including without limitation warranties or conditions or title and non-infringement, and implied warranties or conditions merchantability and fitness for a particular purpose. Contributors shall not be liable for any damages of any kind including without limitation direct, indirect, special, incidental and consequential damages, such as lost profits. Any provisions that differ from this disclaimer are offered by Agilent only.

Restricted Rights Legend U.S. Government Restricted Rights. Software and technical data rights granted to the federal government include only those rights customarily provided to end user customers. Agilent provides this customary commercial license in Software and technical data pursuant to FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for the Department of Defense, DFARS 252.227-7015 (Technical Data - Commercial Items) and DFARS 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation).

Fixed Artwork

Using fixed artwork cells

Fixed artwork provided with ADS 2011 is available in the ads_designs library. For information on

how to setup your component to use one of these fixed artwork designs, see

<http://edocs.soco.agilent.com/display/ads201101/Artwork#Artwork-AssociatingArtworkwithanItem>

SMT Package Layout Artwork Library

The SMT Package Layout Artwork Library (SMT PAL) defines the SMT package artwork for some of the most commonly-used packages. The SMT PAL consists of 131 artwork packages of 7 different types:

- Ceramic Flat Pack (CFP)
- Chip and MELF components
- SOT, DPAK and D2PAK
- Plastic Flat Pack (PFP)
- Quad Flat Pack (QFP)
- Plastic Leaded Chip Carrier (PLCC)
- Small Outline IC (SOIC)

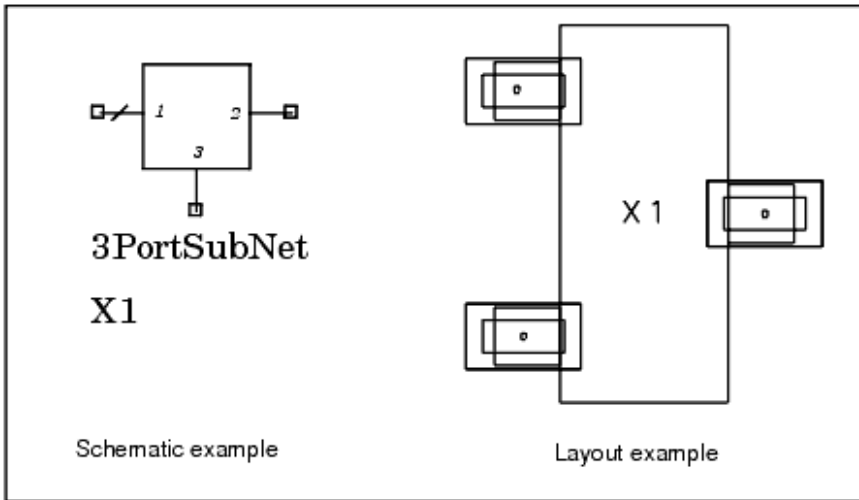

This section describes the library, including the package type and name, the AEL interface function name (AEL macro name), and the dimensions of the package. A diagram is shown for each package type.

This section also describes how you can use the SMT PAL to define the SMT package artwork in a custom *create_item* and how you can use the AEL macro name defining the package artwork as an artwork replacement for sub-circuits or sub-systems.

Using SMT Package Artwork as Artwork Replacement

The procedure for using the SMT package artwork as an artwork replacement is similar to using the standard artwork replacements. In the Design Parameters dialog box, change the artwork type to AEL macro and define the two parameters, SMT_Pad and OFFSET. Set the SMT_Pad parameter type to *string*.

[SMT Artwork Replacement Examples](#) shows an example for using the SMT package layout artwork library AEL function as an artwork replacement, through the Parametric Subnetwork (PSN). Underlying the network *3PortSubNet* is the element S3P, that can be viewed by pushing into the component. In the Design Parameters dialog for the subnetwork, *3PortSubNet*, the Artwork Type is set to AEL *macro* and Name is set to *smtart_SOT23*. Two parameters, SMT_Pad and OFFSET, are defined in the Design Parameters dialog. Set the SMT_Pad parameter value to *String*, with "*Pad1*" as its default value. Set the OFFSET parameter type to *real*, with *0* as its default value.

SMT Artwork Replacement Examples

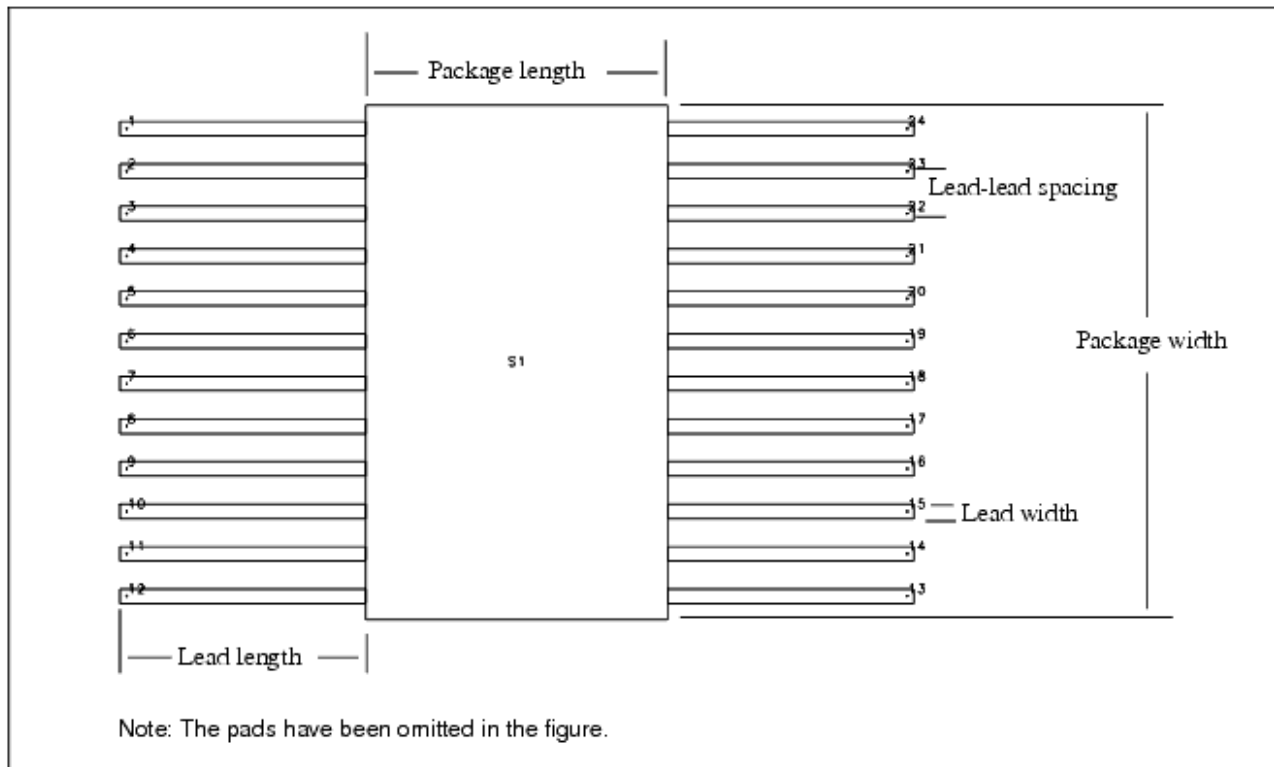

Ceramic Flat Pack (CFP) Packages

[Ceramic Flat Pack \(CFP\) Packages](#) lists 17 CFP packages and the associated layout artwork AEL macro name and dimensions for each package. [Ceramic Flat Pack \(CFP\) Layout Artwork](#) shows the layout artwork for a typical CFP with the marked dimensions given in the table.

SOT, DPAK, D2PAK Packages

[SOT, DPAK, D2PAK Packages](#) lists 20 SOT, DPAK, and D2PAK packages and the associated layout artwork AEL macro name and dimensions for each package.

Most packages require two parameters, SMT_Pad and OFFSET. Packages that require two SMT_Pad parameters are indicated by an asterisk (*). If lead 1 (e.g., SOT143) is of a different dimension than the other leads, the first SMT_Pad identifies lead 1. If a lead other than lead 1 (e.g., DPAK1) is of a different dimension, then the second SMT_Pad identifies the lead of a different dimension.

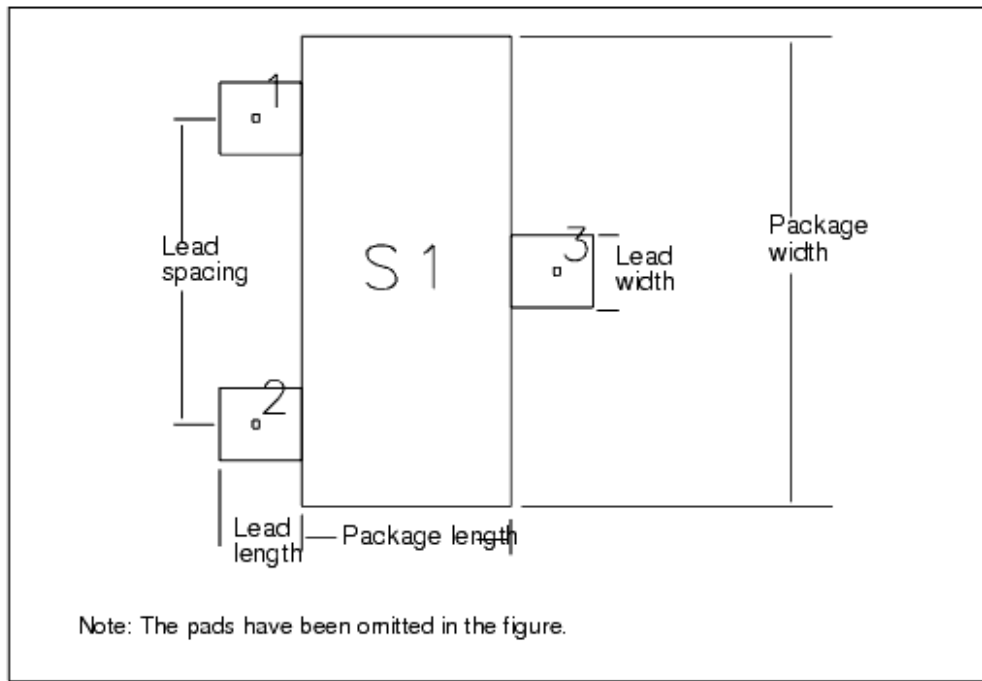

[SOT-23 Layout Artwork](#) shows the layout artwork for a typical SOT-23 package with the marked dimensions given (in mm) in the table.

[SOT, DPAK, D2PAK Packages \(dimensions in mm\)](#)

Advanced Design System 2011.01 - Layout Library

Part Name	AEL Macro Name	Package		Lead 1		Other Leads		Lead-lead Spacing

Small Outline IC (SOIC) Package Layout Artwork

Writing Customized SMT PAL Artwork

This section describes how to customize the SMT PAL artwork AEL functions to use in a custom component. Most times, the SMT artwork types in the SMT PAL can be used without any modifications, assuming the dimensions of the artwork match the

requirements. However, sometimes the artwork in the PAL may not match the dimensions required. In this case, the existing AEL code in the SMT PAL could be used to write a customized artwork.

Structure of a SMT PAL artwork

All SMT PAL artwork use an AEL function to describe the artwork. For example, the SOT143A package uses the AEL function `smtart_SOT143A(smtpad1, smtpad2, offset)`. The code for this function is shown below:

```
defun smtart_SOT143A (smtpad1, smtpad2, offset)
{
// Lead 1 and 2 are interchanged in the leadDim_list on Purpose
smtart_draw_SMT(
  list(smtpad1, smtpad2), //list of SMT PAD instance name
  offset,                //pad offset from connecting pin
  0.0013,                //width of package in Units (1.3 mm)
  0.0029,                //Length of package in Units (2.9 mm)
  0,                    //not used
  0,                    //not used
  list(0.0017,0.0,0.0019,0.0), //Lead-to-lead spacing on sides 1,2,3 and 4
                                //of the package in Units

  list(0.00026,0,0.00026,0), //LeadOffset
  list(2,0,2,0),             //Number of leads list
  list(0.00048,0.00075, 0.00088,0.00075, NULL, 0.00048,0.00075,
0.00048,0.00075, NULL, "side1"),
  list(0,0,-90, 0,-0.0017,-90, 0.00232,-0.0017,90, 0.00232,0.0002,90),
//Pins list
  0,                        //Not Used
  "mts",                   //Units
  "portOpt6",              //Package style option
  0,                        //Lead Extension
  NULL
); //smtart_draw_SMT
}
```

The code above calls another function called, `smtart_draw_SMT()`. This is a generic function that is used by all the SMT PAL artworks. An explanation of the arguments used in the generic function `smtart_draw_SMT()` is given in *Arguments for the Generic Function smtart_draw_SMT()* below:

Argument Name	Description
SMT_PAD_list	List of SMT PAD instance name. For example, the SOT143A has 2 pads, one for leads 1, and another one for leads 2, 3, and 4.
Offset	Pad offset from connecting pin.
Width	Width of package (vertical dimension) in Units e.g. 0.0013 for SOT143A
Length	Length of package (horizontal dimension) in Units e.g. 0.0029 for SOT143A
Width1	Not used
Length1	Not used
Spacing	List of 4 lead-to-lead spacing (in Units) on sides 1, 2, 3, and 4.
LeadOffset	List of lead edge offset (in Units) from edge of package for all 4 sides.
NumLeads	List of number of leads on each side of the package.
LeadsDim	List of leads dimensions on all sides (width1, length1, width2, length2, etc.)
PinsList	List of pin parameters on all sides.
DelX	Not used
Units	Dimension units - "um", "mm", "mts", "mil", "in"
PackageStyle	Package style option. The choices are: portOpt1 - SOT23,SOT25,SOT36 portOpt2 - SOIC, CFP, PFP portOpt3 - PLCC portOpt4 - components, MELF portOpt5 - QFP portOpt6 - SOT143, SOT223 portOpt7 - D2PAK portOpt8 - portOpt9 - DPAK2
LeadExt	Lead extension
PortTransList	Not used

Side 1 is the left hand side, 2 to the top, 3 to the right and 4 to the bottom. Pin 1 is always on the left hand side of the package and is drawn at the origin (0,0).

Examples of SMT PAL Artwork Using the Generic Function

Some more examples of SMT PAL artwork using the generic function is given below.

SOIC Artwork

```
defun smtart_SO8N (smtpad, offset)
{
  decl initialDist;
  // all dimensions in mts.
  //initialDist = 0.5 * [Body_length - Lead_width - ((No_leads/2) - 1) *
lead-lead spacing]
  initialDist = 0.5 * (0.00487 - 0.000432 - 3 * 0.00127);
  smtart_draw_SMT(smtpad,offset,0.0039,0.00487,0,0,
    list(0.00127,0,0.00127,0), list(initialDist,0,initialDist,0),
    list(4,0,4,0),list(0.000432,0.00105,0,0,0.000432,0.00105,0,0),
```

```

list(-90.0,1,NULL,NULL,90.0,5,NULL,NULL),0,"mts", "portOpt2",
0,NULL);
}

```

PLCC Artwork

```

defun smtart_PLCC18AA (smtpad, offset)
{
  decl initialDistL, initialDistW, packLength, packWidth, leadExt;
  leadExt = 0.000508;
  packLength = 0.01173 - 2 * leadExt;
  packWidth = 0.00817 - 2 * leadExt;
  // all dimensions in mts.
  initialDistL = 0.5 * (packLength - 0.000432 - 4 * 0.00127);
  initialDistW = 0.5 * (packWidth - 0.000432 - 3 * 0.00127);
  smtart_draw_SMT(smtpad,offset,packWidth,packLength,0,0,
    list(0.00127,0.00127,0.00127,0.00127),
  list(initialDistL,initialDistW,initialDistL,initialDistW),

  list(5,4,5,4),list(0.000432,0.00088,0.000432,0.00085,0.000432,0.00088,0.0004
32,0.00085),
    list(-90.0,3,7, 180,2,18, 90.0,12,16, 0,8,11, 2),0,"mts", "portOpt3",
  leadExt, NULL);
  //elPorts_list =
  list(ang1,nodeStart,nodeStop,ang2,nodeStart,nodeStop,....,node1Position)
}

```

Ceramic Flat Packages (CFP) and Plastic Flat Packages (PFP)

```

defun smtart_CFP24 (smtpad, offset)
{
  decl initialD;
  initialD = 0.5*(0.01536-11*0.00127-0.00043);
  //initialD = {packLength - (#Leads-1)*spacing - leadWidth}/2
  smtart_draw_SMT(smtpad,offset,0.00965,0.01536,0,0,
    list(0.00127,0,0.00127,0), list(initialD,0,initialD,0),
    list(12,0,12,0),list(0.00043,0.00787,0,0,0.00043,0.00787,0,0),
    list(-90.0,1, NULL,NULL, 90.0,13, NULL,NULL),0,"mts", "portOpt2", 0,
  NULL);
}

```

Quad Flat Package (QFP)

```

defun smtart_QFP32A (smtpad, offset)
{
  decl initialD;
  initialD = 0.5*(0.007-7*0.0008-0.0003);
  smtart_draw_SMT(smtpad,offset,0.007,0.007,0,0,
    list(0.0008,0.0008,0.0008,0.0008),

```

Advanced Design System 2011.01 - Layout Library

```
list(initialD,initialD,initialD,initialD),  
  
list(8,8,8,8),list(0.0003,0.001,0.0003,0.001,0.0003,0.001,0.0003,0.001,0.000
