IBM PUBLICATIONS

KEYWORD IN CONTEXT INDEX (KWIC INDEX)

Introduction

This complete quarterly edition of the "IBM Publications - KWIC Index" obsoletes all previous editions and TNL N20-0081 dated April 21, 1967.

General

This KWIC Index is based on an abbreviated 30-position publication title. As such, many words have been abbreviated in different ways, dependent upon title length. Thus, items with "CONTROL" unabbreviated appear in one place and may appear in another place as "CNTL". (See "KWIC Index Abbreviations" listing.)

This index is in five listings as follows:

1. Alphabetical - pages 1 through 69
2. Machine or System Type - pages 70 through 98
3. Form Number - pages 99 through 127
4. Type I and II Programs in System Sequence - pages 128 through 138
5. Type III and IV Programs in System Sequence - pages 139 through 163

The # symbol denotes the end of the title, i. e.

(One of several KWIC listings) CONCEPTS - & FACILITIES #0360

(Actual title) 0360 CONCEPTS - & FACILITIES #.

The same item will also be indexed under "FACILITIES", "0360" and the form number, but not under the "&" sign since articles and other words of no intrinsic meaning have been deleted from the indexing operation. (See listing "Words Prevented from Indexing".)

The Reference No. is applicable to the Abstract Binder page number of the SRL (Systems Reference Library) Bibliographies which are self-explanatory except for DPT, which is the Data Processing Techniques Bibliography.

The program material (J40 prefix items) is listed in sections 4 and 5, and is in system sequence within form number.

Publications ordered from the IBM Distribution Center, Mechanicsburg, will be furnished with all applicable Technical Newsletters. TNL's need not be ordered separately unless desired without their corresponding manuals.

All external requests for marketing publications included in this KWIC Index should be forwarded to the local IBM Branch Office for processing.

Published by,
DP Publishing Administration Department,
DPD HQ.

NOTE: This index was prepared on a 1401 from 11,749 publication titles which generated 29,827 listings on the index. This index was printed on sheets 14" x 17" and reduced to 58% for reproduction.

ABST	ABSTRACT	CD	CARD

Re: Form No. 320-1621-15

This Newsletter No. N20-1037

Date

Previous Newsletter Nos. None

IBM MARKETING PUBLICATIONS KWIC INDEX SUPPLEMENT

This newsletter lists all new items that have been announced or obsoleted since publishing 320-1621-15.

There are four separate listings:

1. Alphabetic — pages 1 and 2
2. Machine or System Type — page 3
3. Form Number Sequence — page 4
4. Obsolete Items — page 5

N20-1037
