• Networks Auto Configured- Network Wizard

Network Wizard is the application built-in your device. No need the complicated settings, Network Wizard will detect the SIM card you are using and auto configure the associated networks and data service settings (MMS, Internet...etc) of your service operator. It is really convenient especially while you are on the traveling.

The Network Wizard will configure the network setup automatically while you turn on your device at the first time.

Since the auto-configure is completed, the Network Wizard will ask you to restart your device for the changes to take effect.

• Power On/Off

When you press the power button on the phone quickly, your phone will go to standby mode and turn off the display.

To turn off the power, please follow the below procedures.

Power on:
When powered off, press and hold Power button for two seconds and the phone will be turned on.

Power off:
Press and hold the Power button until the popup message shows. Then select Yes to turn off the phone.

• Activate/Deactivate Phone Function

Use Comm. Manager to turn off phone functions. After the phone function is deactivated, you will still be able to operate other applications.
