Superior performance DVD data and video recording media

- Available across all DVD formats with the latest write speeds
- Powerful 4.7GB of storage capacity for PC and video entertainment applications
- Ideal for recording 2 hours of high quality MPEG2 DVD video or storing large capacity data files
- Exceptional technology, quality and reliability

maxell

Maxell's DVDs achieve the highest standards in optical media whilst delivering superior reliability and compatibility results.

Leading the world... Maxell first launched rewritable DVD-RAM discs in 1998. Since then, Maxell has continued to develop a comprehensive range of DVD media for data storage and video recordings.

Underpinning all of Maxell's DVD products are three key advantageous technologies. These include exceptional precision stamper, moulding process and recording layer technologies.

DVD VIDEO

HGX represents Maxell's advanced stamper production technology, together with extensive research and development expertise in DVD optical media.
