

IBM System/360 Reference Data

**Direct Evaluation of Floating
Point Numbers in Hexadecimal**

**Debugging
Aid**

The information in this publication is based in part on data contained in Form A22-6821-7.

The following tables can be used to evaluate a floating point number represented in hexadecimal form. The technique uses a table lookup in the hexadecimal integer table, and a table lookup in the hexadecimal fraction table. The user unites the integer from the first table with the fraction from the second table, to form one number, and then performs a calculation to obtain the value of the floating point number.

HEXADECIMAL INTEGER TABLES
